The Other Kind of Funnies Han Yu, 2016-12-14 The Other Kind of Funnies refutes the mainstream American cultural assumption that comics have little to do with technical communication that the former are entertaining in a low brow sense and juvenile whereas the latter is practical and serious to the point of stuffiness The first of its kind this book demonstrates the exciting possibilities of using comics in technical communication It defines comics as a medium and art form that includes cartoons comic strips comic books and graphic novels provides conceptual and historical backgrounds on comics and discusses the appeals and challenges of using comics style technical communication More specifically it examines comics style instructions educational materials health risk communication and political propaganda communication The author argues that comics style technical communication encourages reader participation produces covert persuasion facilitates intercultural communication benefits underprivileged audiences such as children and readers of lower literacy and challenges the positivist view of technical communication An abundance of comics style technical communication examples carefully selected from across cultures and times demonstrates the argument While the book proposes that comics can create user friendly visually oriented engaging and socially responsible technical communication it is also quick to acknowledge the limitations and challenges of comics style technical communication and provides heuristics on how to cope with them The Other Kind of Funnies is unique in its interdisciplinary approach It focuses on technical communication but speaks to design cultural and intercultural studies historical studies and to some extent education politics and art *Using Graphic Novels in the STEM Classroom* William Boerman-Cornell, Joshua Ho, David Klanderman, Sarah Klanderman, 2023-11-02 This book provides everything STEM teachers need to use graphic novels in order to engage students explain difficult

concepts and enrich learning Drawing upon the latest educational research and over 60 years of combined teaching experience the authors describe the multimodal affordances and constraints of each element of the STEM curriculum Useful for new and seasoned teachers alike the chapters provide practical guidance for teaching with graphic novels with a section each for Science Technology Engineering and Mathematics An appendix provides nearly 100 short reviews of graphic novels arranged by topic such as cryptography evolution computer coding skyscraper design nuclear physics auto repair meteorology and human physiology allowing the teacher to find multiple graphic novels to enhance almost any unit These include graphic novel biographies of Stephen Hawking Jane Goodall Alan Turing Rosalind Franklin as well as popular titles such as T Minus by Jim Ottaviani Brooke Gladstone s The Influencing Machine Theodoris Andropoulos s Who Killed Professor X and Gene Yang s Secret Coders series

Literature for Young Adults Joan L. Knickerbocker, 2017-03-15 Young adults are actively looking for anything that connects them with the changes happening in their lives and the books discussed throughout Literature for Young Adults have the potential to make that connection and motivate them to read It explores a great variety of works genres and formats but it places special emphasis on contemporary works whose nontraditional themes protagonists and literary conventions make them well suited to young adult readers It also looks at the ways in which contemporary readers access and share the works they re reading and it shows teachers ways to incorporate nontraditional ways of accessing and sharing books throughout their literature programs In addition to traditional genre chapters Literature for Young Adults includes chapters on literary nonfiction poetry short stories and drama cover art picture books illustrated literature and graphic novels and film It recognizes that while films can be used to complement print literature they are also a literacy format in their own right and one that young adults are particularly familiar and comfortable with The book s discussion of literary language including traditional elements as well as metafictional terms enables readers to share in a literary conversation with their students and others when communicating about books It will help readers teach young adults the language they need to articulate their responses to the books they are reading

Using Graphic Novels in the English Language Arts Classroom William Boerman-Cornell, Jung Kim, 2020-10-01 Shortlisted for the UK Literacy Association s Academic Book Award 2021 There is an increasing trend in teachers using graphic novels to get their students excited about reading and writing using both original stories and adaptations of classic works by authors such as Homer Shakespeare and the Brontes However there is surprisingly little research available about which pedagogies and classroom practices are proven to be effective This book draws on cutting edge research surveys and classroom observations to provide a set of effective methods for teaching with graphic novels in the secondary English language arts classroom These methods can be applied to a broad base of uses ranging from understanding literary criticism critical reading multimodal composition to learning literary devices like foreshadowing and irony The book begins by looking at what English language arts teachers hope to achieve in the classroom It then considers the affordances and constraints of using graphic novels to achieve these

specific goals using some of the most successful graphic novels as examples including Maus Persepolis The Nameless City and American Born Chinese and series such as Manga Shakespeare Finally it helps the teacher navigate through the planning process to figure out how to best use graphic novels in their own classroom Drawing on their extensive teaching experience the authors offer examples from real classrooms suggested lesson plans and a list of teachable graphic novels organized by purpose of teaching
