English with a Latin Beat Barbara O. Baptista, Michael Alan Watkins, 2006-01-01 Although it has long been recognized that second language pronunciation is strongly influenced by the native language second language phonology has only become a recognized area of study during the last thirty years While English has been the most frequent target language involved the learners L1s have varied greatly This is the first collection to gather together studies involving English learners whose L1 is Spanish or Brazilian Portuguese two closely related languages with important phonological differences The research covers vowel perception and production syllable simplification strategies word and compound stress and vowel reduction While the papers confirm the important role of the native language they also shed light on the sometimes subtle and unexpected ways in which this variable interacts with universal markedness relationships to determine the formation of phonetic categories and their use in perception and production These eleven carefully conducted empirical studies will provide insights for practitioners and stimulate further research A Case Frame Study of the Text of the Gospel of Mark Paul L. Danove, 2025-02-20 Paul Danove presents a case frame grammar and lexicon for the Gospel of Mark with three major goals He first provides a step by step introduction to case frame analysis incorporating various adaptations and extensions to address the needs of the study of the Greek of the New Testament He then provides a comprehensive introduction to the most frequently observed predicator usages in the New Testament finally combining all syntactic semantic lexical and further descriptive grammatical information in a manner that guides the interpretation and translation of predicators in their grammatical contexts Danove begins with the method of analysis and description with an overview of case frame grammar an analysis of the events grammaticalized by the predicators in the Gospel of Mark descriptions of the usages of these events

and further specification of these descriptions He then provides illustrative examples of the predicators with each usage discusses the distinctive grammatical characteristics of the Gospel sets forth the protocols for generating lexicon entries and concludes with the case frame lexicon for predicators in the text of Mark *Theology of the Gospel of Mark* Paul L. Danove, 2019-11-28 Paul L. Danove presents the first full length study of God and the theology of God in the Gospel of Mark In dialogue with scholars who assume that texts are designed to guide their own interpretation Danove develops and applies methods of analysis to describe the actions and attributes of God in the Gospel of Mark Danove presents his argument in a threefold structure beginning with outlining a set of complementary semantic narrative and rhetorical methods for investigating characterization He then moves to examine the semantic and narrative content related to the character of God in the Gospel of Mark and then formulates this information under the guidance of the narrative rhetoric into statements of God's fifty six repeated and sixty two non repeated actions and attributes arranged according to God's portrayal as semantic agent benefactive content of human experience experiencer goal instrument patient of predication source theme and topic of faith

Why We Don't Cardrive or Bookread, but Slavedrive and Lipread Angela Lamberty, 2014-12-01 Compounding is a highly productive word formation pattern in the English language In light of this it is counterintuitive that English lacks a general word formation rule for genuine verbal compounds and those appear to be very rare But for what reason does verbal composition disqualify as a productive word formation pattern in English How are verbal pseudo compounds processed and what does this imply about the way in which newly coined genuine verbal compounds would be processed What are the factors that determine and influence the processing of English verbal compounds and pseudo compounds This book adopts a fresh cognitive linguistic perspective on verbal compounding and investigates the above questions with the help of experimental methods It offers a novel and cognitive linguistically based model of mental access to verbal compounds and tries to complement the prevailing structural

and typological approaches by insights on language processing

The Geometry of Meaning Peter

Gardenfors, 2017-02-24 A novel cognitive theory of semantics that proposes that the meanings of words can be described in terms of geometric structures In *The Geometry of Meaning* Peter Gardenfors proposes a theory of semantics that bridges cognitive science and linguistics and shows how theories of cognitive processes in particular concept formation can be exploited in a general semantic model He argues that our minds organize the information involved in communicative acts in a format that can be modeled in geometric or topological terms in what he terms conceptual spaces extending the theory he presented in an earlier book by that name Many semantic theories consider the meanings of words as relatively stable and independent of the communicative context Gardenfors focuses instead on how various forms of communication establish a system of meanings that becomes shared between interlocutors He argues that these meetings of mind depend on the underlying geometric structures and that these structures facilitate language learning Turning to lexical semantics Gardenfors argues that a unified theory of word meaning can be developed by using conceptual spaces He shows that the meaning of different word classes can be given a cognitive grounding and offers semantic analyses of nouns adjectives verbs and prepositions He also presents models of how the meanings of words are composed to form new meanings and of the basic semantic role of sentences Finally he considers the future implications of his theory for robot semantics and the Semantic Web

The Phonology of Turkish Öner Özçelik, 2024-10-25

This book offers a comprehensive account of the phonological structure of modern Turkish within the framework of recent linguistic models While phenomena at both the segmental and suprasegmental levels are discussed the emphasis is on the latter with analysis of phonological processes that extend over a number of different domains Lower level prosodic constituents including syllables feet and prosodic words are incorporated into a general theory alongside higher level constituents the phonological phrase and the intonational phrase on the assumption that phonological structure is hierarchical in nature and that phonological representations consist of more than a single linear sequence of segments The approach employed here draws on theories of both representation Prosodic Phonology and Autosegmental Phonology and computation in the form of Optimality Theory An overarching theme that emerges in every chapter is that not only regular but also apparently exceptional phonological forms demonstrate a systematic pattern and that both can be captured by the same grammar The volume provides a critical synthesis of research in Turkish phonology as well as offering new analyses and data from a theoretically oriented perspective

A Case Frame Grammar and Lexicon for the Book of Revelation Paul L. Danove, 2022-06-02

Paul Danove presents a case frame grammar and lexicon for the Book of Revelation with three major goals He first provides a step by step introduction to case frame analysis incorporating various adaptations and extensions to address the needs of the study of the Greek of the New Testament He then supplies a comprehensive case frame grammar and description of the syntactic semantic and lexical requirements that each predicator imposes on its complements He finally generates a case frame lexicon that guides the

interpretation and translation of each predicator occurrence in its grammatical contexts Danove begins with the method of analysis and description with an overview of case frame grammar an analysis of the events grammaticalized by the predicators in the Book of Revelation descriptions of the usages of these events and further specification of these descriptions He then provides illustrative examples of the predicators with each usage discusses the distinctive grammatical characteristics of Revelation sets forth the protocols for generating lexicon entries and concludes with the case frame lexicon for predicators in the text of Revelation The Sociolinguistics of Digital Englishes Patricia Friedrich,Eduardo Diniz de Figueiredo,2016-02-22 The Sociolinguistics of Digital Englishes introduces core areas of sociolinguistics and explores how each one has been transformed by the current era of digital communication and the Internet Addressing the changing dynamics of English es in the digital age this ground breaking book discusses the spread of English and its current status as a global language demonstrates how key concepts such as language change speech communities gender construction and code switching are affected by digital communications analyzes examples of the interaction of Englishes and social media such as Facebook Twitter and Urban Dictionary and provides questions for discussion and further reading with each chapter Accessible and innovative this book will be key reading for all students studying sociolinguistics and digital communication or with an interest in language in the globalized multimedia world Meeting Handbook Linguistic Society of America,2001
