Virus Diseases of Tropical and Subtropical Crops, 2015 Sustainable Crop Disease Management using Natural Products Sangeetha Ganesan, Kurucheve Vadivel, Jayaraj Jayaraman, 2015-11-16 Alternative methods of disease control such as natural products and compounds derived from biological origins provide an effective alternate to the use of chemical products or a means to minimize their use. It is imperative now to look for such sustainable crop disease management approaches that include routine and alternative methods. Natural products for sustainable crop disease management is an effort in this direction and deals with immediate concerns in the field of natural and alternative products for disease control apart from using biocontrol organisms. This book presents up to date information on natural products and compounds derived from biological origins and thoroughly discusses their applicability, field use and prospects for adoption under different cropping conditions. This book also validates disease management strategies. Virus Diseases of Tropical and Subtropical Crops Paula Tennant, Gustavo A Fermin M, 2015-12-17 This book describes interactions of plant viruses with hosts and transmission vectors in an agricultural context. Starting with an overview of virus biology, economics and management, chapters then address economically significant plant diseases of tropical and subtropical crops. For each disease, symptoms, distribution, economic impact, causative virus, taxonomy, host range, transmission, diagnostic methods and management strategies are discussed. **Nematode Diseases of Crops and Their Sustainable Management** Mujeeb Rahman Khan, Marisol Quintanilla, 2023-04-19 Nematode Diseases of Crops and their Sustainable Management focuses on methods to recognize and identify nematode attackers in agriculturally important crops, offering ecologically sustainable and economically viable strategies and measures for the management of nematode infestations and diseases. The book analyzes nematode pests as major constraints in global crop production and explores the limitations of existing nematode management technologies. It offers comprehensive information through individually focused chapters on major nematode problems in internationally important food, fiber and beverage crops as well as in mushrooms, polyhouse agriculture and forest flora with regard to distribution and much more. In view of the highly damaging nature of the disease complexes and complexity in their management, independent chapters on nematode-fungus and nematode-bacteria disease complexes and their management are also presented. Presents in depth information on the synergistic interaction of nematodes with other plant pathogens and the resulting disease complexes. Focuses on sustainable and economically viable approaches to nematode disease management. Includes coverage of regulatory concerns and challenges. Plant Quarantine Challenges under Climate Change Anxiety Kamel A. Abd-El Salam, Salah M. Abdel-Momen, 2024-05-15 The effects of climate change on food safety and plant health represent a relatively new area of study. However, evidence from recent studies is clear: climate change contributes to increased and new food safety, plant health risks as one of several global change factors. This volume analyzes the scientific understanding of the relationship between climate change, food safety, plant pests, plant diseases and trade. It

identifies and discusses four key areas for future policy consideration risk assessment SPS capacity in developing countries climate change resilience and basic research challenges We must effectively communicate the impacts of climate change on plant health and build the capacity of national plant protection organizations More importantly we need to mobilize resources that will help build stronger national phytosanitary systems that can prevent the spread of plant pests thereby protecting our food sources and environment and facilitating safe trade The present volume is an asset for plant quarantine personnel working in the field agricultural university students plant health workers farmers doing agriculture plant seed traders and all those who use agricultural produce and products The book is a useful resource for students and professional plant pathologists entomologists and plant breeders because it summarizes current knowledge and suggests new research directions It is also suitable for ecologists researchers working on crop protection climate change and pest control

