Urban Public Space Facing The Challenges Of Mobility And Aestheticization:

Urban Public Space Oleg Pachenkov, 2013 Urban public space continues to be the focus of debate regarding its conceptualisation and how it is designed re produced and managed In this book nine authors with social science and artistic backgrounds discuss how these processes shape the life of modern cities and where the social sciences should move for a better understanding of them *Walking in the European City* Timothy Shortell, Evrick Brown, 2016-02-24 Sociologists have long noted that dynamism is an essential part of the urban way of life However walking as a significant social activity and crucial research method in spite of its ubiquity as part of urban life has often been overlooked This volume considers walking in the city from a variety of perspectives in a variety of places and with a variety of methods to engage with the question of how walking can contribute to the sociological imagination and reveal sociological knowledge Bringing together new research on sites across Europe *Walking in the European City* addresses the nature of everyday mobility in contemporary urban settings shedding light not only on the ways in which walking relates to other social institutions and practices but also as a method for studying urban life With attention to intersections of race and ethnicity gender and class as well as the manner in which processes of gentrification transform urban space this book examines questions of access to public places exploring the ways in which urban dwellers use of and relation to neighbourhood spaces are shaped by inequalities of status and power As such it will appeal to scholars of sociology geography and anthropology with interests in urban studies mobility and research methods **Real Talk: Reality Television and Discourse Analysis in Action** Pilar Garces-Conejos Blitvich, 2015-12-26 This is the first book to examine the discourse of reality television Chapters provide rigorous case studies of the discourse practices that characterise a wide range of generic and linguistic cultural contexts including dating shows in China and Spain docudramas in Argentina and New Zealand and talent shows in the UK and USA Waste Works Brenda Chalfin, 2023-03-06 In *Waste Works* Brenda Chalfin examines Ghana s planned city of Tema theorizing about the formative role of waste infrastructure in urban politics and public life Chalfin argues that at Tema s midcentury founding a prime objective of governing authorities was to cultivate self contained citizens by means of tightly orchestrated domestic infrastructure and centralized control of bodily excrement to both develop and depoliticize the new nation Comparing infrastructural innovations across the city Chalfin excavates how Tema residents pursue novel approaches to urban waste and sanitation built on the ruins of the inherited order profoundly altering the urban public sphere Once decreed a private matter to be guaranteed by state authorities excrement becomes a public issue collectively managed by private persons Pushing self care into public space and extending domestic responsibility for public well being and bodily outputs popularly devised waste infrastructures are a decisive arena to make claims build coalitions and cultivate status Confounding high modernist ideals excremental infrastructures unlock bodily waste s diverse political potentials *Public Space and the Challenges of Urban Transformation in Europe* Ali Madanipour, Sabine Knierbein, Aglaée Degros, 2013-11-20 European cities

are changing rapidly in part due to the process of de industrialization European integration and economic globalization Within those cities public spaces are the meeting place of politics and culture social and individual territories instrumental and expressive concerns Public Space and the Challenges of Urban Transformation in Europe investigates how European city authorities understand and deal with their public spaces how this interacts with market forces social norms and cultural expectations whether and how this relates to the needs and experiences of their citizens exploring new strategies and innovative practices for strengthening public spaces and urban culture These questions are explored by looking at 13 case studies from across Europe written by active scholars in the area of public space and organized in three parts strategies plans and policies multiple roles of public space and everyday life in the city This book is essential reading for students and scholars interested in the design and development of public space The European case studies provide interesting examples and comparisons of how cities deal with their public space and issues of space and society

Volume 3: Public Space and Mobility Rianne van Melik, Pierre Filion, Brian Doucet, 2021-07-22 COVID 19 is an invisible threat that has hugely impacted cities and their inhabitants Yet its impact is very visible perhaps most so in urban public spaces and spaces of mobility This international volume explores the transformations of public space and public transport in response to COVID 19 across the world both those resulting from official governmental regulations and from everyday practices of urban citizens The contributors discuss how the virus made urban inequalities sharper and clearer and redefined public spaces in the new normal Offering crucial insights for reforming cities to be more resilient to future crises this is an invaluable resource for scholars and policy makers alike

Public Space and Relational Perspectives Chiara Tornaghi, Sabine Knierbein, 2014-12-05 Traditional approaches to understand space tend to view public space mainly as a shell or container focussing on its morphological structures and functional uses That way its ever changing meanings contested or challenged uses have been largely ignored as well as the contextual and on going dynamics between social actors their cultures and struggles The key role of space in enabling spatial opportunities for social action the fluidity of its social meaning and the changing degree of publicness of a space remain unexplored fields of academic inquiry and professional practice Public Space and Relational Perspectives offers a different understanding of public spaces in the city The aim of the book is to re introduce the lived experiences in public life into the teaching curricula of those academic disciplines which deal with public space and the built environment such as architecture planning and urban design as well as the social sciences The book presents conceptual practical and research challenges and brings together findings from activists practitioners and theorists The editors provide eight educational challenges that educators can endorse when training future practitioners and researchers to accept and to engage with the social relations that unfold in and through public space Cover image KARO

Brief van Martien Beversluis (1894-1966) aan Bernard Alexander Canter (1871-1956) ,1923 **Convivial Urban Spaces** Henry Shaftoe,2012 Despite developments in urban design during the last few decades architects urban planners and designers often continue to produce areas of bland commercially led urban fabric that deliver the basic functional requirements of shelter work and leisure but are socially unsustainable and likely generators of future problems Convivial Urban Spaces demonstrates that successful urban public spaces are an essential part of a sustainable built environment Without them we are likely to drift into an increasingly private and polarized society with all the problems that would imply Taking a multidisciplinary approach this book draws on research and the literature and theory of environmental psychology and urban design to advance our understanding of what makes effective public spaces Practical guidance is illustrated with case studies from the UK Spain Germany and Italy The result is a practical and clearly presented guide to urban public space for planners architects and students of the urban environment
