the writers and the major texts of what are now the United Kingdom and the Republic of Ireland In five hundred substantial essays written by major scholars the Encyclopedia of British Literature includes biographies of nearly four hundred individual authors and a hundred topical essays with detailed analyses of particular themes movements genres and institutions whose impact upon the writing or the reading of literature was significant An ideal companion to The Oxford Encyclopedia of American Literature this set will prove invaluable for students scholars and general readers For more information including a complete table of contents and list of contributors please visit www.oup.com/us/ebL Spies Who Changed History Nigel West,2022-10-07 Spies have made an extraordinary impact on the history of the 20th Century but fourteen in particular can be said to have been demonstrably important As one might expect few are household names and it is only with the benefit of recently declassified files that we can now fully appreciate the nature of their contribution The criteria for selection have been the degree to which each can now be seen to have had a very definite influence on a specific course of events either directly by passing vital classified material or indirectly by organizing or managing a group of spies Those selected were active in the First World War the inter war period the Second World War the Cold War and even the post Cold War era These include Walther Dew who formed a spy ring in German occupied Belgium during the First World War This train watching network known as White Lady reported on German troop deployments and possible weaknesses in the German defences Extending its operations into northern France the ring provided 75 per cent of the information received by GHQ British Expeditionary Force By the time of the Armistice in 1918 Dew s group had a staggering 1 300 members Olga Gray the 27 year old daughter of a Daily Mail journalist was employed as a secretary by the Communist Party of Great Britain In 1931 she undertook a mission for MI5 to penetrate the organization and discover its secret channel of communication with Moscow Gray learned that the Party s cipher was based on Treasure Island and this breakthrough enabled the Party s messages to be read by Whitehall cryptographers Renato Levi an Italian playboy was the longest serving British agent of the Second World War and is credited with creating the concept of strategic deception While operating in Cairo as a double agent working for the Abwehr and the British he was instrumental in misleading the Axis about Allied strength across the Middle East and helped Montgomery achieve his victory over Rommel s Afrika Korps at El Alamein So successful was Levi in this and other deceptions he was employed to persuade the Germans that the D Day landings in Normandy were a diversionary feint in anticipation of an invasion in the Pas de Calais These and other surprising stories are revealed in this fascinating insight into a secret world inhabited by mysterious and shadowy characters all of whom though larger than life really did exist **FBI Law Enforcement Bulletin** ,1991 The Race for the Atomic Bomb Norman Ridley,2023-04-06 On 19 December 1938 Otto Hahn working at the Kaiser Wilhelm Institute for Chemistry in Berlin conducted an experiment the results of which baffled him It took his migr collaborator Lise Meitner to explain that he had split an atom of uranium which at the time seemed to defy all known laws of physics When Neils Bohr took this news to the United States it became clear to

scientists there that these results opened a completely new and for some horrifying possibility of energy production that could be used for both peaceful and military purposes Scientists in Germany France Britain and the US began to delve deeper into the implications But it was the British government that was the first to explicitly describe how the splitting of the atom might be utilized to create a practical weapon of fearsome power France by then had been occupied by the Germans and most of their nuclear scientists had fled to Britain For their part the Germans who for a time were at the very forefront of nuclear research had weakened their own scientific ranks by hounding many of their best scientists who had fled persecution under the draconian Nazi racial laws They still retained however possibly the ablest nuclear scientist of them all in Werner Heisenberg who set about developing his own program for nuclear power British scientists made extensive progress before realizing that translating their laboratory results into the vast industrial enterprise required to build a bomb was way beyond the nation's stretched resources The government agreed to hand over all the UK's research findings to America in return for a share of the spoils The United States for its part was impressed with British results and invested enormous sums of money and resources into what became known as the Manhattan Project in a concerted effort to build a bomb before the end of the war For much of the war the Soviets showed little enthusiasm for the sort of investment required to build their own bomb However with an eye to the future they established an extensive espionage network both in Britain and America Following the German surrender there was still the problem of Japan and the race continued to develop a working bomb to accelerate the end of the war both to save Allied lives and to prevent Soviet expansion into northern China and the Japanese mainland It was a race that the United States won It was also a race that ushered in a new Cold War Military Review ,1927
