Zpl Programming Language Manual:

A Programmer's Guide to ZPL Lawrence Snyder, 1999 ZPL is a new array programming language for science and engineering computation Designed for fast execution on both sequential and parallel computers it is intended to replace languages such as Fortran and C This guide provides a complete introduction to ZPL It assumes that the reader is experienced with an imperative language such as C Fortran or Pascal Though precise and thorough it does not attempt to be a complete reference manual but rather it illustrates typical ZPL usage and explains in an intuitive manner how the constructs work The emphasis is on teaching the reader to be a ZPL programmer Scientific computations are used as examples throughout and a list of common features is printed on the inside back cover for easy reference
