The Use of Hereford William Smith, 2017-05-15 The Use of Hereford a local variation of the Roman rite was one of the diocesan liturgies of medieval England before their abolition and replacement by the Book of Common Prayer in 1549 Unlike the widespread Use of Sarum the Use of Hereford was confined principally to its diocese which helped to maintain its individuality until the Reformation This study seeks to catalogue and evaluate all the known surviving sources

of the Use of Hereford with particular reference to the missals and gradual which so far have received little attention In addition to these a variety of other material has been examined including a number of little known or unknown important fragments of early Hereford service books dismembered at the Reformation and now hidden away as binding or other scrap in libraries and record offices This is the fullest examination of Hereford liturgical sources ever undertaken and may stimulate similar and much needed studies of other diocesan uses in particular Sarum and York As well as describing in detail the various manuscript sources the rare single edition printed Hereford texts the missals and breviaries are also discussed Unlike books of the Sarum and York rites these one offs were never revised and reissued In addition to the examination of these sources William Smith discusses the possible origins of the rite and provides an analysis of the Hereford liturgical calendar of the festa including those of the cathedral s patron St Ethelbert and the no less famous St Thomas Cantilupe that helped to make Hereford use so distinctive

Medieval Disability Sourcebook Cameron Hunt McNabb, 2020

The field of disability studies significantly contributes to contemporary discussions of the marginalization of and social justice for individuals with disabilities However what of disability in the past The *Medieval Disability Sourcebook* Western Europe explores what medieval texts have to say about disability both in their own time and for the present This interdisciplinary volume on medieval Europe combines historical records medical texts and religious accounts of saints lives and miracles as well as poetry prose drama and manuscript images to demonstrate the varied and complicated attitudes medieval societies had about disability Far from recording any monolithic understanding of disability in the Middle Ages these contributions present a striking range of voices to from and about those with disabilities and such diversity only confirms how disability permeated and permeates every aspect of life The *Medieval Disability Sourcebook* is designed for use inside the undergraduate or graduate classroom or by scholars interested in learning more about medieval Europe as it intersects with the field of disability studies Most texts are presented in modern English though some are preserved in Middle English and many are given in side by side translations for greater study Each entry is prefaced with an academic introduction to disability within the text as well as a bibliography for further study This sourcebook is the first in a proposed series focusing on disability in a wide range of premodern cultures histories and geographies
