Vanished Paths Palazzo Bonaguro (Bassano del Grappa),2000 **At a Distance** Annmarie Chandler,2005 The theory and practice of networked art and activism including mail art sound art telematic art fax art Fluxus and assemblings Networked collaborations of artists did not begin on the Internet In this multidisciplinary look at the practice of art that takes place across a distance geographical temporal or emotional theorists and practitioners examine the ways that art activism and media fundamentally reconfigured each other in experimental networked projects of the 1970s and 1980s By providing a context for this work showing that it was shaped by varying mixes of social relations cultural strategies and political and aesthetic concerns *At a Distance* effectively refutes the widely accepted idea that networked art is technologically determined Doing so it provides the historical grounding needed for a more complete understanding of today's practices of Internet art and activism and suggests the possibilities inherent in networked practice *At a Distance* traces the history and theory of such experimental art projects as Mail Art sound and radio art telematic art assemblings and Fluxus Although the projects differed a conceptual questioning of the art object combined with a political undermining of dominant art institutional practices animated most distance art After a section that sets this work in historical and critical perspective the book presents artists and others involved in this art re-viewing their work including experiments in mini FM telerobotics networked psychoanalysis and interactive book construction Finally the book recasts the history of networks from the perspectives of politics aesthetics economics and cross cultural analysis *Damage Control* Kerry Broucher,Russell Ferguson,Dario Gamboni,2013 Timely and wide ranging this volume explores in depth the theme of destruction in international contemporary art While destruction as a theme can be traced throughout art history from the early atomic age it has remained a pervasive and compelling element of contemporary visual culture *Damage Control* features the work of more than 40 international artists working in a range of media painting sculpture photography film installation and performance who have used destruction as a means of responding to their historical moment and as a strategy for inciting spectacle and catharsis as a form of rebellion and protest or as an essential part of re-creation and restoration Including works by such diverse artists as Jean Tinguely Andy Warhol Bruce Conner Yoko Ono Gordon Matta Clark Pipilotti Rist Yoshitomo Nara and Laurel Nakadate the book reaches beyond art to enable a broader understanding of culture and society in the aftermath of World War II under the looming fear of annihilation in the atomic age and in the age of terrorism and other disasters real and imagined Crisis in Representation Steven Blakemore,1997 For Paine Wollstonecraft and Williams the crisis in representation was actually a variety of representational crises That they returned to the paradigms of the past to resolve the crisis signified that they were rewriting the Revolution within the textual space of the tradition they had originally opposed **Sentieri Interrotti** Palazzo Bonaguro (Bassano del Grappa, Italy),2000 This study deals with the more radical movements in art that have flourished since the start of the 1950s and offers a comprehensive document of

those who participated in shaping revolutionary concepts in art *Bibliografia nazionale italiana* ,2000 *L'Informazione bibliografica* ,2001 The Particle and Philosophy in Crisis Anil Rajimwale,2022-10-04 This book is a novel study on the way revolutions in science technology and communication impact philosophy world outlook including Marxism society s future mode of production capitalism socialism dichotomy world economy and trends like postmodernism and post industrialism It also deals with motion of and crisis created by the new concept of the particle on human thought philosophy and worldview We ride the unprecedented scientific and technological revolution STR into the unlighted extra ordinary world of quantum motions Human thought and being are shifting to and gathering speed along the time paradigm rendering dialectics increasingly crucial the book opines Electronic technology quantum discoveries and wave particle duality as a wonder of nature have changed forever the way we look at the world which stands redefined Grounds of philosophy move away creating epistemological crisis as we transit to a post classical world We now look at whole humanity from out in the space and our dialectics and contradictions acquire new meaning This self transcendence can potentially free us of existing acute contradictions Scientific literature and sources have then been creatively used in the book to take up the concepts of matter idea motion time space and dialectics It is therefore a bold attempt to negate the existing philosophy by creatively developing a new scientific world outlook The Making of Grand Paris Theresa Enright,2023-09-19 A critical examination of metropolitan planning in Paris the Grand Paris initiative and the building of today s networked global city In 2007 the French government announced the Grand Paris initiative This ambitious project reimaged the Paris region as integrated balanced global sustainable and prosperous Metropolitan solidarity would unite divided populations a new transportation system the Grand Paris Express would connect the affluent city proper with the low income suburbs streamlined institutions would replace fragmented governance structures Grand Paris is more than a redevelopment plan it is a new paradigm for urbanism In this first English language examination of Grand Paris Theresa Enright offers a critical analysis of the early stages of the project considering whether it can achieve its twin goals of economic competitiveness and equality Enright argues that by orienting the city around growth and marketization Grand Paris reproduces the social and spatial hierarchies it sets out to address For example large expenditures for the Grand Paris Express are made not for the public good but to increase the attractiveness of the region to private investors setting off a real estate boom encouraging gentrification and leaving many residents still unable to get from here to there Enright describes Grand Paris as an example of what she calls grand urbanism large scale planning that relies on infrastructural megaprojects to reconfigure urban regions in pursuit of speculative redevelopment Democracy and equality suffer under processes of grand urbanism Given the logic of commodification on which Grand Paris is based these are likely to suffer as the project moves forward Perceptions and Representations of the Malagasy Environment Across Cultures Frank Muttенzer,Gwyn Campbell,Jacques Pollini,2023-07-13 This book examines the history and impact of environmental change in Madagascar Drawing on interdisciplinary ethnographic methodologies the