Critical issues in plant health: 50 years of research in African agriculture Dr Peter Neuenschwander, Dr Manuele Tamò, 2019-02-08 Focuses on plant health issues in sub Saharan Africa which are key to improving yields Reviews ways of improving the health of key African crops such as cassava maize and grain legumes Brings together leading experts on plant health in sub Saharan Africa *Invasive Alien Species* Thammineni Pullaiah, Michael R. Ielmini, 2021-04-21 Jedes Jahr breiten sich invasive gebietsfremde Arten in neue Ökosysteme aus Die von den Eindringlingen verursachten Auswirkungen können sich in kürzester Zeit bemerkbar machen und verheerend sein Das Thema der invasiven gebietsfremden Arten ist umfassend komplex und auf verschiedenen Ebenen von globaler Bedeutung Verschärft wird es durch die Globalisierung der Weltwirtschaft und den zunehmenden Handel durch den die natürlichen Barrieren für den Transfer von Arten durchbrochen werden Invasive gebietsfremde Arten bedrohen die weltweite Nahrungsmittelversorgung die Qualität und Verfügbarkeit von Trinkwasser sowie die Stromproduktion und Versorgung Zusammen mit den zusätzlichen Risiken durch den globalen Klimawandel ist die weltweite Homogenisierung von Pflanzen Tieren und Mikroben ein wesentlicher Faktor für den sich verschlechternden Gesundheitszustand der Ökosysteme und die nachlassenden Ökosystemdienstleistungen überall auf der Welt Um dieser Entwicklung entgegenzuwirken besteht die dringende Notwendigkeit einer einheitlichen Ausrichtung von Regierungen Kulturen und Programmen und einer besseren grenzüberschreitenden Koordination Nur so lassen sich die vielfältigen Bedrohungen durch invasive gebietsfremde Arten für die Umwelt die Wirtschaft und die Gesundheit von Pflanzen und Tieren sowie insbesondere die menschliche Gesundheit effektiv bekämpfen Dieses vierbändige Werk ist das erste das einen umfassenden Satz nützlicher Materialien zu den zentralen Themen bereitstellt um die gesamte globale Bedrohung durch invasive gebietsfremde Arten sowie die vielfältigen Probleme in verschiedenen Teilen der Welt deutlich zu machen und es enthält Material in dem potenziell replizierbare Lösungen zur Bewältigung dieser Bedrohungen aufgezeigt werden Das Werk betont die Bedrohung durch invasive gebietsfremde Arten auch im Sinne eines globalen Aufrufs zum Handeln Invasive Arten kennen keine Grenzen Daher hoffen wir dass wir durch die Zusammenstellung von Material das unterschiedliche

wissenschaftliche und gesellschaftliche Standpunkte aus aller Welt berücksichtigen sowie durch die Vermittlung von Erkenntnissen und Beispielen zu einer Vielzahl damit zusammenhängender Themen das globale Bewusstsein stärken und einheitliche nationale Reaktionen auf die Bedrohung durch invasive gebietsfremde Arten fördern können *Targeted Genome Engineering via CRISPR/Cas9 in Plants* Alvina Gul, 2024-07-18 Targeted Genome Engineering via CRISPR Cas9 in Plants provides in depth insights into the use of the emerging CRISPR Cas9 technology for precise genome editing This technology has revolutionized plant science research particularly for crop improvement owing to its simplicity and efficiency The book provides a wide range of CRISPR Cas9 gene editing techniques for a variety of plants Chapters include the latest applications of CRISPR Cas9 system in connection with abiotic stresses biotic stresses biofortification yield improvement disease modelling and prognosis and molecular diagnosis Targeted Genome Engineering via CRISPR Cas9 in Plants also evaluates various regulatory and ethical aspects that must be considered when implementing the CRISPR Cas9 approach This book is a valuable resource for professionals and researchers as it provides effective CRISPR Cas9 based strategies for sustainable agriculture and treatment of various diseases Explains basic mechanism and implementation of CRISPR Cas9 technology in a wide range of plants Provides practical guidance on the applications of CRISPR Cas9 in different scientific disciplines of plant science Discusses the risks and challenges of genome engineering Infomusa ,2004 **Subject Guide to Books in Print** ,1991 **Proceedings of the International Symposium on Tropical and Subtropical Fruits** ,2002

