The Task-centred Book Peter Marsh, Mark Doel, 2005 Peter Marsh and Mark Doel's new book is a radical departure from traditional literature on social work methods. The main reference point is the voice of practitioners, service users and carers as researched and developed by the authors over twenty years. **The Task-Centred Book** Peter Marsh, Mark Doel, 2005-05-01 Task centred social work is one of the best known and most strongly supported approaches to social work practice. This text is a radical departure from traditional literature on social work methods. The main reference point is the voice of practitioners, service users and carers as researched and developed by the authors over twenty years. Case studies are used throughout the book to build on the experiences of practitioners and the people with whom they have worked demonstrating practical skills for study and analysis, teaching and learning, practicing task centred social work review and continuing development. The Task Centred Book is a core text for both undergraduate social work courses and continuing professional development training as well as being a practical book for the active professional which will support the development and implementation of task centred practice. **Task-centered Social Work** Mark Doel, Peter E. Marsh, 1992

Generalist Practice Eleanor Reardon Tolson, William James Reid, Charles D. Garvin, 2003 This basic textbook seeks to establish a task centered methodology, a structured short term problem solving approach applicable across systems at five levels of practice: the individual, the family, the group, organizations and communities. The second edition offers more information on systems theories and includes case studies with each chapter. Checklists are provided for each level of practice along with questions for consideration and practice exercises to help students monitor their understanding and skill development. *Handbook for Practice Learning in Social Work and Social Care* Joyce Lishman, 2007-05-15 This substantially revised, expanded and updated edition of the popular Handbook of Theory for Practice Teachers is a comprehensive summary of the theory, knowledge, research and evidence relating to practice learning in social care, focussing on knowledge based practice with a focus on improving outcomes. *Problems, Tasks and Outcomes* E. Matilda Goldberg, Jane Gibbons, Ian Sinclair, 2021-11-07 In the 1980s, although most social workers organised their time and described their work in terms of cases, research studies had cast serious doubts on the efficacy of working in this way. As a result, there had been growing anxiety about what social workers do, what they ought to do and the training they needed. Task centred casework was an approach to social work which proposed a solution to some aspects of this dilemma. Growing out of the surprising results of an American research study, it broke free from the traditional psycho-analytic approach to casework. It aimed at clarity of purpose, a concentration on the clients' perceptions of the problems, openness about clients and helpers' intentions and agreement about what is to be done and achieved within a specified time. Originally published in 1985, this book brings together three British studies that accompanied and in some respects pioneered the introduction of task centred casework into the United Kingdom. The studies describe and evaluate task centred casework with social services department

clients with young people on probation and with men and women referred to hospital after poisoning themselves The research suggests what task centred casework can and cannot achieve describes how clients experience it and seeks to define the skills it requires The studies also provide some reasons why many previous studies of social work have failed to find evidence for social work effectiveness The book uses much case material to illustrate methods of task centred casework and its outcomes as seen by clients social workers and an independent outsider It should still be of interest to social workers teachers of social work and social work students More generally it will be welcomed by all those who are interested in building social work on a surer basis than anecdote and fashion
