Trier Stadt Mittelalter Medieval City:

The Later Medieval City David Nicholas, 2014-06-17 The Later Medieval City 1300 1500 the second part of David Nicholas's ambitious two volume study of cities and city life in the Middle Ages fully lives up to its splendid precursor *The Growth of the Medieval City* Like that volume it is fully self sufficient though many readers will want to use the two as a continuum This book covers a much shorter period than the first That traced the rise of the medieval European city system from late Antiquity to the early fourteenth century this offers a portrait of the fully developed late medieval city in all its richness and complexity David Nicholas begins with the economic and demographic realignments of the last two medieval centuries These fostered urban growth raising living standards and increasing demand for a growing range of urban manufactures The hunger for imports and a shortage of coin led to sophisticated credit mechanisms that could only function through large cities But if these changes brought new opportunities to the wealthy they also created a growing problem of urban poverty violence became endemic in the later medieval city Moreover although more rebellions were sparked by taxes than by class conflict class divisions were deepening Most cities came to be governed by councils chosen from guild members and most guilds were dominated by merchants The landowning elite that had dominated the early medieval cities of the first volume still retained its prestige but its wealth was outstripped by the richer merchants while craftsmen who had little political influence were further disadvantaged as access to the guilds became more restricted The later medieval cities developed permanent bureaucracies providing a huge range of public services and they were paid for by sophisticated systems of taxation and public borrowing The survival of their fuller richer records allow us not only to apply a more statistical approach but also to get much closer to the splendours and squalors of everyday city life than was possible in the earlier volume The book concludes with a set of vibrant chapters on women and children and religious minorities in the city on education and culture and on the tenor of ordinary urban existence Like its predecessor this book is massively and vividly documented Its approach is interdisciplinary and comparative and its examples and case studies are drawn from across Europe from France England Germany the Low Countries Iberia and Italy with briefer reviews of the urban experience elsewhere from Baltic to Balkans The result is the most wide ranging and up to date study of its multifaceted subject It is a formidable achievement

The Growth of the Medieval City David M Nicholas, 2014-06-17 The first part of David Nicholas's massive two volume study of the medieval city this book is a major achievement in its own right It is also fully self sufficient though many readers will want to use it with its equally impressive sequel which is being published simultaneously In it Professor Nicholas traces the slow regeneration of urban life in the early medieval period showing where and how an urban tradition had survived from late antiquity and when and why new urban communities began to form where there was no such continuity He charts the different types and functions of the medieval city its interdependence with the surrounding countryside and its often fraught relations with secular authority The book ends with the critical changes of the late

thirteenth century that established an urban network that was strong enough to survive the plagues famines and wars of the fourteenth and fifteenth centuries

Medieval Germany John M. Jeep, 2001 An encyclopedia covering the political social intellectual religious and cultural history of the German and Dutch speaking medieval world between 500 and 1500 Entries cover individuals and their deeds as well as broader historical topics

Lords and Towns in Medieval Europe Howard B. Clarke, Annegret Simms, 2017-07-14 This volume is based on possibly the biggest single Europe wide project in urban history In 1955 the International Commission for the History of Towns established the European historic towns atlas project in accordance with a common scheme in order to encourage comparative urban studies Although advances in urban archaeology since the 1960s have highlighted the problematic relationship between the oldest extant town plan and the actual origins of a town the large scale cadastral maps as they have been made available by the European historic towns atlas project are still necessary if we want to understand the evolution of the physical form of our towns By 2014 the project consisted of over 500 individual publications from over 18 different countries across Europe Each atlas comprises at least a core map at the scale of 1:2500 analytical maps and an explanatory text The time has come to use this enormous database that has been compiled over the last 40 years This volume itself based on a conference related to this topic that was held in the Royal Irish Academy in Dublin in 2006 takes up this challenge The focus of the volume is on the question of how seigneurial power influenced the creation of towns in medieval Europe and of how this process in turn influenced urban form Part I of the volume addresses two major issues the history of the use of town plans in urban research and the methodological challenges of comparative urban history Parts II and III constitute the core of the book focusing on the dynamic relationship between lordship and town planning in the core area of medieval Europe and on the periphery In Part IV the symbolic meaning of town plans for medieval people is discussed Part V consists of critical contributions by an archaeologist an art historian and an historical geographer By presenting case studies by leading researchers from different European countries this volume combines findings that were hitherto not available in English A comparison of the English and German bibliographies attached to this volume reveals some interesting insights as to how the focus of research shifted over time The book also shows how work on urban topography integrates the approaches of the historian archaeologist and historical geographer The narrative of medieval urbanization becomes enriched and the volume is a genuine contribution to European studies

The Later Medieval City, 1300-1500 David Nicholas, 1997 That traced the rise of the medieval European city system from late antiquity to the early fourteenth century this offers a portrait of the fully developed later medieval city in all its richness and complexity

The Imperial City of Cologne Joseph Huffman, 2025-10-01 The Imperial City of Cologne From Roman Colony to Medieval Metropolis 19 B C 1125 A D is an urban history of Cologne from its imperial Roman origins as a northeastern frontier military outpost to a medieval metropolis on the German Empire's northwestern border This first history of Cologne available in English challenges received notions of late Roman ethnic identities a Dark Age collapse of
