The Philosophical Ethology of Roberto Marchesini Jeffrey Bussolini, Brett Buchanan, Matthew Chrulew, 2018-10-19 Roberto Marchesini is an Italian philosopher and ethologist whose work is significant for the rethinking of animality and human animal relations Throughout such important books as *Il dio Pan* 1988 *Il concetto di soglia* 1996 *Post human* 2002 *Intelligenze plurime* 2008 *Epifania animale* 2014 and *Etologia filosofica*

2016 he offers a scathing critique of reductive mechanistic models of animal behaviour as well as a positive contribution to zooanthropological and phenomenological methods for understanding animal life Centred on the dynamic and performative field of interactions and relations in the world his critical and speculative approach to the cognitive life sciences offers a vision of animals as acting subjects and bearers of culture whose action and agency is also indispensable to human culture In tracing the ways in which we share our lives and histories with animals in different contexts of interaction Marchesini's cutting edge philosophical ethology also contributes to an overarching philosophical anthropology of the human as the animal that most requires the presence and input of other animals This book was originally published as a special issue of Angelaki Journal of the Theoretical Humanities

Social Fabrics of the Mind Michael Chance, 2015-06-19 Originally published in 1988 this book outlines a new evolutionary paradigm for understanding human society and mental structure originating from the editor's work in primate ethology It is supported and further elaborated by the contributors Chance argues that two modes of social interaction the agonistic and hedonic underlie social life and corresponding mentality In the agonistic mode we are concerned with self security and our attention is much taken up with being accepted by a group This mode is based on a recently discovered state of inhibited braked mental arousal Social behaviour is either authoritarian or authority subservient and has a tendency to control or be controlled It curbs intelligence and restricts personality development In the hedonic mode we are freer to form a network of personal relationships that are typically mutually supportive The hedonic mode leads to the development of self confidence and a relaxed empathic and collaborative personality with intelligence enhanced The volume will still be of interest to all concerned with human affairs including those working in ethology primatology anthropology social psychology psychiatry and political sociology
