when 3C is not applied Type I II In general the function of each 3C type in the various dimensions could be determined In addition a comparative study of the document analysis and the qualitative surveys resulted in a canon for culture general skills Regarding the determined lack of coherence in 3C correlating with a demonstrably negative impact on effectiveness and efficiency as well as interoperability a NATO standard in the form of a standardization agreement STANAG was suggested based on the aforementioned findings with a focus on empathy cross cultural awareness communication skills including active listening flexibility and adaptability and interest Moreover tolerance of ambiguity and teachability patience observation skills and perspective taking could be considered significant Suspending judgment and respect are also relevant skills here At the same time the document analysis also revealed a lack of coherency and consistency in 3C education and interorganizational alignment In particular the documents examined for the U S Forces indicated divergent approaches Furthermore the interview analysis disclosed a large discrepancy in part between doctrine and actual implementation with regard to the NATO Forces