Proceedings of the International Symposium on Tropical and Subtropical Fruits Rod A. Drew, 2002 **Plant Science** Margaret McMahon, Anton M. Kofranek, Vincent E. Rubatzky, 2011 Plant Science is a resource for anyone with an interest in how plants are grown and utilized for maintaining and adding enjoyment to human life *Virus Diseases and Crop Biosecurity* Ian Cooper, Thomas Kuehne, Valery P. Polischuk, 2007-05-08 Biosecurity roughly means safe life and involves a variety of measures designed to prevent disease causing agents from entering a region and there being spread Food supplies are easy to disrupt and the provision of biosecurity at land borders is especially challenging if trade is to be maintained and when very few travellers are subjected to thorough inspection Within the context of the NATO sponsored workshop that was held in Kiev Ukraine during May 4-7 2005 the pathogens were viruses that infect plants and the region encompassed developing states on the verge of acceding into the European Union In publishing the papers presented at the workshop we take this opportunity to thank the sponsors including particularly the NATO Science committee and also the contributors for making the discussions interesting and beneficial Under United Nations FAO auspices the International Plant Protection Convention aimed to secure common and effective activities against pests and pathogens Now most countries party to that convention have laws and regulations in place to sustain agricultural production under natural threat National plant protection services exist to inspect growing crops and importations and to determine when and how introduced pathogens might be eradicated The member states of the European Union through their

national and also the regional plant protection service The European and Mediterranean Plant Protection Organisation advise national governments and develops specific protocols identification containment and eradication that aim at managing pests and pathogens in ways that have minimal impact on trade

Diseases of Tropical Fruit Crops Randy C. Ploetz,2003
Annotation Comprehensive information on diseases of the most important tropical fruit crops Chapters are devoted to a single or in some cases a related group of host plants The history distribution importance symptoms aetiology epidemiology and management of diseases of each crop are described in detail This book offers a comprehensive review of diseases of important tropical and some subtropical fruit crops The history distribution importance etiology epidemiology and control of diseases of each host crop are covered along with brief summaries on the taxonomy origins and characteristics of each host Additional information is given on the biology and pathology of the causal agents and on new advances that change or otherwise enhance our understanding of the nature and cause of these diseases Plant pathologists plantation and nursery managers lecturers and those who are involved in tropical agriculture and horticulture will find this an essential reference

Plant Virus and Viroid Diseases in the Tropics K. Subramanya Sastry, Thomas A. Zitter, 2014-01-06 Around the globe besides fungal and bacterial diseases both virus and viroid diseases have acquired greater importance in the realm of plant pathology and call for effective management measures as they are responsible for heavy yield losses and are a matter of vital importance and concern to farmers horticulturists gardeners and foresters Understanding disease epidemiology is of vital importance for formulating viable disease management practices in a given agro ecosystem The development and progress of plant disease epidemics are variable from region to region Epidemiology is not a static process but rather a dynamic course that varies with a change in the ecology host vector and virus systems

Plant Virus Diseases of Horticultural Crops in the Tropics and Subtropics ,1986 *Virus and Virus-like Diseases of Major Crops in Developing Countries* Gad Loebenstein, George Thottappilly, 2013-12-18 It appears that a comprehensive and up to date book on the impact of virus diseases on the major crops in developing countries is now much needed especially as there have been rapid advances in the biological and molecular characterization and detection of the pathogens and possible approaches for their control On the other hand the economic losses caused by many of these diseases are tremendous and much of the accumulated knowledge to diminish the crop losses has not filtered through or cannot be applied This book is focused on the important crops Each chapter on a specific crop will include inter alia geographical distribution the viruses symptoms damage detection a brief description of the viruses concerned and present and future ways for their control Experts from India Nigeria UK USA France Germany Peru Japan Australia Netherlands Venezuela Kazakhstan and Israel many of them from the International Research Institutions have contributed chapters to this book

Symposium on Virus Diseases of Tropical Crops ,1977 Plant Virus and Viroid Diseases in the Tropics K. Subramanya Sastry, 2013-06-26 Plant virus and sub viral pathogens pose severe constraints to the production of wide range of economically important crops worldwide The crops raised both through true

seed and vegetative propagated materials are affected with number of virus and virus like diseases The virus may enter into plants through seed planting materials or by vectors Once the virus is in the field it multiplies and spreads following definite patterns depending upon the nature of the vector and agro meteorological conditions Disease free crops and plants are great economic and social importance in feeding the world s population Detection of virus and sub viral agents at initial stages of infection is critical to reduce economic losses For nearly two decades ELISA and its variants played a major role in large scale virus testing and also in the production of virus free planting materials
