meaning of sports photographs      Semiotics in Mathematics Education Norma Presmeg, Luis Radford, Wolff-Michael Roth, Gert Kadunz, 2016-04-11 This volume discusses semiotics in mathematics education as an activity with a formal sign system in which each sign represents something else Theories presented by Saussure Peirce Vygotsky and other writers on semiotics are summarized in their relevance to the teaching and learning of mathematics The significance of signs for mathematics education lies in their ubiquitous use in every branch of mathematics Such use involves seeing the general in the particular a process that is not always clear to learners Therefore in several traditional frameworks semiotics has the potential to serve as a powerful conceptual lens in investigating diverse topics in mathematics education research Topics that are implicated include but are not limited to the birth of signs embodiment gestures and artifacts segmentation and communicative fields cultural mediation social semiotics linguistic theories chains of signification semiotic bundles relationships among various sign systems intersubjectivity diagrammatic and inferential reasoning and semiotics as the focus of innovative learning and teaching materials      **Eyes Everywhere** Aaron Doyle, Randy Lippert, David Lyon, 2013-03-01 In many countries camera surveillance has become commonplace and ordinary citizens and consumers are increasingly aware that they are under surveillance in everyday life Camera surveillance is typically perceived as the archetype of contemporary surveillance technologies and processes While there is sometimes fierce debate about their introduction many others take the cameras for granted or even applaud their deployment Yet what the presence of surveillance cameras actually achieves is still very much in question International evidence shows that they have very little effect in deterring crime and in making people feel safer but they do serve to place certain groups under greater official scrutiny and to extend the reach of today's surveillance society Eyes Everywhere provides the first international perspective on the development of camera surveillance It scrutinizes the quiet but massive expansion of camera surveillance around the world in recent years focusing especially on Canada the UK and the USA but also including less debated but important contexts such as Brazil China Japan Mexico South Africa and Turkey Containing both broad overviews and illuminating case studies including cameras in taxi cabs and at mega events such as the Olympics the book offers a valuable oversight on the status of camera surveillance in the second decade of the twenty first century The book will be fascinating reading for students and scholars of camera surveillance as well as policy makers and practitioners from the police chambers of commerce private security firms and privacy and data protection agencies      **Visualising Protestant Monarchy** Julie Farguson, 2021 Visualizing Protestant Monarchy Contents Illustrations Acknowledgements Introduction Establishing an Anglo Dutch Royal Image 1689 90 Anglo Dutch Kingship and War 1690 4 The Royal Image 1695 1702 Transforming the Royal Image 1702 Military Affiliations 1702 8 The Royal Image 1709 14 Conclusion Bibliography Index Colour Plates      The Art of Identification Rex Ferguson, Melissa M. Littlefield, James Purdon, 2021-09-06 Since the mid nineteenth century there has been a notable acceleration in the development of the techniques used to confirm identity From fingerprints to photographs to DNA we have been rapidly amassing novel means of

identification even as personal individual identity remains a complex chimera The Art of Identification examines how such processes are entangled within a wider sphere of cultural identity formation Against the backdrop of an unstable modernity and the rapid rise and expansion of identificatory techniques this volume makes the case that identity and identification are mutually imbricated and that our best understanding of both concepts and technologies comes through the interdisciplinary analysis of science bureaucratic infrastructures and cultural artifacts With contributions from literary critics cultural historians scholars of film and new media a forensic anthropologist and a human bioarcheologist this book reflects upon the relationship between the bureaucratic scientific and technologically determined techniques of identification and the cultural contexts of art literature and screen media In doing so it opens the interpretive possibilities surrounding identification and pushes us to think about it as existing within a range of cultural influences that complicate the precise formulation meaning and reception of the concept In addition to the editors the contributors to this volume include Dorothy Butchard Patricia E Chu Jonathan Finn Rebecca Gowland Liv Hausken Matt Houlbrook Rob Lederer Andrew Mangham Victoria Stewart and Tim Thompson

Photojournalism: A Social Semiotic Approach H. Caple, 2013-10-25 This book explores the role of photographs in newspapers and online news analyzing how meanings are made in images and exploring text image relations illustrated with authentic news stories from both print and online news outlets
