Towards Economic Inclusion in the Western Balkans William Bartlett, Milica Uvalić, 2022-10-10 The countries in the Western Balkans have been severely affected by the wars and conflicts that led to the breakup of former Yugoslavia by political instability and the effort of creating new states weak economies and high levels of unemployment poverty and social exclusion and inequality As revealed by recent surveys such as EBRD's Life in Transition Survey and Eurofound's European Quality of Life Survey life satisfaction in the region is far below that elsewhere in Europe In recent years they had achieved a strong impetus of economic growth with falling rates of unemployment and increasing optimism for the future However the COVID 19 pandemic of 2020 has brought about a sudden reversal of these trends and a renewed deterioration in the economic outlook and an increase in social hardships that heralds a repeat of past failures in economic inclusion policies This book identifies the key challenges in the areas of economic inclusion focusing on the themes of labour markets vocational education and skills female entrepreneurship and the integration of migrants It considers the opportunities for solutions to build back better once the recovery from the COVID 19 crisis begins and offers proposals for more acceptable equitable and effective economic inclusion policies

State Corporate Control in Transition Piotr Kozarzewski, 2021-10-18 Since the global financial crisis of 2008-2009 there has been a growing interest among policy makers towards the more active role of the state in the enterprise sector. This book provides valuable insight into the changing role of state owned enterprises in economic policy a topic at the cross section of several interrelated but usually independent research streams: first of all transition research varieties of capitalism literature public choice approach and institutionalism studies. With the existing literature on state ownership concentrating on the developed economies and on selected emerging economies this book fills an important gap in focusing on the post communist transition countries. The Polish experience is looked at in a comparative perspective of selected transition countries which deserve special attention as they had to cope with a radical change of their economic policies towards the enterprise sector. This book will be valuable reading for academics in economic policy transition economics and institutional economics and policy makers and

practitioners in EU bodies and emerging economies Handbook of Institutional Approaches to International Business

 Bruce Evan Kaufman Georgia State University US This inspiring Handbook brings together alternative perspectives from a range of disciplines to shed light on the nature of institutions and their relationship to firm level practices and outcomes across a wide range of national settings Expertly written by leading scholars from a range of different starting points this compendium presents a synthesis of recent work relating to institutionally informed accounts from transitional and emerging markets as well as from mature economies It specifically focuses on the linkage between institutions and what goes on inside firms and the relationship between setting strategic choice and systemic outcomes The Handbook is explicitly multi disciplinary encompassing perspectives from a range of the functional areas of management studies It will prove invaluable for postgraduate students and faculty in international business and the wider research community in the areas of international business corporate governance socio economics and comparative HRM **Varieties of Capitalism, Types of Democracy and Globalization** Masanobu Ido, 2012-03-29 This book combines two strands of international political economy examining how capitalism and democracy shape and are shaped by each other Although until now considered separately this path breaking book proposes an innovative view of a political economic system that inextricably links the model of capitalism to the type of democracy where continuation is mutually reinforced Advanced countries have achieved post war affluence by adopting one of two contrasting models of capitalism liberal market economies or coordinated market economies and two opposing types of democracies consensus or majoritarian democracies Expert contributors in the field consider the question of whether and how globalization is transforming the post war political economic systems of advanced countries such as Britain France Germany Italy and Japan as well as the question of how it is shaping democracy and capitalism combinations in former socialist countries in Eastern Europe and the new capitalist China The book examines various topics including party system change a political dilemma of the established party and corporate governance reforms to posit an original an innovative theory of international political economy Variety of Capitalism Types of Democracy and Globalization will be of interest to students and scholars of comparative politics political economy and globalization *Building Business in Post-Communist Russia, Eastern Europe, and Eurasia* Dinissa Duvanov, 2013-02-18 Prior to 1989 the communist countries of Eastern Europe and the USSR lacked genuine employer and industry associations After the collapse of communism industry associations mushroomed throughout the region Duvanov argues that abusive regulatory regimes discourage the formation of business associations and poor regulatory enforcement tends to encourage associational membership growth Academic research often treats special interest groups as vehicles of protectionism and non productive collusion This book challenges

this perspective with evidence of market friendly activities by industry associations and their benign influence on patterns of public governance Careful analysis of cross national quantitative data spanning more than 25 countries and qualitative examination of business associations in Russia Ukraine Kazakhstan and Croatia shows that postcommunist business associations function as substitutes for state and private mechanisms of economic governance These arguments and empirical findings put the long standing issues of economic regulations public goods and collective action in a new theoretical perspective
