The Technology Toolbelt For Teaching:

The Technology Toolbelt for Teaching Susan Manning, Kevin E. Johnson, 2011-01-31 Instructors are under pressure to integrate technology into their traditional or online instruction but often they aren't sure what to do or why they should do it. The Technology Toolbelt for Teaching offers instructors a down to earth guide to common technologies, explains the pedagogical purposes they serve and shows how they can be used effectively in online or face to face classrooms. Designed to be easy to use, the book includes a decision making matrix for each technology tool, a series of questions that teachers can use to decide whether these tools support their teaching goals. This comprehensive resource contains an array of useful tools that address problems of organization such as a time management calendar, aids for scheduling meetings and mind mapping or graphic organizers. The authors also include a variety of online tools for communication and collaboration and tools to present content, help establish presence and assess learning. Praise for The Technology Toolbelt for Teaching: Feeling overwhelmed and even afraid of integrating technology into your course? Fear no more! Susan Manning and Kevin Johnson have provided the ultimate guide that explains not only the various technology tools that can support faculty work and enhance coursework but also provides sound advice to help faculty choose the right tool for the job. This is a must read for all faculty regardless of their experience with technology. Rena M. Palloff and Keith Pratt, managing partners, Crossroads Consulting Group and authors Building Online Learning Communities and Collaborating Online. The Technology Toolbelt for Teaching delivers exactly what it promises: a concrete overview of a wide variety of tools, complete with examples specific to practitioners in both K-12 and higher education. Authors Susan Manning and Kevin Johnson provide practical applications rather than philosophy and solutions rather than platitudes. This is a must for any teacher working with or wanting to start working with technology. Jane Bozarth, author Social Media for Trainers, eLearning coordinator, State of North Carolina. Creating compelling learning experiences for students is fraught with decision points. Add one or more technology options to the equation and the number of directions to take learners seems to grow limitlessly and can either paralyze the instructional design process or cause us to take on too much. Enter The Technology Toolbelt for Teaching. Manning and Johnson's handy guide and the decision making matrix that frames each of the tools it demystifies is an essential resource for choosing paths wisely. Jonathan Finkelstein, author Learning in Real Time, founder and executive producer LearningTimes. Includes 50 fresh and useful technology tools for teaching. A decision matrix for choosing and using the right tools. Examples for using each tool in higher education and K-12.

Learning Matters Wendy Leeds-Hurwitz, Peter Sloat Hoff, 2012 Higher education in the United States of America considered by many to set a worldwide standard for broad access and high levels of excellence has for many decades seen massive changes in its approaches to teaching and learning Redesigning and transforming the way colleges and universities teach their students has been likened to reconstructing an airplane while it remains aloft More than 4 000 US colleges and universities have met the challenge by analyzing major changes in student populations and introducing new instructional techniques that recognize the primacy of learning over teaching This seemingly innocent but powerful transformation acknowledging that teaching only matters as a means to the real end learning is powering a pedagogical revolution The Learning Revolution in US higher education began when World War II veterans flooded university classrooms soon to be followed by their children the American Baby Boom Overwhelming numbers of new students from new kinds of backgrounds flooded colleges and universities forcing professors to rethink how they went about teaching these new generations To handle the numbers many new universities were created and many established centers for teaching excellence to help professors adapt to new populations with new techniques In the 1990s higher education further professionalized the teaching craft via the Scholarship of Teaching and Learning Research into how students learn and how to help them learn took its place alongside traditional academic research Aided by a wave of new technologies teaching centers and the scholarship of teaching and learning are transforming the university classroom as well as many new venues outside the classroom where learning now takes place The resulting new pedagogical architecture now embraces every dimension of US higher education

face the challenge of using this medium to promote effective learning strategies especially when teaching older age groups. Because adult learners bring a different set of understandings and skills to education than younger students such as more job and life experiences the one size fits all approach to teaching does not work thus pushing educators to create a student centered approach for each learner. The Handbook of Research on Student Centered Strategies in Online Adult Learning Environments is an important resource providing readers with multiple perspectives to approach issues often associated with adult learners in an online environment. This publication highlights current research on topics including but not limited to online competency based education nontraditional adult learners virtual classrooms in public universities and teacher training for online education. This book is a vital reference for online trainers adult educators university administrators researchers and other academic professionals looking for emerging information on utilizing online classrooms and environments in student centered adult education.
