The North Atlantic Treaty Organization and cross-cultural competence Anne Julia Hagen,2022-07-01 This paper examines the function that cross cultural competence 3C has for NATO in a military context while focusing on two member states and their armed forces the United States and Germany Three dimensions were established to analyze 3C internally and externally dimension A dealing with 3C within the military organization dimension B focusing on 3C in a coalition environment multicultural NATO contingent for example while on a mission training exercise abroad and dimension C covering 3C and NATO missions abroad with regard to interaction with the local population When developing the research design the cultural studies based theory of hegemony constructed by Antonio Gramsci was applied to a comprehensive document analysis of 3C

coursework and regulations as well as official documents in order to establish a typification for cross cultural competence As the result 3C could be categorized as Type I Ethical 3C Type II Hegemonic 3C and Type III Dominant 3C Attributes were assigned according to each type To validate the established typification qualitative surveys were conducted with NATO ACT the U S Armed Forces USCENTCOM and the German Armed Forces BMVg These interviews validated the typification and revealed a varied approach to 3C in the established dimensions It became evident that dimensions A and B indicated a prevalence of Type III which greatly impacts the work atmosphere and effectiveness for NATO ACT In contrast dimension C revealed the use of postcolonial mechanisms by NATO forces such as applying one s value systems to other cultures and having the appearance of an occupying force when 3C is not applied Type I II In general the function of each 3C type in the various dimensions could be determined In addition a comparative study of the document analysis and the qualitative surveys resulted in a canon for culture general skills Regarding the determined lack of coherence in 3C correlating with a demonstrably negative impact on effectiveness and efficiency as well as interoperability a NATO standard in the form of a standardization agreement STANAG was suggested based on the aforementioned findings with a focus on empathy cross cultural awareness communication skills including active listening flexibility and adaptability and interest Moreover tolerance of ambiguity and teachability patience observation skills and perspective taking could be considered significant Suspending judgment and respect are also relevant skills here At the same time the document analysis also revealed a lack of coherency and consistency in 3C education and interorganizational alignment In particular the documents examined for the U S Forces indicated divergent approaches Furthermore the interview analysis disclosed a large discrepancy in part between doctrine and actual implementation with regard to the NATO Forces
