Beyond Public Engagement Pedro Ruiz-Castell, 2015-02-05 University collections have unquestionably played a central role in the production of knowledge. They are valuable resources for studying the construction of traditions and identities, proving particularly interesting for understanding how universities have shaped societies. Furthermore, they have also been mobilised as cultural mediators to legitimise academic institutions and bring the results of their activities into the public sphere. As such, academic collections undoubtedly enable reflection on the complex relationships between heritage knowledge, scholars and the public. Given their importance, the development of successful strategies in terms of public engagement has recently become a major concern for those working with these academic collections. However, the complexity of university heritage encompasses a diversity of issues that are connected with more than just the public sphere. This volume discusses some of the problems, challenges and opportunities of academic heritage beyond the mere concern for engaging with the public.
