

Role of Women in the Industrial Revolution

During the Industrial Revolution, women began to work outside of the home. It was a step towards greater independence that would bring many other changes including, eventually, the women's rights movement.

Factory employers liked to hire women because

women of this time made about half the amount of money that a man did for doing the same job. The women often worked as much as 12 hours a week. The factories had water-powered windmills.

One of the first places to employ large numbers of women was an integrated textile mill in Lowell, Massachusetts. By the 1840s, most of the 15,000 textile mill women, known as "Lowell mill girls,"

most of these girls were the daughters of farmers in the northeast United States. A factory job offered an opportunity to help the family financially as the women's financial independence for themselves. These young women lived together in large boarding houses, with several women to a room. The Lowell mill girls were some of the first women to participate in early labor unions when they organized others in 1835 and 1836.

The Lowell girls organized towards the end of the industrial revolution. With the majority of men away at work, an efficient textile mill could make women workers pay well for it. In addition to working in textile factories, they became teachers, nurses, office clerks, and seamstresses. Working women began to feel a sense of community. They banded together to improve working conditions and to fight for an end to slavery. They also began to work more rights for themselves. It was during the industrial revolution that Susan B. Anthony and Elizabeth Cady Stanton brought women together to demand the right to vote, which they eventually won in 1920.

Women Writing And The Industrial Revolution Women Writing And The Industrial Revolution:

Women, Writing, and the Industrial Revolution Susan Zlotnick, 2001-02-21 Industrialization in the eighteenth and nineteenth centuries inspired deep fears and divisions throughout England. The era's emergent factory system disrupted traditional patterns and familiar ways of life. Male laborers feared the loss of meaningful work and status within their communities and families. Condemning these transformations, Britain's male writers looked longingly to an idealized past. Its women writers, however, were not so pessimistic about the future. As Susan Zlotnick argues in *Women Writing and the Industrial Revolution*, women writers foresaw in the industrial revolution the prospect of real improvements. Zlotnick also examines the poetry and fiction produced by working class men and women. She includes texts written by the Chartists, the largest laboring class movement in the early nineteenth century, as well as those of the dialect tradition, the popular commercial literature of the industrial working class after mid-century.

Working Women, Literary Ladies Sylvia Jenkins Cook, 2008 This book explores the mental and literary awakening that many working class women in the United States experienced when they left the home and began to work in factories early in the nineteenth century. Cook also examines many of the literary productions from this group of women, ranging from their first New England magazine of belles lettres, *The Lowell Offering*, to Emma Goldman's periodical *Mother Earth*, from Lucy Larcom's epic poem of women factory workers, *An Idyl of Work*, to Theresa Malkiel's fictional account of sweatshop workers in New York, *The Diary of a Shirtwaist Striker*. Working women's avid interests in books and writing evolved in the context of an American romanticism that encouraged ideals of self-reliance that were not formulated with factory girls in mind. Their efforts to pursue a life of the mind while engaged in arduous bodily labor also coincided with the emergence of middle class women writers from private and domestic lives into the literary marketplace. However, while middle class women risked forfeiting their status as ladies by trying to earn money by becoming writers, factory women were accused of selling out their class credentials by trying to be literary. Cook traces the romantic literariness of several generations of working class women in their own writing and the broader literary responses of those who shared some, though by no means all, of their interests. The most significant literary interaction, however, is with middle class women writers. Some of these, like Margaret Fuller, envisioned ideals of female self-development that inspired without always including working women. Others, like novelists Davis Phelps, Alcott, and Scudder, created compassionate fictions of their economic and social inequities but balked at promoting their artistic and intellectual equality.

The Palgrave Encyclopedia of Victorian Women's Writing Lesa Scholl, Emily Morris, 2022-12-15 Since the late twentieth century, there has been a strategic campaign to recover the impact of Victorian women writers in the field of English literature. However, with the increased understanding of the importance of interdisciplinarity in the twenty-first century, there is a need to extend this campaign beyond literary studies in order to recognise the role of women writers across the nineteenth century, a time that was intrinsically interdisciplinary in approach to scholarly writing and public

intellectual engagement *Working Women, Literary Ladies* Sylvia J. Cook, 2008-01-30 *Working Women Literary Ladies* explores the simultaneous entry of working class women in the United States into wage earning factory labor and into opportunities for mental and literary development It is the first book to examine the fascinating exchange between the work and literary spheres for laboring women in the rapidly industrializing America of the nineteenth and early twentieth centuries As women entered the public sphere as workers their opportunities for intellectual growth expanded even as those same opportunities were often tightly circumscribed by the factory owners who were providing them These developments both institutional and personal opened up a range of new possibilities for working class women that profoundly affected women of all classes and the larger social fabric Cook examines the extraordinary and diverse literary productions of these working women ranging from their first New England magazine of belles lettres *The Lowell Offering* to Emma Goldman's periodical *Mother Earth* from Lucy Larcom's epic poem of female factory life *An Idyl of Work* to Theresa Malkiel's fictional account of sweatshop workers in New York *The Diary of a Shirtwaist Striker* This vital new book traces the hopes and tensions generated by the expectations of working class women as they created a wholly new way of being alive in the world
