David S. Ferris,2004-03-25 This Companion offers a comprehensive introduction to the thought of the highly influential twentieth century critic and theorist Walter Benjamin The volume provides examinations of the different aspects of Benjamin s work that have had a significant effect on contemporary critical and historical thought Topics discussed by experts in the field include Benjamin s relation to the avant garde movements of his time his theories on language and mimesis modernity his significance and relevance to modern cultural studies and his autobiographical writings Additional material includes a guide to further reading and a chronology *The Aesthetic Ground of Critical Theory* Nathan Ross,2015-08-27 Walter Benjamin and Theodor W Adorno are considered today to be the two most significant early theorists in founding critical theory In their works and correspondence both thinkers turn to art and the aesthetic as a vital way for understanding modern society and developing philosophical methods This volume of original essays seeks to understand how they influenced each other and disagreed with each other on fundamental questions about art and the aesthetic The books deals with a variety of key philosophical questions such as How does art involve distinctive modes of experience What is the political significance of modern art What does aesthetic experience teach us about the limitations of conceptual thought How is aesthetic experience implicated in the very medium of thought language Ultimately the book presents a systematic argument for the foundational significance of the aesthetic in the development of the early critical theory movement **The Chatter of the Visible**

Homo Temporalis Nitzan Itzhak Lebovic,2025-01-15 *Homo Temporalis* focuses on the importance of temporal concepts for four German Jewish thinkers who profoundly shaped twentieth century intellectual history Martin Buber Walter Benjamin Hannah Arendt and Paul Celan By analyzing the concept of time Nitzan Lebovic explores Buber s stress on the temporality of the dialogue between I and Thou Benjamin s now time and dialectics in standstill Arendt s understanding of democracy as

natality or a permanent revolution and the breathturn that informs Celan's poetry Framing the reception of German Jewish thinking in the second half of the twentieth century as a parallel story to the rise of the modern humanities *Homo Temporalis* also highlights how these foundational temporal concepts illuminate the causes of the present crisis in the humanities and its disciplinary limitations in the age of biopolitics and the Anthropocene *Fascism* Federico Marcon, 2025-06-06 A wide ranging history of the term fascism what it has meant and what it means today The rise and popular support for authoritarianism around the world and within traditional democracies have spurred debates over the meaning of the term fascist and when and whether it is appropriate to use it The landmark study *Fascism The History of a Word* takes this debate further by tackling its most fundamental questions How did the terms fascism and fascist come to be in the first place How and in what circumstances have they been used How can they be understood today And what are the advantages or disadvantages of using fascism to make sense of interwar authoritarianism as well as contemporary politics Exploring the writings and deeds of political leaders activists artists authors and philosophers Federico Marcon traces the history of the term's use and usefulness in relation to Mussolini's political regime antifascist resistance and the quest of postwar historians to develop a definition of a fascist minimum This investigation of the semiotics of fascism also aims to inquire about people's voluntary renunciation of the modern emancipatory ideals of freedom equality and solidarity **To Change All Worlds** Carl R. Trueman, 2024-10-15 *To Change All Worlds Critical Theory from Marx to Marcuse* by Carl R. Trueman is an accessible introduction to the history and development of critical theory From Hegel and Marx to Korsch and Lukács to the Frankfurt School to Wilhelm Reich and Herbert Marcuse Trueman focuses on the key figures of critical theory positioning them within their historical context and tracing the development of critical theory through its various movements evolutions nuances and consequences **Liberating Histories** Claire Norton, Mark Donnelly, 2018-07-11 *Liberating Histories* makes an original scholarly contribution to contemporary debates surrounding the cultural and political relevance of historical practices Arguing against the idea that specifically historical readings of the past are necessary or are compelled by the force of past events themselves this book instead focuses on other forms of past talk and how they function in politically empowering ways against social injustices Challenging the authority and constraints of academic history over the past this book explores various forms of past talk including art films activism memory nostalgia and archives Across seven clear chapters Claire Norton and Mark Donnelly show how activists and campaigners have used forms of past talk to unsettle common sense thinking about political and social problems how journalists artists curators filmmakers and performers have referenced the past in their practices of advocacy and how grassroots archivists help to circulate materials that challenge the power of authorised institutional archives to determine what gets to count as a demonstrable feature of the past and whose voices are part of the historical record Written in a lucid accessible manner and combining insightful critical analysis and philosophical argument with clear consideration of how different forms of past talk influence the narration of pasts in a variety of socio

Antonio Gramsci Dario Gentili,Elettra Stimilli,Gabriele Guerra,2024-09-16 This book marks a missed encounter between two

of the most influential Marxist thinkers of our age Walter Benjamin and Antonio Gramsci studied here for the first time side by side Benjamin and Gramsci were contemporaries whose births and deaths took place within a few years of each other in Western Europe in the first half of the twentieth century Two Marxists sui generis they radically changed Marxism's themes and vocabulary profoundly influencing the most significant analyses and debates At a time in which Marxism was considered to be outdated and in crisis both Gramsci's and Benjamin's thoughts provided resources for its renewal particularly in postcolonial studies for Gramsci and in new media studies for Benjamin Both were victims of fascism on the threshold of the catastrophe of the Second World War These two philosophers' posthumous fortune depended on the transmission of their thought which was first entrusted to friends and comrades and then to entire generations of scholars from a wide range of disciplines Editors Dario Gentili Elettra Stimilli and Gabriele Guerra explore with leading voices on Benjamin and Gramsci the most relevant and topical issues today The book gives an indispensable new perspective in Marxism for students and researchers alike

Walter Benjamin and the Actuality of Critique Carlo Salzani, 2021-07-28 The striking actuality of Walter Benjamin's work does not rest on a supposed usefulness of his philosophy for current concerns but rather on the high legibility to which his oeuvre has come in the present Indeed this legibility is a function of critique which unearths the truth content of a work in a constellation of reading with the present and assures thereby that the work lives on Following this methodological tenet this book approaches Benjamin's work with two foci the actuality of his critique of violence a central and unavoidable topic in the contemporary political philosophical debate and the actuality of his critique of experience which perhaps is not as conspicuous as that of his critique of violence but constitutes nonetheless the bedrock upon which his whole philosophy rests

Discourses typically advance their own claims to resume European culture collaborating with and at the same time trying to assimilate each other in the process The main examples featured here are history geography drama theology language philosophy political theory the sciences and the media Each chapter offers an original and individual interpretation of an inherently comparative world of individual writers and the discursive idioms to which they are historically subject Together the forty one chapters provide a comprehensive and provocative overview of European Romanticism **Body-and Image-Space** Sigrid Weigel,2003-12-16 Assembled here for the first time in English translation Sigrid Weigel offers illuminating new insights into Benjamin s theory combining impulses from post structuralism feminism cultural anthropology and psychoanalysis *Gershom Scholem's Major Trends in Jewish Mysticism 50 Years After* Peter Schäfer,Joseph Dan,1993 Sponsored by the Gershom Scholem Center for the Study of Jewish Mysticism
