Urban Education With An Attitude:

Urban Education with an Attitude Lauri Johnson, Mary E. Finn, Rebecca Lewis, 2012-02-01 This book profiles local and national efforts to transform urban education and reinvent urban teacher preparation. It describes real programs in real urban schools that have developed policy initiatives that promote educational equity, community-based curricula, and teacher education and parent empowerment programs that emphasize democratic collaboration among universities, urban teachers, parents, and community members. By involving all stakeholders, this comprehensive approach provides a model for creating urban schools that not only excite and inspire but also serve as engines for social change. Contending that urban education reform will fail without public engagement and a commitment to social justice, the contributors challenge urban educators to become accountable to their students and the communities they serve. *Including Families and Communities in Urban Education*

Catherine Hands, Lea Hubbard, 2011-04-01 The work of school family and community partnerships is complex and messy and demands a thoughtful and deep investigation. Currently, parent and community involvement does not draw on school reform and educational change literature, and conversely, the school change literature often ignores the crucial role that communities play in educational reform. This edited volume focuses on structural considerations regarding education and the school communities, school level, and family culture and the interrelationships between the agency and actions of school personnel, family members, community citizens, and students. This book extends the dialogue on school reform by looking at parent and community engagement initiatives as part of the school reform literature. The contributors illustrate the negative impact on students and their education when assumptions made by school personnel regarding the organization of education, the nature of families, and the contributions they should make to their children's education are not challenged.

The Praeger Handbook of Urban Education Philip M. Anderson, Kecia Hayes, Joe Kincheloe, Karel Rose, 2006-03-30 Maintaining that urban teaching and learning is characterized by many contradictions, this work proposes that there is a wide range of social, cultural, psychological, and pedagogical knowledge urban educators must possess in order to engage in effective and transformative practice. It is necessary for those teaching in urban schools to be scholar practitioners rather than bureaucrats who can only follow rather than analyze, understand, and create. Ten major sections cover the myriad issues of urban education as it exists today. Second International Handbook of Urban Education William T. Pink, George W. Noblit, 2017-01-06 This second handbook offers all new content in which readers will find a thoughtful and measured interrogation of significant contemporary thinking and practice in urban education. Each chapter reflects contemporary cutting edge issues in urban education as defined by their local context. One important theme that runs throughout this handbook is how urban is defined and under what conditions the marginalized are served by the schools they attend. Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of nations. This second handbook focuses on factors such as social stratification, segmentation, segregation,

racialization urbanization class formation and maintenance and patriarchy The central concern is to explore how equity plays out for those traditionally marginalized in urban schools in different locations around the globe Researchers will find an analysis framework that will make the current practice and outcomes of urban education and their alternatives more transparent and in turn this will lead to solutions that can help improve the life options for students historically underserved by urban schools

Rury, 2005-05-16 Urban Education in the United States examines the development of schools in the large cities of the USA John Rury a well known historian of education introduces and highlights the most significant and classic essays dealing with urban schooling in this collection Urban Education in the United States will provide an introduction to critical themes in the history of city schools and will frame each section with an overview of urban education research during particular periods in US history

Teacher Education with an Attitude Patrick J. Finn, Mary E. Finn, 2012-03-27 Using a social justice approach to teacher education the contributing teacher educators address the need to prepare teachers to understand the way social class race and culture impact their efforts to educate working class students By helping prepare teachers to strengthen democracy through education the contributors offer ways to help them develop critical consciousness the will to address society's injustices and inequities Teachers who collaborate actively with their students their families and others such as community and labor organizers to challenge the economic and educational policies that keep the hierarchical structure in place develop their own educational and political power alongside their students These educators see schools as sites of struggle for democracy and their students learn to direct their attitude toward outcomes that are in their collective self interest

Subcommittee on Elementary, Secondary, and Vocational Education,1982 **International Handbook of Urban Education** William T. Pink,George W. Noblit,2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education **Handbook of Urban Educational Leadership** Muhammad Khalifa,Noelle Witherspoon Arnold,Azadeh F.
