Laboratory Epistemologies Jenny Boulboulle, 2024-10-11 In Laboratory Epistemologies A Hands On Perspective Jenny Boulboulle examines the significance of hands on experiences in contemporary life sciences laboratories

Addressing the relationship between contemplation and manipulation in epistemology Boulboul combines participant observations in molecular genetics labs and microbiological cleanrooms with a longue dur e study of the history and philosophy of science She radically rereads Descartes s key epistemological text Meditations on First Philosophy reframing the philosopher as a hands on knowledge maker With this reading Boulboul subverts the pervasive modern conception of the disembodied knower and puts the hands on experimenter at the heart of life sciences research In so doing she contributes a theoretical model for understanding how life processes on cellular and molecular levels are manually produced in today s techno scientific spaces By reassessing the Cartesian legacy and arguing that epistemology should be grounded in the standpoint of a hands on practitioner Boulboul offers the philosophical and historical foundation to understand and study contemporary life sciences research as multisensory embodied practices

A Stakeholder Approach to Managing Food Adam Lindgreen,Martin K. Hingley,Robert J. Angell,Juliet Memery,2016-08-05 This research anthology explores the concept of food production and supply from farm gate to plate bringing together contemporary thinking and research on local national and global issues from a stakeholder perspective A Stakeholder Approach to Managing Food includes a number of sections to represent these challenges opportunities conflicts and cohesions affecting relevant stakeholder groups within food production and supply and their reaction to engagement with and co creation of the food environment For some local national and global interests may seem at odds We are in an era of growing and pervasive multi national corporations and these corporations have significant influence at all levels Rapidly growing economies such as China are a focus for the global brand but is this a scenario of adaptation or homogenization of food Alongside this trend toward national and global development in food this volume presents the counter reaction that is taking place especially in developed countries toward local speciality and culturally bound foods with emphasis on the importance of the inter connection of local communities and agri food culture and economy With an in depth analysis of agricultural businesses this book shows that the entrepreneurial spirit is alive and well in rural communities with often renewed and engaged connection with consumers and imaginative use of new media This book will be of interest to students researchers and policy makers concerned with agriculture food production and economics cultural studies

Clean Nordic Oceans main report - a network to reduce marine litter and ghost fishing Langedal, Gjermund,Aarbakke, Bård,Larsen, Finn,Stadig, Charlotta,2020-03-25 Available online <https://pub.norden.org/temanord2020/509/Abstract/en> Clean Nordic Oceans was established as a network to exchange knowledge and experience of methods and measures that can reduce the risk of ghost fishing and marine litter and increase proper disposal and recycling of commercial and recreational fishing gear All Nordic countries have participated in the network Through a dedicated website www.cnogear.org workshops seminars conferences films and social media this project has helped to establish contacts both inside and outside the Nordic region which can help reduce the challenges of marine litter from fishing activities Among the numerous important findings that have been made over the course of the project the report points out that fishermen in all the Nordic countries lack sufficient awareness of how they can and should contribute to a cleaner ocean The report proposes a number of possible measures Some of the measures may be suitable for all countries but in general there is no one size fits all solution

Understanding Non-State Actors Eran Zohar,2023-10-24 Understanding Non State Actors aims to reduce the scarcity of academic literature on armed non state actors NSAs that have always been a part of

world politics and wars This monograph offers possibly for the first time a systematic historical review as well as a substantive theory of NSAs and their arming efforts The world has been astonished by the ability of the well armed Hamas to inflict heavy losses on the powerful Israel Thus from the Jewish rebellion against Rome to the war between the Ukrainian separatists and the Ukrainian government NSAs weapons acquisition has been vital for the build up of their force enabling both the employment of that force and its sustainability While weapons are not necessarily the most important factor in military build up NSAs need weapons to fight and revolts usually erupt after the organizers have acquired a certain number of weapons Conversely many revolts lose momentum and operations are not carried out or turn ineffective due to shortages of arms and ammunition A major theme of this monograph is that in spite of dramatic political and technological changes armed NSAs in different periods have employed similar methods to acquire weapons Self production looting and stealing external support and the arms trade were always the major ways for NSAs to acquire weapons though the importance of each method and the type of arms has changed remarkably over time Understanding Non State Actors discusses the factors political social cultural technological and organizational that have both facilitated and constrained the ability of NSAs to acquire arms Especially lecturers and students of Military Terrorism Conflict studies War and peace studies will benefit from this study
