Pediatric Primary Care Beth Richardson, 2018-09-05 Pediatric Primary Care Practice Guidelines for Nurses Fourth Edition is written for advanced practice primary care nursing students for use in clinical courses It Hurts When I Poop! Howard J. Bennett, 2007-05-15 iParenting Media Award Winner Helping children overcome their fear of pooping with colorful illustrations and a thoughtful story Ryan is scared to use the potty He is afraid to have a poop because he's afraid it's going to hurt He does NOT want to go This story along with Ryan's poop program will help young children gain the confidence they need to overcome this common problem and establish healthy habits Includes a Note to Parents by the author From the Note to Parents The book includes a poop program that I use with children between the ages of 3 and 6 While the program is ostensibly for the main character my hope is that your child will want to follow these steps as well How you approach the

program will vary somewhat depending on your child's age. Most 3 to 4 year olds do not need to do the program in a formal way. Instead you can incorporate parts of the program into your daily routine, make the needed dietary changes, reward successful pooping with stickers, and consider reviewing how poops come out of the body. Most 5 to 6 year olds are interested in doing the full program though it is still important to be flexible. For example, if a 5 year old does not want to do Potty Practice, I would adjust things accordingly.
