urban issues become even more central to many professions related to planning This situation not only reinforces long identified challenges but also generates new ones for which planners from all different fields of inquiry have to re think their own practice This book gathers works that reflect recent challenges examined by the fresh eyes of young professionals brought together to stretch conventions towards an innovative approach to urban studies The reader will find world wide as well as more localised study cases in four chapters that embed the most up to date questions permeating the field sociocultural production and urban space urban governance and social challenges contemporary planning and cooperating in the south and sustainable urban infrastructure Each of these chapters is introduced by prominent authors such as Prof Amos Rapoport PhD Jaqueline Britto P Ivora Prof Guiqing Yang and Cor Dijkgraaf who have been of great importance during the course of this advanced Master studies

Sustainable Urban Development Volume 1 Stephen Curwell, Mark Deakin, Martin Symes, 2005-09-09 Based on original research this first volume of a set of groundbreaking new books sets out a framework for analyzing sustainable urban development and develops a set of protocols for evaluating the sustainability of urban development Protocols included are for sustainable urban planning urban property development urban design the construction operation and use of buildings Using these protocols the book goes on to provide a directory of environmental assessment methods for evaluating the sustainability of urban development and also maps out how these assessment methods are being transformed to evaluate the environmental economic and social sustainability of urban development Web based applications are increasingly being used to support this transformation and the contributors deftly cover this application and issues concerning the use of information and communication technologies for evaluating the sustainability of urban development are also dealt with With its multidisciplinary approach Sustainable Urban Development presents key new material for postgraduates and professionals across the built environment

Urban development, 2017 **Urban Transformations** Sigrun Kabisch, Florian Koch, Erik Gawel, Annegret Haase, Sonja Knapp, Kerstin Krellenberg, Jaime Nivala, Andreas Zehndorf, 2018-01-08 The book addresses urban transformations towards sustainability in light of challenges of global urbanization processes and the consequences of global environmental change The aim is to show that urban transformations only succeed if both innovative scientific solutions and practice oriented governance approaches are developed This assumption is addressed by providing theoretical insights and empirical evidence pointing particularly at 3 concepts or qualities which are determined here as being central for achieving urban sustainability resource efficiency quality of life and resilience Urban case studies from several international research projects illustrate our conceptual approach of urban transformations towards sustainable development Thus the book reaches far beyond a mere additive description of single case studies It incorporates the results of condensed synthesis resulting from comparisons and evaluations It provides based on cross cutting reflection of single cases and different scales and methods of analysis general and transferable findings They do not only consider the scientific sphere but deliberately go beyond it discussing

transferability of knowledge into practice governance options and the feasibility of policy strategies in order to pave the way for sustainable urban transformations to happen today and in the future
