Social Manipulation Paolo Cirio, 2018-12-14 Today human sociality is affected by devices subtly designed to program behaviors and profile citizens This book contains over 250 selected patents that the artist Paolo Cirio found by sifting through over 20 000 inventions he published on the website <https://socialitytoday.com> The artist organized the patents into chapters such as Discrimination Polarization Addiction Deception Targeting Control and Surveillance With this artwork Cirio exposes inventions that employ devious psychological and profiling tactics through artificial intelligence algorithms data mining and user interfaces As artistic provocation the Coloring Book of Technology for Social Manipulation proposes the cathartic childlike exercise of coloring to both educate and inform through the visually rendered compositions of outlined flowcharts and patent titles *Battle Tactics of the Western Front* Paddy Griffith, 1994-05-25

Historians have portrayed British participation in World War I as a series of tragic debacles with lines of men mown down by machine guns with untried new military technology and incompetent generals who threw their troops into improvised and unsuccessful attacks In this book a renowned military historian studies the evolution of British infantry tactics during the war and challenges this interpretation showing that while the British army's plans and technologies failed persistently during the improvised first half of the war the

army gradually improved its technique technology and eventually its self assurance By the time of its successful sustained offensive in the fall of 1918 says Paddy Griffith the British army was demonstrating a battlefield skill and mobility that would rarely be surpassed even during World War II Evaluating the great gap that exists between theory and practice between textbook and bullet swept mudfield Griffith argues that many battles were carefully planned to exploit advanced tactics and to avoid casualties but that breakthrough was simply impossible under the conditions of the time According to Griffith the British were already masters of storm troop tactics by the end of 1916 and in several important respects were further ahead than the Germans would be even in 1918 In fields such as the timing and orchestration of all arms assaults predicted artillery fire Commando style trench raiding the use of light machine guns or the barrage fire of heavy machine guns the British led the world Although British generals were not military geniuses says Griffith they should at least be credited for effectively inventing much of the twentieth century s art of war
