

Wallace & Tiernan® Gas Chlorination V10k™ Gas Feed System

PRODUCT OVERVIEW

The V10k™ system is a remote vacuum solution feeder for use with four of the most commonly used gases for the disinfection and treatment of municipal and industrial water and wastewater. This unit has been built to continue the long standing proven design and features of its predecessor and adds more. The versatility of wall mounting, front access of all components and maximum capacity of 750 PPD (15 kg/hour chlorine) have all been enhanced by this new design.
