Topics In West African History 2nd Edition:

Themes in West Africa's History Emmanuel Kwaku Akyeampong, 2006-01-15 There has long been a need for a new textbook on West Africa's history. In *Themes in West Africa's History* editor Emmanuel Kwaku Akyeampong and his contributors meet this need examining key themes in West Africa's prehistory to the present through the lenses of their different disciplines. The contents of the book comprise an introduction and thirteen chapters divided into three parts. Each chapter provides an overview of existing literature on major topics as well as a short list of recommended reading and breaks new ground through the incorporation of original research. The first part of the book examines paths to a West African past including perspectives from archaeology, ecology and culture, linguistics and oral traditions. Part two probes environment, society and agency and historical change through essays on the slave trade, social inequality, religious interaction, poverty, disease and urbanization. Part three sheds light on contemporary West Africa in exploring how economic and political developments have shaped religious expression and identity in significant ways. *Themes in West Africa's History* represents a range of intellectual views and interpretations from leading scholars on West Africa's history. It will appeal to college undergraduates, graduate students and scholars in the way it draws on different disciplines and expertise to bring together key themes in West Africa's history from prehistory to the present.

Cultural Sociology of the Middle East, Asia, and Africa Andrea L. Stanton, Edward Ramsamy, Peter J. Seybolt, Carolyn M. Elliott, 2012-01-05 In our age of globalization and multiculturalism it has never been more important for Americans to understand and appreciate foreign cultures and how people live, love and learn in areas of the world unfamiliar to most U.S. students and the general public. The four volumes in our cultural sociology reference encyclopedia take a step forward in this endeavor by presenting concise information on those regions likely to be most foreign to U.S. students: the Middle East, Asia and Africa. The intent is to convey what daily life is like for people in these selected regions. It is hoped entries within these volumes will aid readers in efforts to understand the importance of cultural sociology to appreciate the effects of cultural forces around the world and to learn the history of countries and cultures within these important regions.

Colonial and Postcolonial Africa Rosina Beckman, 2016-12-14

Themes in African-Guyanese History Winston Mc Gowan, 2009 Most African Guyanese today are descendants of enslaved Africans who were victims of the trans-Atlantic slave trade. These captives had previously been members of societies which had been distinguished by significant achievements and were able to make a valuable contribution to the land to which they were taken. *Themes in African-Guyanese History* seeks to deal in a balanced way with the history of these forced migrants from the time of their arrival in what were then the Dutch colonies of Essequibo and Berbice to the present day.
