Rev. Dr. Ebele Okonkwo Onuigbo, 2016-06-23 Decision making is a fundamental aspect of our daily lives shaping our paths through the resolutions we reach after careful consideration From the simplest choices to the most complex dilemmas individuals continuously navigate the terrain of decision making throughout their lifetimes These decisions serve as compass points guiding us toward the fulfillment of our goals and aspirations whether they lead to positive outcomes or negative consequences How many individuals truly take the time to thoroughly consider the available facts before diving into the decision making process Engaging in wise deliberation of facts prior to making a decision is crucial for ensuring that the resulting choice will have a meaningful impact whether on the individual themselves or the circumstances at hand So how does one go about making a wise decision It involves carefully weighing the available information considering potential consequences and evaluating the implications for both oneself and others in the surrounding community Ultimately the decisions we make not only shape our own lives but also have far reaching effects on the well being and experiences of those around us In the modern world we observe a striking dichotomy between Jesus purpose driven ethos and the prevalent self centered pursuits that often consume individuals Amidst the clamor for material possessions societal status and personal comfort many seem to lose sight of life s deeper significance While the pursuit of such desires is not inherently erroneous an excessive fixation on them can obscure individuals from fulfilling their higher calling *Change Has Changed* Samuel R. Chand, 2021-10-19 The Greek philosopher Heraclitus said change is the only constant in life But the world has experienced so much upheaval since January 2020 that change itself has changed In business the church and nonprofits leaders are being left in the dust as events and challenges speed by in a blur The pace of change was accelerating before but the pandemic pressed the pedal to the floor We re at an inflection point says leadership architect and change strategist Sam Chand The way things were isn t the way things will be In his new book *Change Has Changed* Sam sets out to help leaders understand the evolving nature of change so that they can guide their organizations with wisdom and confidence He examines three major shifts that he likens to three simultaneous earthquakes Our environment has changed People are working from home many businesses may never reopen and the way we shop handle health needs and even go to church has changed We have changed We ve learned to live with rampant uncertainty and a raft full of nagging fears but our bodies and our souls weren t meant for this The people around us have changed They are frustrated isolated depressed anxious and angry They just don t feel safe Sam tackles these and related issues head on by offering lessons that will empower leaders to be ready for the next normal We used to talk about a new normal as if it s the end point of change Sam explains but if we ve learned anything in the past months it s that change is perpetual and we need to anticipate the next one on the horizon **The Seals of the**
