Us Fast Battleships 1938-91 The Iowa Class:

US Fast Battleships 1938-91 Lawrence Burr, 2011-12-20 In 1938 the United States abandoned the constraints imposed by the Washington Treaty and began work on a new class of super battleships. This book covers the design, construction, and employment of the four Iowa class battleships, the largest in the American fleet. During World War II they served as guards for the aircraft carriers and their bombardments provided cover for the numerous landings in the Pacific. At the war's end, the Japanese signed their surrender on the decks of an Iowa class battleship, the USS Missouri. After World War II, the ships continued to serve, providing support during Korea, Vietnam, and even the first Gulf War. This book tells the full story of the greatest of the American battleships.

US Heavy Cruisers 1943-75 Mark Stille, 2014-09-20 A companion book to *US Heavy Cruisers 1941-45*, this is a guide to those cruisers built in the later years of World War II and beyond, together forming the definitive guide to the US's heavy cruiser classes. Versatile warships, the heavy cruisers of the Baltimore class and their successors in the Oregon City and Des Moines classes commonly acted as carrier escorts throughout World War II but also performed bombardment duties in support of amphibious landings. Post World War II, the heavy cruisers continued to see service chiefly in Korea and Vietnam. Even after the heyday of the heavy cruiser had passed, the ships continued to serve; several were converted into the earliest examples of guided missile cruisers and created an enduring legacy in the US Navy. From an established expert on the US and Pacific naval history, this is an invaluable resource, richly illustrated with artwork and photographs.

US Navy Dreadnoughts 1914-45 Ryan K. Noppen, 2014-08-20 The development of the US Navy's dreadnought battleships was a pivotal part of America's evolution into a true world power. By the beginning of World War I, the United States possessed the world's third largest navy, with ten dreadnoughts in service and four more under construction. By the end of World War II, the US Navy was the undoubted global superpower, despite initial crippling losses to its battlefleet at Pearl Harbor. Richly illustrated with archive photographs as well as a full cutaway of the world's only surviving dreadnought, this comprehensive and detailed title covers the technical characteristics and combat record of the US dreadnoughts throughout their long careers.

Soviet Cold War Guided Missile Cruisers Edward Hampshire, 2017-01-26 Heavily armed and formidable guided missile cruisers formed the core of the Soviet Navy during the Cold War. From the last class of conventional Sverdlov class cruisers through to increasingly complex and formidable missile cruisers, these ships ensured that NATO took the Soviet naval threat seriously. *Soviet Cold War Guided Missile Cruisers* covers all classes of these impressive warships, from the early Sverdlov through the Kynda, Kresta, Kara, and Slava to the enormous Kirov classes. Together, these vessels marked the apogee of Soviet naval technology and capability, and they remain today the largest non-aircraft carrier warships built since 1945. Containing material previously only available in Russian and fully researched from specialist defence journals, this comprehensive volume examines the design, development, and intended role of these impressive hi-tech warships and recounts their dramatic operational history as NATO and Soviet warships faced off against

each other during the long Cold War at sea **The Eleventh Hour** L. Douglas Keeney, 2015-03-31 In late November 1943 President Franklin Delano Roosevelt and his Joint Chiefs of Staff secretly boarded the battleship USS Iowa to attend a conference in Tehran with British Prime Minister Winston Churchill and Soviet Union leader Joseph Stalin where the Allies would come to an agreement on a war plan to defeat Germany Although Roosevelt's preparation at sea established the groundwork for the American position on D Day it was in the heated and electrifying debates that followed in Tehran and only through those intense debates that a deal was ultimately struck In *The Eleventh Hour* critically acclaimed author L Douglas Keeney explores FDR's covert conferences on the battleship and provides stunning insight into the formerly secret behind the scenes transcripts from the meetings in Tehran Brilliantly chronicling the three days of aggressive debates between the heads of state Keeney demonstrates that Tehran although remembered as a diplomatic conference with a well known outcome was in reality chaotic conflicted and subject to numerous heated closed door sessions with a petulant irritable Churchill a strikingly reserved detached Roosevelt and an assertive but unexpectedly diplomatic and even charming Stalin winning over his guest President Roosevelt whose quarters were bugged by the Soviets Seamlessly stitching together the private papers diaries meeting notes and letters home of those on board *The Eleventh Hour* narrates declassified transcripts exposes surprising secrets and illuminates how the debates of three men would ultimately end WWII **What Happened to the Battleship** Chris Baker, 2022-07-30 In the hundreds of books written about battleships the authors tend to draw down the curtain on the careers of these great vessels in September 1945 with the surrender of Japan Yet on that day some ninety eight battleships or ex battleships might be spotted around the world and eleven of them were in or around Tokyo Bay for the surrender itself What happened to all those ships This new book takes a fresh look at the slow demise of the battleship It examines the decisions made by the major world powers after 1945 and their aspirations to retain battleships in their navies despite financial stringency It places the history and role of battleships after 1945 in their geopolitical context centered around the Cold War and the need for the West to face down an aggressive Soviet Union It also examines the impact on battleships of operational analysis of the Second World War and new technological developments notably the atom bomb and the guided missile The book uses the wealth of information from ship's books ship's logs and gun logs to document in considerable detail what the ships actually did after the Second World War with a particular focus on those of the Royal Navy It covers United States battleship operations in Korea Vietnam and the Gulf War as well as the deterrent role played by battleships for NATO from the 1950s to the 1990s Finally it brings the story up to date by documenting the preservation as museum ships of the eight dreadnoughts which still exist today in the United States Extensively illustrated with photographs of the huge range of activities of battleships after 1945 from their use as Fleet flagships to Royal or Presidential yachts and more poignantly as target ships this new book will appeal equally to the historic ship enthusiast and naval specialist and provide a novel perspective through a battleship shaped lens on late twentieth
