Violence And The Prevention Of Violence Violence And The Prevention Of Violence:

Preventing Violence in America Robert L. Hampton, Pamela Jenkins, Thomas P. Gullotta, 1996 What can be done to address the problem of violence in society The contributors to this volume both scholars and practitioners examine this question by exploring the history of violence together with theoretical explanations The book discusses such issues as the disproportionate presence of violence within North American minority populations the concept of psychological resiliency how spirituality may serve as a protective factor and the role of television in promoting violence The contributors also address prevention and intervention strategies among gangs of young people and the implementation of special programmes in schools

Family Violence Robert L. Hampton, 1999 Completely rewritten to reflect recent research into family and intimate violence this Second Edition of Family Violence explores the subject from its origins to assessment and treatment The revision offers a summary of some of the best current scholarship conducted by family researchers **Oxford**

Textbook of Violence Prevention Peter D. Donnelly, Catherine L. Ward, 2014-11-27 Violence has always been and is to this day a primary cause of tension and suffering the world over More than half a million people are murdered each year around the world making homicide the leading cause of death among people aged 15 44 The Oxford Textbook of Violence Prevention brings together an international team of experts to provide an extensive global account of the mortality and morbidity burden caused by violence It does this by examining the causes of violence and what can be done to prevent and reduce violence Divided into six sections the textbook analyses how a public health approach can help to prevent violence This multidisciplinary book tackles interpersonal violence in all its forms Early chapters describe epidemiology and consequences followed by chapters that present the current state of the evidence in interventions Policies for violence reduction are discussed and finally recommendations are made for researchers practitioners and policy makers The Oxford Textbook of Violence Prevention is an essential resource for anyone involved in seeking to reduce the role of violence in modern society The print edition is complimented with 12 months free access to the online version Featuring the full comprehensive and authoritative text of the book the online edition has the added convenience and flexibility of an online resource and is available on oxfordmedicine.com

Preventing Violence Against Women and Children Institute of Medicine, Board on Global Health, Forum on Global Violence Prevention, 2011-09-12 Violence against women and children is a serious public health concern with costs at multiple levels of society Although violence is a threat to everyone women and children are particularly susceptible to victimization because they often have fewer rights or lack appropriate means of protection In some societies certain types of violence are deemed socially or legally acceptable thereby contributing further to the risk to women and children In the past decade research has documented the growing magnitude of such violence but gaps in the data still remain Victims of violence of any type fear stigmatization or societal condemnation and thus often hesitate to report crimes The issue is compounded by the fact that for women and children the perpetrators are often people they know and because

some countries lack laws or regulations protecting victims Some of the data that have been collected suggest that rates of violence against women range from 15 to 71 percent in some countries and that rates of violence against children top 80 percent These data demonstrate that violence poses a high burden on global health and that violence against women and children is common and universal Preventing Violence Against Women and Children focuses on these elements of the cycle as they relate to interrupting this transmission of violence Intervention strategies include preventing violence before it starts as well as preventing recurrence preventing adverse effects such as trauma or the consequences of trauma and preventing the spread of violence to the next generation or social level Successful strategies consider the context of the violence such as family school community national or regional settings in order to determine the best programs **Preventing Violence**

John R. Lutzker, 2006 Annotation This is the only book available that offers current data based analyses from leaders in violence prevention with a strong scientific perspective Contributors examine a range of violence that occurs in our culture including child maltreatment youth violence intimate partner violence and suicide They often draw on large scale studies conducted by the government in their discussions of approaches to violence prevention Violence is a serious public health problem that can be prevented and this book offers methods to accomplish that goal through programs at all levels of society from school based interventions to changes in government policy Primary Prevention of Violence Higher Education Center for Alcohol, Drug Abuse, and Violence Prevention (ED), 2010 Violence is a serious problem on college campuses The literature on primary prevention of violence does not call for the adoption of specific programs or policies but rather suggests a paradigm shift in the way practitioners approach violence Primary prevention means asking the question Why is violence happening in the first place in order to identify and change the underlying conditions that lead to violence A number of factors contribute to violent incidents at the peer institutional community and policy levels in addition to individual factors According to the WHO these factors can then be addressed with targeted interventions across these levels simultaneously Understanding local factors that contribute to violent incidents is critical to inform program development because the specific factors that lead to violence may differ by type of violence and context While much of the dialogue about primary violence prevention has occurred in the research on community violence prevention efforts those who focus on campus violence prevention can benefit from this work This primary violence prevention concept already has begun to make its way into campus prevention One example is the American College Health Association's 2008 publication Shifting the Paradigm Primary Prevention of Sexual Violence a toolkit that encourages the adoption of comprehensive primary prevention efforts that employ a combination of strategies to address multiple contributing factors These factors include knowledge and attitudes that support violence skills to intervene in violence and its precursors norms and policy and enforcement approaches to convey community standards Contains 1 resource **Communications and Technology for Violence**
