Translating Poetic Discourse Translating Poetic Discourse:

Translating Poetic Discourse Myriam Díaz-Diocaretz, 1985-01-01 Translating Poetic Discourse argues in favor of a critical model that bridges between translation and women's studies on theoretical and practical levels. It proposes key elements to be integrated into the problem of interpretation of contemporary poetry by women and discusses the links between gender markers and the speech situation in feminist discourse as a systematic problem. This book will be of interest to scholars of Translation Studies, Women's Studies, Poetry, Comparative Literature and Discourse. **Translating Rumi into the West** Amir Sedaghat, 2023-02-28 Focusing on Rumi, the best-selling Persian mystical poet of the 13th century, this book investigates the reception of his work and thought in North America and Europe and the phenomenon of Rumimania to elucidate the complexities of intercultural communication between the West and the Iranian and Islamic worlds. Presenting tens of examples from the original and translated texts, the book is a critical analysis of various dimensions of this reception, outlining the difficulties of translating the text but also exploring how translators of various times and languages have performed and explaining why the quality of reception varies. Topics analysed include the linguistic and pragmatic issues of translation, comparative stylistics and poetics, and non-textual factors like the translator's beliefs and the political and ideological aspects of translation. Using a broad theoretical framework, the author highlights the difficulties of intercultural communication from linguistic, semiotic, stylistic, poetic, ethical, and sociocultural perspectives. Ultimately, the author shares his reflections on the semiotic specificities of Rumi's mystical discourse and the ethics of translation generally. The book will be valuable to scholars and students of Islamic philosophy, Iranian studies, and translation studies but will appeal to anyone interested in the cultural dichotomies of the West and Islam. **Encyclopedia of Feminist Literary Theory** Elizabeth Kowaleski-Wallace, 2009-03-23 From the cutting edge to the basics, the latest advances as well as the essentials of feminist literary theory are at your fingertips as soon as you open this brand-new reference work. Translation and Minority Lawrence Venuti, 2016-04-29. The premise of this volume is a question: What can the concept of minority bring to the practice and study of translation? Minority is understood here to mean a cultural or political position that is subordinate, whether the social context that so defines it is local, national, or global. This position is occupied by languages and literatures that lack prestige or authority, the non-standard and the non-canonical, what is not spoken or read much by a hegemonic culture. Yet minorities also include the nations and social groups that are affiliated with these languages and literatures, the politically weak or underrepresented, the colonized and the disenfranchised, the exploited and the stigmatized. Translation today is itself a minor use of language, a lesser art, an invisible craft that commands less cultural capital and fewer legal privileges than original composition. Yet the focus in this collection is not on what translators worldwide have in common, but on the distinctive forms that translating takes when it is done by or on behalf of minorities. The articles in this volume present a variety of case studies that illuminate the linguistic and cultural problems posed by such translating, as well as the economic and political agendas it has served. Together, these pieces show that the concept of minority is worth exploring because it inspires innovation in translation practice and research. Minor cultures are coincident with new translation strategies, new translation theories, and new syntheses of the diverse methodologies that constitute the discipline of translation studies.

Translation Studies Susan Bassnett, 2013-10-30. At a time when millions travel around the planet, some by choice, some driven by economic or political exile, translation of the written and spoken word is of ever-increasing importance. This guide presents readers with an accessible and engaging introduction to the valuable position translation holds within literature and society. Leading translation theorist Susan Bassnett traces the history of translation, examining the ways translation is currently utilized as a burgeoning interdisciplinary activity and extending her analysis into developing areas such as developing technologies and new media forms. *Translation Studies*, fourth edition, displays the importance of translation across disciplines and is essential reading for students and scholars of translation, literary studies, globalisation studies, and ancient and modern languages.

The Translator-Centered Multidisciplinary Construction Lin Zhu, 2012. This book embraces the epistemological and methodological issues of theoretical construction in the field of Translation Studies from a historical and global perspective. The theoretical stances are explained in detail through a systemic inquiry into the constructive aspects of theoretical innovation of the American translation theorist Douglas Robinson. In order to renew and promote theoretical thinking in the field of Translation Studies, this book aims to reflect on existing theoretical problems in translation, trace the

translation theorist's innovative and constructive ways of thinking about translation theory and explore productive philosophical and theoretical resources of translation studies This book will not only be helpful to a further and full understanding of Robinson's thoughts on translation but also offers a rethinking of how to advance Translation Studies epistemologically and methodologically

From World To World: An Armamentarium Cees Koster, 2021-11-15 In this book one of the old traditions of translation studies is revived the tradition of the comparative study of translation and original The aim of the author is to develop an armamentarium a set of analytical instruments and a procedure for the systematic study of poetic discourse in translation The armamentarium provides the means to describe the translational interpretation that is the interpretation of the original as it emerges from the translation and may be constructed in the course of a comparison between the two texts The practical result of this study is based on a solid theoretical foundation This study most of all reflects on the possibilities of translation comparison and description per se It is one of the few books in which an in depth study is undertaken into the principles of translation comparison itself into its limits and possibilities and

into its central concepts shift unit of comparison etcetera Before presenting his own proposal for a comparative procedure the author critically evaluates several existing methods particularly those of Toury Van Leuven Zwart and the German transfer oriented approach The theoretical considerations in this book are amply illustrated by analyses of translated works of poets as Rutger Kopland and Robert Lowell The book also contains an extensive case study into the translations by the German poet Paul Celan of a selection of William Shakespeare s sonnets *What is Translation?* Douglas Robinson, 1997 An investigation into the state of translation studies which looks ahead at the direction in which the author sees the field moving Included are reviews of the work of translation theorists A volume in a series which aims to present a broad spectrum of thinking on translation
