a useful spotter's guide for all car enthusiasts *Strategies of German Car Companies in China* Patrick Schrott, 2014-02-01

In 2009 the PRC overtook the USA as the biggest automotive market in the world in production as well as in sales. With economic problems like stagnating real income, rising raw material prices and credit-driven consumerism in the industrial countries, the importance of the Chinese market for car companies will even grow. Saturated passenger car markets in the USA and Western Europe and low rates of motorization in new automotive markets like China focus the attention of the market participants on these new growing markets. The focus of this study is on the passenger vehicle market and lines out why the Chinese market is profitable and attractive for international manufacturers. Moreover, it shows how to deal with the problems and how to use the opportunities regarding the dimensions of internationalization. Firstly, the PEST Analysis of the Chinese automobile market lines out the political, legal, economic, socio-cultural and technological factors. In such a rapidly changing and growing as well as culturally completely different country like the PRC, the framework conditions and circumstances are of big importance for foreign enterprises willing to do business there. The third chapter deals with possible internationalization strategies for China by showing possibilities of timing and market development strategies plus options for locating business markets. This is also further established in the fourth chapter in which the internationalization strategies of two German enterprises are analyzed. Furthermore, the fourth chapter analyses the internationalization strategies of VW and BMW. At the end of this thesis, the results are summarized in two SWOT analyses of both firms, including measures on how to deal with threats in the PRC and on how to benefit from strengths and opportunities. *Lemon-Aid Used Cars and Trucks 2011-2012* Phil Edmonston, 2011-04-25
