The Varieties Of Reference Clarendon Paperbacks:

The Varieties of Reference Gareth Evans,1982 **Narrative, Perception, Language, and Faith** E.

Wright,2005-11-16 There have been many voices in disciplines as various as philosophy history psychology hermeneutics literary theory and theology that have claimed that narrative is fundamental to all that is human Here is a book that in an engaging and amusing way presents a coherent thesis to that effect connecting the Joke and the Story with all that comedy and tragedy imply not only with our sensing and perceiving of the world but with our faith in each other and what the character of that faith should be Action and Ethics in Aristotle and Hegel Gary Pendlebury,2017-07-05 Pendlebury alleges that abstraction and rationalization have had a strong and malign influence on normative moral philosophy in the 20th century Criticizing writers such as Hare Rawls and Scanlon for pursuing a conception of moral philosophy that bears little resemblance to the way in which human beings actually think and conduct themselves Pendlebury instead suggests a Virtue Ethics inspired by Hegel s and Aristotle s accounts of action as a corrective to this trend showing that moral activity is historically and socially based and must address the formed character of individual agents This trend which began with the responses by Locke Hume and Kant to Descartes Meditations rendered moral philosophy individualistic and psychologistic in contrast to Aristotle and Hegel s claim that man is essentially a social creature Pendlebury argues that this should be the starting point of any account and understanding of morality which roots the concept of will in the practical activity involved in being a member of an ethical community rather than an abstract metaphysical entity that is supposedly in the possession of individuals In providing a critique of modern moral philosophy from this perspective Pendlebury s line of enquiry lends much support to Virtue Ethics as exemplified in the work of Hursthouse and Slote while taking a more combative approach with those with whom he disputes In doing so he shows that serious considerations of continental philosophy highlights the richness of moral activity absent from analytical tradition which for so long has been bent on marginalizing it *The Development of Logic* William Calvert Kneale,Martha Kneale,1962 This book traces the development of formal logic from its origins in ancient Greece to the present day The authors first discuss the work of logicians from Aristotle to Frege showing how they were influenced by the philosophical or mathematical ideas of their time They then examine developments in the present century **The Unity of the Mind** D H M Brooks,1994-02-12 **Knowing What To Do** Timothy Chappell,2014 Presents what philosophical ethics can be like if freed from the idealizing and reductive pressures of conventional moral theory making the case that moral imagination is a key part of human virtue by showing the variety of roles it plays in our practical and evaluative lives **The Philosophy of Charles Travis** John Collins,Tamara Dobler,2018-06-26 This volume offers a collective critical engagement with the thought of Charles Travis a leading contemporary philosopher of language and mind and a scholar of the history of analytical philosophy The work of Charles Travis is fundamentally situated in the analytical tradition yet is also radically at odds with many assumptions characteristic of the tradition especially as regards

the nature of language and perception as representational capacities Twelve philosophers explore themes in his work and Travis gives extended responses The editors provide an introductory chapter which situates Travis's ideas in the context of contemporary philosophy of language and mind The volume divides into three sections relating to language thought and perception Topics covered in detail include the nature of linguistic and perceptual representation Frege Wittgenstein the role of context in fixing speech content and the structure of thought Essays on Husserl's Logic and Philosophy of Mathematics

Stefania Centrone, 2017-09-07 Essays on Husserl's Logic and Philosophy of Mathematics sets out to fill up a lacuna in the present research on Husserl by presenting a precise account of Husserl's work in the field of logic of the philosophy of logic and of the philosophy of mathematics The aim is to provide an in depth reconstruction and analysis of the discussion between Husserl and his most important interlocutors and to clarify pivotal ideas of Husserl's by considering their reception and elaboration by some of his disciples and followers such as Oskar Becker and Jacob Klein as well as their influence on some of the most significant logicians and mathematicians of the past century such as Luitzen E J Brouwer Rudolf Carnap Kurt G del and Hermann Weyl Most of the papers consider Husserl and another scholar e g Leibniz Kant Bolzano Brentano Cantor Frege and trace out and contextualize lines of influence points of contact and points of disagreement Each essay is written by an expert of the field and the volume includes contributions both from the analytical tradition and from the phenomenological one **Thought-Contents** Steven E. Boër, 2006-11-23 According to our commonsense view of the matter beliefs desires intentions and the like are special kinds of internal states the possession of which by a given creature potentially explains its behavior and otherwise renders the creature intelligible to us So called folk psychology provides us with a rough and ready network of counterfactuals delimiting the role supposedly played by these internal states vis perceptual input inference and behavioral output in a normal member of our species The exact empirical details of this network do not matter here for we are not undertaking further refinement or systematization of the relevant counterfactuals Instead our topic is the ontological analysis of the internal states that occupy the nodes of this complex network and the bearing of that analysis on the truth conditions of the sentences we use to ascribe beliefs and related states The relevant counterfactuals canonically describe particular belief desire and intention states as states of believing desiring and intending that such a creature The use of infinitival clauses to describe desires and intentions is not really an exception for desiring or intending to do A or to be F is just having a self regarding desire or intention that oneself does A or that oneself is F By the lights of our commonsense psychology then to be in a particular belief desire or intention state is to bear the corresponding attitudinal relation believing desiring or intending to a certain content Kant, Schopenhauer and Morality: Recovering the Categorical Imperative M.

Walker, 2011-12-01 Addressing the perennial question why should we be moral this book argues that we can only give a truly and morally satisfying answer to that question by radically reconfiguring our conception of the self and the way it relates to others
