Using Children's Literature in Math and Science, 1997 *Developing Teaching Skills in the Primary School* Jane Johnston, John Halocha, Mark Chater, 2007-10-16 Teaching is a complex process which involves the development and utilization of subject knowledge and teaching skills. Containing reflective and practical skills, this book supports such development focusing specifically on teaching skills, considering what they are, how they develop, and how they differ between age and subject. The book contains three sections: Planning, Doing, and Reviewing, which demonstrate effective classroom practice. It uses examples of practitioners at different stages of their professional development to link theory and practice and includes discussions on contemporary issues in primary education such as Constructivist teaching and learning, Thinking skills, Creativity, Teaching and learning styles, Child-centred learning. The authors provide a critical analysis of the issues, practice, and problems faced by primary school teachers, which is supported by reflective tasks throughout the book. Emphasizing the child as a partner in the learning process and highlighting the importance of teaching for child-centred learning, the book ultimately develops and strengthens the teacher's skills. *Developing Teaching Skills in the Primary School* provides essential guidance and support to trainee, beginner, and developing primary school teachers. **Prisoners of Hope:**

111 Inspiring Stories Jerald Borgie, 2016-10-18 In response to our quest for something to believe in, *Prisoners of Hope: 111 Inspiring Stories* provides a series of inspirational short stories based on specific Bible passages and parables. With humor and heartfelt wisdom, readers will learn how ordinary people have found hope in how the words of the Bible have been reflected in their everyday lives. From a baby girl who was abandoned by her mother at a Holiday Inn only to be adopted by a loving family to the solace that a wealthy man found in the words "In God We Trust" on a found penny, the stories show us that no matter what the circumstances, the answers are always found in the words of the Lord. *Story Starters and Science Notebooking* Sandy Buczynski, Kristin Fontichiaro, 2009-05-19 *Story Starters and Science Notebooking: Developing Student Thinking Through Literacy and Inquiry* is designed to provide a meaningful, comfortable framework in which teachers and parents can encourage elementary children to explore scientific ideas in an inquiry-oriented format. The basis for each scientific concept presented in *Story Starters and Science Notebooking* is embedded in a story appropriate for elementary-aged children. The activity that follows each narrative encourages learners to observe, compare, gather data, organize, or classify and draw conclusions about the problem posed from the story. Because current scientific knowledge and understanding guide scientific investigations, background information in each chapter provides teachers with a synopsis of the scientific concept involved in the activity for that story. The story starters present a framework for inquiry which eliminates the free-wheeling, uncontrolled, and unstructured view some teachers have of inquiry. These are either original stories or familiar children's stories that ask learners to investigate a possible scientific explanation for a problem or scenario. Learners then communicate their findings in an oral, written, pictorial, or technological form back to a lead character from the
