Immunological Mechanisms and Therapies in Brain Injuries and Stroke Jun Chen,Xiaoming Hu,Mary Stenzel-Poore,John H. Zhang,2013-11-09 Recent research has revealed the importance of immunological mechanisms and inflammation in delaying damage and or promoting repair after an acute injury to the central nervous system This book provides a comprehensive and up to date overview of the role of immunological mechanisms and therapies for treating acute neurological injuries such as cerebral ischemia hemorrhage and brain and spinal cord trauma In several sections the contributing authors provide a review of immunological mechanisms involved in neurological injury and of various translational and clinical research aimed at harnessing those mechanisms for better patient outcomes **White Matter**

Injury in Stroke and CNS Disease Selva Baltan,S. Thomas Carmichael,Carlos Matute,Guohua Xi,John H Zhang,2013-11-19 White matter injury can result from both ischemic and hemorrhagic stroke as well as a host of other CNS diseases and conditions such as neonatal injuries neurodegenerative disorders including Alzheimer s disease traumatic brain injuries carbon monoxide poisoning and drug or alcohol overdoses The extent of white matter injury is extremely important to patient outcomes Several recent technological developments including advanced neuroimaging and the breeding of new rodent models of white matter injury have provided growing insight into initial damage and repair after a stroke or other damaging event The proposed book will be the first to provide a systematic expert summary of normal white matter morphology as well as white matter injury following stroke and other CNS injuries *Innate Tolerance in the CNS* Jeffrey M. Gidday,Miguel A. Perez-Pinzon,John H. Zhang,2012-09-21 Cerebral preconditioning is a phenomenon wherein a mild insult or stress induces cellular and tissue adaptation or tolerance to a later severe injury therefore reflecting the efficacy of endogenous mechanisms of cerebrovascular protection Initially identified for rapid cardiac protection preconditioning has expanded to all aspects of CNS protection from ischemia trauma and potentially neurodegeneration Many different stimuli or stressors have been identified as preconditioning agents suggesting a downstream convergence of mechanisms and underscoring the potential for translational application of preconditioning in the clinic Moreover the fundamental mechanisms responsible for preconditioning induced tolerance will help in the design novel pharmacological approaches for neuroprotection While stroke and many other brain injuries are not predictable in some populations e g metabolic syndrome patients undergoing carotid endarterectomy aneurysm clipping or with recent TIAs the risk for stroke is identifiable and significant and preconditioning may represent a useful strategy for neuroprotection For unpredictable injuries post conditioning the brain or inducing endogenous protective mechanisms after the initial injury can also abrogate the extent of injury Finally remote pre and post conditioning methods have been developed in animals and are now being tested in clinical trials wherein a brief noninjurious stress to a noncerebral tissue i e skeletal muscle can provide protection to the CNS and thereby allows clinicians the opportunity to circumvent concerns regarding the direct preconditioning of neurological tissues Cellular Therapy for Stroke and CNS Injuries Li-Ru Zhao,John H. Zhang,2014-11-24 Cellular therapy for stroke and neural trauma has gained worldwide attention during the last decade and has shown some promising results Various cells including neural stem cells bone marrow stem cells endothelial progenitor cells and many others have had protective or regenerative effects in animal models The proposed book will address recent research on all relevant cell types In addition it will provide information on cell isolation and culture skills transplantation methods and neurological functional evaluations This is the first book to focus on cellular therapy for stroke and other CNS injuries Neural Mechanism and Effect of Acupuncture for Central Nervous System Diseases Guanhu Yang,Cunzhi Liu ,Xiang-Hong Jing,Weixing Pan ,Qinhong Zhang,2024-05-07 Central nervous system CNS diseases such as stroke Parkinson s disease vascular dementia Alzheimer s disease multiple sclerosis bulbar palsy spinal

cord injury traumatic brain injury brain tumor cerebral palsy headache migraine epilepsy depression anxiety etc involve complex neural mechanism and seriously affect quality of life and threaten life safety in patients with these disorders Multiple neural techniques such as functional magnetic resonance imaging positron emission tomography electroencephalography etc provide powerful tools for uncovering complex networks of neural mechanism and exploring key potential biomarkers to reveal the underlying neural feature of those disorders *Advances in Central Nervous System Research and Treatment: 2013 Edition*, 2013-06-21 Advances in Central Nervous System Research and Treatment 2013 Edition is a ScholarlyEditions book that delivers timely authoritative and comprehensive information about Meninges The editors have built Advances in Central Nervous System Research and Treatment 2013 Edition on the vast information databases of ScholarlyNews You can expect the information about Meninges in this book to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Advances in Central Nervous System Research and Treatment 2013 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>
