Value Added Tax International Practice And Problems:

Value Added Tax Mr. Alan A. Tait, 1988-06-15 This book by Alan A. Tait is an examination of VAT. It looks at problems and theoretical options and potential impacts as well as detailing the practical aspects of implementing new tax structures. The author advances arguments for and against alternative policies and illustrates his study with international examples from Europe, Latin America, Asia, and the Pacific. He suggests that countries can learn from each other's experiences with VAT.

Value Added Tax James M. Bickley, 2003 The feasibility of levying a value added tax (VAT) to reduce large forecast budget deficits seems to never go away. A VAT is imposed at all levels of production on the differences between firms' sales and their purchases from all other firms. A VAT is assumed to be fully shifted forward to consumers; hence, a VAT is a type of general consumption tax. The United States does not have a broad-based national level consumption tax and in general relies less on consumption taxes. This book examines the concepts, issues, and experiences of the value added tax in other countries.

Value Added Tax Alan A. Tait, 2001 *The Rise of the Value-Added Tax* Kathryn James, 2015-04-30 Explores how the value added tax (VAT) has risen from relative obscurity to become one of the world's most dominant revenue instruments.

Value Added Tax Alan Schenk, Victor Thuronyi, Wei Cui, 2015-02-09 This book integrates legal, economic, and administrative materials about the value added tax (VAT) to present the only comparative approach to the study of VAT law. The comparative presentation of this volume offers an analysis of policy issues relating to tax structure and tax base as well as insights into how cases arising out of VAT disputes have been resolved. Its principal purpose is to provide comprehensive teaching tools, laws, cases, analytical exercises, and questions drawn from the experience of countries and organizations around the world. This second edition includes new VAT-related developments in Europe, Asia, Africa, and Australia and adds new chapters on VAT avoidance and evasion and on China's VAT. Designed to illustrate, analyze, and explain the principal theoretical and operating features of value added taxes, including their adoption and implementation, this book will be an invaluable resource for tax practitioners and government officials.

Modernizing VATs in Africa Sijbren Cnossen, 2019-07-12 Most African countries are in dire need of more tax revenue. In 28 out of 45 countries, the value added tax (VAT) total tax revenue as a percentage of GDP is around 15% or less, falling short of what is necessary to finance basic human and economic development. Far from being revenue-raising instruments, current African VATs are riddled with exemptions, exclusions, and zero rates on domestic goods and services that depress revenue, are highly distortionary, and greatly complicate the administration of VAT. Modernizing VATs in Africa enables policymakers, professionals, and students to analyze African tax systems to ascertain how they can be modernized. It explains the case for VAT base broadening over time, arguing that exemptions and zero rates mainly accrue benefits for higher income groups. Even more persuasively, it demonstrates that the net result of fiscal systems can be equalizing if the revenue of broad-based VATs is used to finance in-kind transfers such as healthcare and education. VAT modernization should be used to enable governments to finance

development Modernizing VATs in Africa puts a compelling case forward for how and why this can be achieved *Value Added Tax and Direct Taxation* Michael Lang, Peter Melz, Eleonor Kristoffersson, Thomas Ecker, 2009 This book provides a comprehensive in depth analysis of the similarities and differences between consumption taxes and direct taxes Fifty contributions are included written by academics practitioners and representatives from several international tax administrations and institutions *Taxation* Terrance B. Caldwell, 2008 Taxes fund the services provided by governments The goal of tax policy is to design a tax system that produces the desired amount of revenue and balances the minimisation of compliance and efficiency costs with other objectives such as equity transparency and administrability This new book brings to light new issues and challenges in this field **European VAT and the Sharing Economy** Giorgio Beretta, 2019-10-24 A breadth of new digital platforms has dramatically expanded the range of possibilities for exchanging anything required by business or personal needs from accommodation to rides In the virtual marketplaces shaped and ruled by these novel matchmakers rather than by a single centralized entity value is created through the granular interaction of many dispersed individuals By allowing instantaneous and smooth interaction among millions of individuals platforms have indeed pushed the digital frontier farther and farther so as to include within it even services once not capable of direct delivery from a remote location such as accommodation and passenger transport Legal disruption is also underway with foundational dichotomous categories such as those between suppliers and customers business and private spheres employees and self employed no longer viable as organizational legal structures This is the essential background of the first book to relate what is synthetically captured under the umbrella definition of sharing economy to key features at the core of European Value Added Tax EU VAT and to look at the feasibility of a reformed EU VAT system capable of addressing the main challenges posed by these new models of production distribution and consumption of goods and services Specifically the study analyses five legal propositions underpinning the current EU VAT system as the following taxable persons taxable transactions composite supplies place of supply rules and liability regimes for collection and remittance of VAT Exploration of these five legal propositions is meant to assess the practical feasibility of shoehorning the main sharing economy business models notably those available in the accommodation and passenger transport sectors into the framework of existing EU VAT provisions The author further draws on the normative standards of equality neutrality simplicity flexibility and proportionality to test the reflexes of the current EU VAT system in the sharing economy domain Opportunities for reform of the current EU VAT system are in turn evaluated with each chapter including cogent proposals in the form of incremental and targeted amendments to the current EU VAT provisions As the first comprehensive analysis of the treatment of the sharing economy for VAT purposes the book provides not only a theoretical framework for future studies in the tax field but also indispensable practical guidance for VAT specialists confronting daily with the many challenges ushered in by the sharing economy Moreover the various solutions and recommendations advanced in the book offer valuable insights to international and
