Wood, 2018-12-04 The new geological epoch we call the Anthropocene is not just a scientific classification It marks a radical transformation in the background conditions of life on Earth one taken for granted by much of who we are and what we hope for Never before has a species possessed both a geological scale grasp of the history of the Earth and a sober understanding of its own likely fate Our situation forces us to confront questions both philosophical and of real practical urgency We need to rethink who we are what agency means today how to deal with the passions stirred by our circumstances whether our manner of dwelling on Earth is open to change and ultimately What is to be done Our future that of our species and of all the fellow travelers on the planet depend on it The real world consequences of climate change bring new significance to some very traditional philosophical questions about reason agency responsibility community and man's place in nature The focus is shifting from imagining and promoting the good life to the survival of the species *Deep Time Dark Times* challenges us to reimagine ourselves as a species taking on a geological consciousness Drawing promiscuously on the work of Nietzsche Heidegger Foucault Derrida Deleuze and other contemporary French thinkers as well as the science of climate change David Wood reflects on the historical series of displacements and de centerings of both the privilege of the Earth and of the human from Copernicus through Darwin and Freud to the declaration of the age of the Anthropocene He argues for the need to develop a new temporal phronesis and to radically rethink who we are in respect to solidarity with other humans and responsibility for the nonhuman stakeholders with which we share the planet In these brief lively chapters Wood poses a range of questions centered on our individual and collective political agency Might not human exceptionalism be reborn as a sort of hyperbolic responsibility rather than privilege *The Anthropocene and the Humanities* Carolyn

Merchant, 2020-01-01 A wide ranging and original introduction to the Anthropocene the Age of Humanity that offers fresh theoretical insights bridging the sciences and the humanities From noted environmental historian Carolyn Merchant this book focuses on the original concept of the Anthropocene first proposed by Paul Crutzen and Eugene Stoermer in their foundational 2000 paper It undertakes a broad investigation into the ways in which science technology and the humanities can create a new and compelling awareness of human impacts on the environment Using history art literature religion philosophy ethics and justice as the focal points Merchant traces key figures and developments in the humanities throughout

the Anthropocene era and explores how these disciplines might influence sustainability in the next century Wide ranging and accessible this book from an eminent scholar in environmental history and philosophy argues for replacing the Age of the Anthropocene with a new Age of Sustainability *The Global Energy Trap and a Way Out* Frank Parkinson,2017-02-14 It is now generally accepted that the world s climate has entered into a phase of warming with potentially disastrous consequences for the planet but there is no agreement about how to deal with it The global energy trap refers to the fact that our civilisation has been built on energy derived from fossil fuels and when these are exhausted there must be a collapse of some kind However long before we have run them down to exhaustion we shall have pushed atmospheric pollution and global warming beyond a tipping point In this situation there is no rational choice except to develop clean renewable energy sources with all deliberate haste How this can be done is The Global Energy Trap and a Way Out s central theme and is fully explored at length Although the answer is largely one of innovative engineering other social and economic factors must be taken into account Dr Parkinson provides us with an informative and accessible overview of the current situation we find ourselves in as well as providing us with ideas for the future The Global Energy Trap and a Way Out will appeal to those interested in all aspects of the increasingly urgent problem of global warming **Climate Church, Climate World** Jim Antal,2023-03-06 Climate Church Climate World contends that climate change is the greatest moral challenge humanity has ever faced Hunger refugees poverty inequality deadly viruses war climate change multiplies all forms of global social injustice Environmental advocate Rev Jim Antal calls on the church to meet this moral challenge to embrace a new vocation so that future generations might live in harmony with God s creation Antal proposes how people of faith can embrace new approaches to worship preaching witnessing and other spiritual practices that honor creation and cultivate hope This revised and updated edition includes a new chapter on political and policy shifts under the Trump and Biden administrations the influence of Greta Thunberg and climate change activists and updated information on the current science of climate change

Carbon Criminals, Climate Crimes Ronald C. Kramer, 2020-04-17 *Carbon Criminals Climate Crimes* analyzes climate

change from a criminological perspective Four state corporate crimes are examined continued extraction of fossil fuels and rising carbon emissions political omission related to the mitigation of emissions socially organized denial and climate crimes of empire The final chapter reviews policies to achieve climate justice *Eco-Socialism For Now and the Future* Robert Albritton, 2019-04-23 It is increasingly apparent that capitalism cannot stave off the truly frightening ecological disasters that threaten the future of life on earth Is it an accident that the strongest and most capitalist economic force in the world the US is also that force that is most prone to the denial of the enormous dangers of global warming While capitalism is a global force it is not supported by the majority of the world and much more thought and action is needed to integrate and globalize movements against oppression injustice and ecological destruction While changes at a local level are important and more feasible in our current world ultimately changes at a global level may have greater long term importance and we need to greatly expand theorizations and mobilizations in this direction now Robert Albritton proposes practical utopias as a process of thinking by which short term changes tend in the direction of desirable changes in the longterm *The Oxford Handbook of Global Studies* Mark Juergensmeyer, Saskia Sassen, Manfred B. Steger (ed), 2019 Since the end of the Cold War globalization has been reshaping the modern world and an array of new scholarship has risen to make sense of it in its various transnational manifestations including economic social cultural ideological technological environmental and in new communications The chapters discuss various aspects in the field through a broad range of approaches This handbook focuses on global studies more than on the phenomenon of globalization itself although the various aspects of globalization are central to understanding how the field is currently being shaped **America on the Brink** David Ray Griffin, 2023-05-01 The American government through its media has convinced most Americans to support the Ukrainian government This book shows why this is a mistake The United States promised Mikhail Gorbachev that NATO would not expand one inch eastward and there had been ample warnings by George Kennan and others that moving NATO eastward especially moving into Georgia and Ukraine would cause problems for Russia In Ukraine prior to 2014 Ukrainian and Russian speakers were coexisting tolerably well But in 2013 and 2014 neocons in Obama's administration engineered a coup with help from neo Nazis turning Ukraine into a Russia hating nation The war in Ukraine began that year not in 2022 when Russia attacked in order to protect the Russian speaking regions under attack by the new coup government in Kiev Although this book is primarily about the war in Ukraine it also shows how in one sense the war in Ukraine is simply one more instance in the trajectory of American imperialism as illustrated by previous US interventions in Iran Guatemala Cuba Brazil Greece Dominican Republic Panama and Iraq In another sense this war reveals just how committed America is to maintaining a unipolar world order Because this war illustrates that America is willing to threaten nuclear holocaust it is almost as if people in the U S State Department and military believe that life is not worth living unless the US can control the world *Truths about Evil, Sin, and the Demonic* Byron Belitsos, 2023-04-18 The Problem of Evil and the Predicament of Theodicy As

Christians or theists we are moved to share the truth of God's love for humankind But how can we speak of such providential care in a world rife with crime war racism genocide and even ecocide In response to this predicament a theodicy proposes a rational defense of God's goodness that offers consolation to victims and hope to all believers Truths about Evil Sin and the Demonic provides a sweeping history of the discipline of theodicy that focuses on its strategic turning points and its possible future Belitsos argues that because of the atrocities of the last century and the threat of horrendous evils in the coming century we need to marshal the most explanatory elements of all previous theodicies and then drive toward an integrative model based on a creative synthesis The author also turns to a modern revelatory source that supports his argument for such a meta theodicy He concludes by critically engaging with this source and the entire tradition in his call for an apophatically informed integral theodicy
