War, Peace, and Human Nature Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com

Human Nature and the Causes of War John David Orme, 2018-04-07 What are the causes of war Wars are generally begun by a revisionist state seeking to take territory The psychological root of revisionism is the yearning for glory honor and power Human nature is the primary cause of war but political regimes can temper or intensify these passions This book examines the effects of six types of regime on foreign policy monarchy republic and sultanistic charismatic and military and totalitarian dictatorship Dictatorships encourage and unleash human ambition and are thus the governments most likely to begin ill considered wars Classical realism modified to incorporate the impact of regimes and beliefs provides a more convincing explanation of war than neo realism War and Human Nature Stephen Peter Rosen, 2009-02-09 Why did President John F Kennedy choose a strategy of confrontation during the Cuban missile crisis even though his secretary of defense stated that the presence of missiles in Cuba made no difference Why did large numbers of Iraqi troops surrender during the Gulf War even though they had been ordered to fight and were capable of doing so Why did Hitler declare war on the United States knowing full well the power of that country War and Human Nature argues that new findings about the way humans are shaped by their inherited biology may help provide answers to such questions This seminal work by former Defense Department official Stephen Peter Rosen contends that human evolutionary history has affected the way we process the information we use to make decisions The result is that human choices and calculations may be very different from those predicted by standard models of rational behavior This notion is particularly true in the area of war and peace Rosen contends Human emotional arousal affects how people learn the lessons of history For example stress and distress influence people s views of the future and testosterone levels play a role in human social conflict This thought provoking and timely work explores the mind that has emerged from the biological sciences over the last generation In doing so it helps shed new light on many persistent puzzles in the study of war

Peace and War Joe Wickmann, 2025-08-27 What if you could ask an AI why humanity keeps making war and whether peace is truly possible War Peace and the Human Paradox is not just a book It s a dialogue about violence compassion and the deepest contradictions of human nature If you ve ever felt powerless watching the news of another war If you ve wondered why humanity despite progress still repeats the same mistakes If you long for peace but fear it may be an illusion This book is for you Step into a bold unfiltered dialogue between human doubt and artificial intelligence Through a candid imaginative

exchange this book explores Why conflict seems woven into the story of our species How history culture and power have made war look like the easy choice The role of politics economics and ideology in sustaining violence Whether peace goes against human nature or fulfills it The rise of AI in modern warfare and whether the same tools could become peacemakers Possible futures from AI enforced stability to genuine human AI partnership for peace After reading this book you will See war not as inevitable but as a choice and peace as a possibility Understand why cultures glorify conquerors and how to redefine true greatness Reflect on today s wars Ukraine Gaza with new clarity and perspective Imagine how AI could shape the world of 2075 for better or worse Feel empowered to rethink the role of politics ethics and personal responsibility in building peace
