Devoured Ayurella Horn-Muller, 2024-03-06 Once beloved then feared and eventually just tolerated kudzu can be found nearly everywhere across the South For everything from trees to crops in American popular culture the invasive vine with Eastern Asian origins has long signified the end of times known to smother everything in its path in an embrace of certain death To many the plant's enduring legacy has been its villainous role as the vine that ate the South But for a select few it has begun to morph into something else entirely In its roots a network of people scattered across the country see a chance at redemption and an opportunity to rewrite a fragment of troubled history

Devoured The Extraordinary Story of Kudzu the Vine that Ate the South detangles the complicated story of one region's fickle relationship with kudzu taking readers on an atmospheric expedition through time chronicling the ways one boundless weed has evolved over centuries and dissecting what we know about what climate change could mean for its future across the United States From architecture teams using it as a building material in pursuit of a low carbon supply chain to clinical applications treating binge drinking to delicacies served in restaurants Ayurella Horn Muller spotlights how kudzu's notoriously tangled reputation in America is gradually being cast aside in favor of its promise Within these pages readers will witness the remarkable ways public perception of kudzu has deviated as the people living in ecosystems overrun by it have bounced between embracing its gifts and fighting to destroy it Doggedly pursuing answers to determine what we conclusively know about kudzu and what we don't Horn Muller unites careful research with human stories to explore how kudzu morphed from a glorified miraculous solution for soil erosion to the monstrous archetypal foe of the Southern landscape **Devoured** is a real life narrative of belonging of racial ambiguity of outsiders and insiders and the path from universal acceptance to undesirability It is a deeply reported tale of mystery a portal into the past present and future of a quintessential plant It is a saga of intrigue a dive into the farthest reaches and darkest depths of the very landscapes housing the species we fight to control Above all this is an ode to the Earth around us a quest for memories and for meaning in today's imperiled world

Desalination Sustainability Hassan Arafat, 2017-06-09 **Desalination Sustainability A Technical Socioeconomic and Environmental Approach** presents a technical socioeconomic and environmental approach that guides researchers and technology developers on how to quantify the energy efficiency of a proposed desalination process using thermodynamics based tools The book offers the technical reader an understanding of the issues related to desalination sustainability For example technology users such as public utility managers will gain the ability and tools to assess whether or not desalination is a good choice for a city or country Readers will learn new insights on a clear and practical methodology on how to probe the economic feasibility of desalination using simple and effective tools such as levelized cost of water LCOW calculation Decision makers will find this book to be a valuable resource for the preliminary assessment of whether renewable powered desalination is a good choice for their particular setting Presents the issues related to desalination

sustainability Guides researchers and technology developers on how to quantify the energy efficiency of a proposed desalination process using thermodynamics based tools Outlines a clear and practical methodology on how to probe the economic feasibility of desalination using simple and effective tools Provides a roadmap for decision makers on the applicability of a desalination process at a particular setting *Global Drinking Water Management and Conservation* Mohammed H. Dore, 2014-09-22 This book discusses different drinking water treatment technologies and what contaminants each treatment method can remove and at what costs The production of drinking water requires adequate management This book attempts to fill the existing knowledge gap about a water treatment technologies and their costs b risk assessment methods c adverse health effects of chemical contaminants d management protocols and varying regulatory practices in different jurisdictions and what successes are possible even with small financial outlays Addressing water consulting engineers politicians water managers ecosystem and environmental activists and water policy researchers and being clearly structured through a division in four parts this book considers theoretical aspects technologies chemical contaminants and their possible elimination and illustrates all aspects in selected international case studies Source water protection water treatment technology and the water distribution network are critically reviewed and discussed The book suggests improvements for the management of risks and financial viability of the treatment infrastructure as well as ways toward an optimal management of the distribution network through the risk based management of all infrastructure assets **Making Home** Sharon Astyk, 2020-12-15 Shows us why the actions that prepare us for emergencies and energy descent are the right things to do no matter what the future brings Toby Hemenway author of Gaia's Garden Other books tell us how to live the good life but you might have to win the lottery to do it Making Home is about improving life with the real people around us and the resources we already have While encouraging us to be more resilient in the face of hard times author Sharon Astyk also points out the beauty grace and elegance that result because getting the most out of everything we use is a way of transforming our lives into something much more fulfilling Written from the perspective of a family who has already made this transition Making Home shows readers how to turn the challenge of living with less into settling for more more happiness more security and more peace of mind Learn simple but effective strategies to Save money on everything from heating and cooling to refrigeration laundry water sanitation cooking and cleaning Create a stronger more resilient family Preserve more for future generations We must make fundamental changes to our way of life in the face of ongoing economic crisis and energy depletion Making Home takes the fear out of this prospect and invites us to embrace a simpler more abundant reality Americans are born to be transient Sharon Astyk has the prescription for dealing with that genetic disease and building a healthy nativeness into our lives Bill McKibben New York Times bestselling author Exhaustively researched and compassionately delivered Harriet Fasenfest author of A Householder's Guide to the Universe *Sanitation & Water Supply in Low-income Countries*, **Sustainable Construction** Charles J.