book presents local and global perspectives on current environmental changes and their drivers from mining to development and deforestation The book emphasizes the embeddedness of Malagasy peoples social relationships with the natural environment and contrasts this with the way the Malagasy environment is viewed by international conservation organizations Through the presentation of concrete case studies the contributors assess the current controversy over the history and nature of human impact on the environment in Madagascar and offer innovatory insights into how these controversies which plague current policy making can be settled

Nietzsche's Nihilism in Walter Benjamin Mauro Ponzi, 2016-11-21 This book reconstructs the lines of nihilism that Walter Benjamin took from Friedrich Nietzsche that define both his theory of art and the avant garde and his approach to political action It retraces the eccentric route of Benjamin's philosophical discourse in the representation of the modern as a place of permanent catastrophe where he attempts to overcome the Nietzschean nihilism through messianic hope Using conventions from literary criticism this book explores the many sources of Benjamin's thought demonstrating that behind the materialism which Benjamin incorporates into his Theses on the Concept of History is hidden Nietzsche's nihilism Mauro Ponzi analyses how Benjamin's Arcades Project uses figures such as Baudelaire Marx Aragon Proust and Blanqui as allegories to explain many aspects of modernity The author argues that Benjamin uses Baudelaire as a paradigm to emphasize the dark side of the modern era offering us a key to the interpretation of communicative and cultural trends of today

A Pure Theory of Democracy Antonio García-Trevijano, 2009-09-30 This is not a democracy Antonio García Trevijano denounces in the first pages of this book To confront the great lie that Europe does have democratic regimes a lie rooted in people's confounding of the liberties they enjoy with the political freedom that they lack the author builds a realistic theory of democracy to end the false idea that corruption state crime and public immorality are democracy's undesirable products and not the natural and inevitable fruits of oligarchic regimes Thanks to a superb review of the events that mark the history of democracy the author reveals the obstacles that from the 17th century English revolution the United States War of Independence and the French Revolution opposed political freedom deviating old Europe's democratic possibilities toward the current parties state There exist important theories of the state and of constitution but none that can be called a theory of democracy Antonio García Trevijano's original theory a modern synthesis of Rousseau's pure democracy and Montesquieu's political freedom responds to European need for a theory of democracy as a real alternative to the corrupted parties regime that was engendered by Western pragmatism during the Cold War

Critical Pedagogy in the Twenty-First Century Curry Malott, Brad J. Porfilio, 2011-03-01 This book simultaneously provides multiple analyses of critical pedagogy in the twenty first century while showcasing the scholarship of this new generation of critical scholar educators Needless to say the writers herein represent just a small subset of a much larger movement for critical transformation and a more humane less Eurocentric less paternalistic less homophobic less patriarchal less exploitative and less violent world This volume highlights the finding that rigorous critical pedagogical approaches to education while still marginalized in many contexts are being used in increasingly more classrooms for the benefit of student learning contributing however indirectly to the

larger struggle against the barbarism of industrial neoliberal militarized destructiveness The challenge for critical pedagogy in the twenty first century from this point of view includes contributing to the manifestation of a truly global critical pedagogy that is epistemologically democratic and against human suffering and capitalist exploitation These rigorous democratic critical standards for measuring the value of our scholarship including this volume of essays should be the same that we use to critique and transform the larger society in which we live and work

Metaphors of Depth in German Musical Thought Holly Watkins, 2011-09-01 What does it mean to say that music is deeply moving Or that music's aesthetic value derives from its deep structure This study traces the widely employed trope of musical depth to its origins in German language music criticism and analysis From the Romantic aesthetics of E T A Hoffmann to the modernist theories of Arnold Schoenberg metaphors of depth attest to the cross pollination of music with discourses ranging from theology geology and poetics to psychology philosophy and economics The book demonstrates that the persistence of depth metaphors in musicology and music theory today is an outgrowth of their essential role in articulating and transmitting Germanic cultural values While musical depth metaphors have historically served to communicate German nationalist sentiments Watkins shows that an appreciation for the broad connotations of those metaphors opens up exciting new avenues for interpretation
