Vivant Comme Mod Le Gauthier Chapelle:

Le vivant comme modèle Gauthier Chapelle, Michèle Decoust, 2015-10-28 Des millions d'années avant l'apparition de l'homme la vie avait déjà inventé la roue le moteur atomique le sonar le vol stationnaire la capture de l'énergie solaire l'éclairage électrique le GPS et des myriades de techniques qui nous dépassent encore complètement cicatrisation reproduction congélation suivie de réanimation et des cerveaux dont chacun des milliards de neurones est un univers informatique Pour le comprendre il a fallu attendre que nos propres technologies atteignent les profondeurs moléculaires du vivant nous réalisant que les inventions de la nature taient infiniment plus complexes que les nôtres Le service Recherche et Développement de la nature a 3,8 milliards d'années d'avance sur ceux de nos entreprises aime dire Janine Benyus la naturaliste américaine qui a inventé le concept de biomimétisme Il s'agit de nous en inspirer pour pousser plus loin nos propres inventions mais surtout pour corriger le tir de ces dernières qui nous ont conduits dans les impasses écologiques que l'on sait Il existe trois niveaux de biomimétisme Le premier consiste à imiter les formes de la nature Le second de plus en plus pris des industriels repose sur l'imitation des matériaux et des processus naturels La vraie révolution repose cependant sur le troisième niveau qui consiste à imiter les stratégies du vivant sa philosophie Ce troisième niveau a des implications fascinantes Ainsi contrairement à l'image que nous nous faisons de la loi de la jungle la nature ne pratique la compétition que dans 10 % des rapports entre organismes Les 90 % restants sont fondés sur la coexistence le mutualisme la coopération le commensalisme le parasitisme et la symbiose À imiter absolument

La permaindustrie Thomas Huriez, Eric Boël, Audrey Prat, Jean-Marc Bouillon, 2024-01-18 Inspiré par les mécanismes millénaires de la nature la permaindustrie est un appel à réinventer notre manière d'interagir avec le monde Ses principes fondateurs nous guident vers un avenir où l'humanité et la nature prospèrent conjointement Pour

A Critical Theory for the Anthropocene Nathanaël Wallenhorst, 2023-09-15 This volume which is rooted in biogeophysical studies addresses conceptions of political action in the Anthropocene and the tension between a desire to accomplish the Promethean project of modernity and a post Promethean approach This work explores the idea of an anthropological mutation of political consolidation from a post Promethean togetherness to creating the capacity to act together The political thinking of the human condition developed by Hannah Arendt is important here as a resource for thinking about humanity in terms of human adventure This has three dimensions hubris the world and coexistence referring respectively to the logic of profit of the homo oeconomicus the logic of responsibility of the homo collectivus and the logic of the hospitality of the homo religatus The intellectual and political attitude outlined in this book is an extension of critical theory the work also puts forward a critique of what poses a problem in our relationship to the world and suggests how to overcome it the ultimate goal being social transformation The author proposes an uprising and an anthropological consolidation of politics based on the revitalization that is brought about by the sharing of a conviviality both between humans and with what is non human The identification of conviviality as an educational paradigm to survive the Anthropocene gives us the much needed reason for

hope despite this heritage of the Anthropocene In addition to Arendtian thinking this critical theory for the Anthropocene draws on the political thinking of several contemporary authors including Maurice Bellet Hartmut Rosa Andreas Weber Dominique Bourg and Christian Arnsperger This volume is of interest to researchers in the Anthropocene Qui guérit ?
