Evgeny Morozov, 2013-03-05 A New York Times Notable Book of the Year In the very near future smart technologies and big data will allow us to make large scale and sophisticated interventions in politics culture and everyday life Technology will allow us to solve problems in highly original ways and create new incentives to get more people to do the right thing But how will such solutionism affect our society once deeply political moral and irresolvable dilemmas are recast as uncontroversial and easily manageable matters of technological efficiency What if some such problems are simply vices in disguise What if some friction in communication is productive and some hypocrisy in politics necessary The temptation of the digital age is to fix everything from crime to corruption to pollution to obesity by digitally quantifying tracking or gamifying behavior But when we change the motivations for our moral ethical and civic behavior we may also change the very nature of that behavior Technology Evgeny Morozov proposes can be a force for improvement but only if we keep solutionism in check and learn to appreciate the imperfections of liberal democracy Some of those imperfections are not accidental but by design Arguing that we badly need a new post Internet way to debate the moral consequences of digital technologies To Save Everything Click Here warns against a world of seamless efficiency where everyone is forced to wear Silicon Valley's digital straitjacket Humanize Jamie Notter, Maddie Grant, 2011-09-13 A practical guide for realizing the true potential of social media not for marketing but for leadership Knowing the tools of social media is a must for successful marketing these days but the real promise of social media is the way it can teach us a whole new way of doing business Humanize takes the

Transnational Culture in the Internet Age Sean A. Pager, Adam Candeub, 2012-01-01. Digital technology has transformed global culture, connecting and empowering users on a hitherto unknown scale. Existing paradigms from intellectual property rights to cultural diversity and telecommunications regulation seem increasingly obsolete, confounding policymakers and provoking wide-ranging debate. *Transnational Culture in the Internet Age* draws on a range of disciplines to examine new approaches to regulating communications and cultural production. The insightful contributions shed new light on insufficiently examined issues and highlight connections that cut across the many different domains in which such regulations operate. Building upon the framework presented by David Post, one of the first and most prominent scholars of cyber law and a contributor to this volume, the authors address the implications and economics of the Internet's astronomical scale, jurisdiction, and enforcement of the web as it relates to topics including libel, tourism, and threats to free speech and the power of global communication to dissolve and recreate identities. Ideal for students and scholars of innovation, technology, cyber law, and communication.

Transnational Culture in the Internet Age will be a valuable addition to any library.

Leading Public Sector Innovation Christian Bason, 2010. In a time of unprecedented turbulence, how can public sector organisations increase their ability to find innovative solutions to society's problems? *Leading Public Sector Innovation* shows how government agencies can use co-creation to overcome barriers and deliver more value at lower cost to citizens and business. Through inspiring global case studies and practical examples, the book addresses the key triggers of public sector innovation. It shares new tools for citizen involvement through design thinking and ethnographic research and pinpoints the leadership roles needed to drive innovation at all levels of government. *Leading Public Sector Innovation* is essential reading for public managers and staff, social innovators, business partners, researchers, consultants, and others with a stake in the public sector of tomorrow.
