The Bronze Age Towers at Bat, Sultanate of Oman Christopher P. Thornton, 2016 In the third millennium B C E the Oman Peninsula was the site of an important kingdom known in Akkadian texts as Magan which traded extensively with the Indus Civilization southern Iran the Persian Gulf states and southern Mesopotamia Excavations have been carried out in this region since the 1970s although the majority of studies have focused on mortuary monuments at the expense of settlement archaeology While domestic structures of the Bronze Age have been found and are the focus of current research at Bat most settlements dating from the third millennium B C E in Oman and the U A E are defined by the presence of large circular monuments made of mudbrick or stone that are traditionally called towers Whether these so called towers are defensive agricultural political or ritual structures has long been debated but very few comprehensive studies of these monuments have been attempted Between 2007 and 2012 the University of Pennsylvania Museum of Archaeology and Anthropology conducted excavations at the UNESCO World Heritage Site of Bat in the Sultanate of Oman under the direction of the late Gregory L Possehl The focus of these years was on the monumental stone towers of the third millennium B C E looking at the when how and why of their construction through large scale excavation GIS aided survey and the application of radiocarbon dates This has been the most comprehensive study of nonmortuary Bronze Age monuments ever conducted on the Oman Peninsula and the results provide new insight into the formation and function of these impressive structures that surely formed the social and political nexus of Magan s kingdom

Surveying for Engineers John Uren, Bill Price, 2018-03-13 The fifth edition of this classic textbook sets out the essential techniques needed for a solid grounding in the surveying The popular and trusted textbook covers the traditional topics such as levelling measurement of angles measuring distances and how to carry out traversing and compute coordinates as well as the latest technological advances It is packed with clear illustrations exercises and worked examples making it both a comprehensive study aid for students and a reliable reference

tool for practitioners This text is aimed at students studying surveying as either part of a civil engineering building or construction course or as a separate discipline It is also useful for students who undertake surveying as an elective subject and is a useful resource for practising surveyors New to this Edition The latest developments in Global Navigation Satellite Systems GNSS particularly the introduction of network RTK and OS Net and their applications Recent developments in survey instruments methods and digital technologies including image processing with total stations and laser planners developments in data processing and integration and updates on Ordnance Survey mapping products Construction 4.0 Marco Casini, 2021-11-24 Developments in data acquisition technologies digital information and analysis automated construction processes and advanced materials and products have finally started to move the construction industry traditionally reluctant to innovation and slow in adopting new technologies toward a new era Massive changes are occurring because of the possibilities created by Building information modeling Extended reality Internet of Things Artificial intelligence and Machine Learning Big data Nanotechnology 3D printing and other advanced technologies which are strongly interconnected and are driving the capabilities for much more efficient construction at scale Construction 4.0 Advanced Technology Tools and Materials for the Digital Transformation of the Construction Industry provides readers with a state of the art review of the ongoing digital transformation of the sector within the new 4.0 framework presenting a thorough investigation of the emerging trends technologies and strategies in the fields of smart building design construction and operation and providing a comprehensive guideline on how to exploit the new possibilities offered by the digital revolution It will be an essential reference resource for academic researchers material scientists and civil engineers undergraduate and graduate students and other professionals working in the field of smart ecoefficient construction and cutting edge technologies applied to construction Provides an overview of the Construction 4.0 framework to address the global challenges of the building sector in the 21st century and an in depth analysis of the most advanced digital technologies and systems for the operation and maintenance of infrastructure real estate and other built assets Covers major innovations across the value chain including building design fabrication construction operation and maintenance and end of life Illustrates the most advanced digital tools and methods to support the building design activity including generative design virtual reality and digital fabrication Presents a thorough review of the most advanced construction materials building methods and techniques for a new connected and automated construction model Explores the digital transformation for smart energy buildings and their integration with emerging smart grids and smart cities Reflects upon major findings and identifies emerging market opportunities for the whole AECO sector Target Costing and Value Engineering Robin Cooper, 2017-10-19 What would happen if everyone in your company followed a disciplined approach to cost reduction Go ahead imagine it What would it look like How can it be done The answer smart cost management Effective cost management must start at the design stage As much as 90-95% of a product's costs are added in the design process That is why effective

cost management programs focus on design and manufacturing The primary cost management method to control cost during design is a combination of target costing and value engineering Target Costing Objectives Identify the cost at which your product must be manufactured at if it is to earn its profit margin at its expected target selling price Break the target cost down to its component level and have your suppliers find ways to deliver the components they sell you at the set target prices while still making adequate returns Value Engineering The connection to function An organized effort and team based approach to analyze the functions of goods and services that the design stage and find ways to achieve those functions in a manner that allows the firm to meet its target costs The result Added value for your company development costs on line with added value for your company development costs on line with selling prices and added value for your customer higher quality products that meet possibly even exceed customer expectations

Senèze: Life in Central France Around Two Million Years Ago Eric Delson, Martine Faure, Claude Guérin, 2025-04-09 The paleontological site of Sen ze Haute Loire central France was discovered in 1892 inside a volcanic crater For over 40 years local peasant Pierre Philis collected fossils and sold them to French and Swiss museums The site became world famous for its well preserved skeletons of ungulates and carnivores as well as rare but well preserved remains of primates and other mammals It is considered the reference fauna for the late Villafranchian and MNQ 18 biochronological units of European mammalian evolution but the lack of provenance data made modern research difficult From 2000 2006 the multidisciplinary Franco American Sen ze Research Project undertook five seasons of major fieldwork with the goals of clarifying the age stratigraphy and taphonomy of Sen ze as well as finding additional remains especially of the less well known taxa In this volume following a history of study and summary of the new fieldwork four geological chapters consider field methods stratigraphy volcanology and dating Combining argon argon ages and paleomagnetic calibration the newly recovered fossils are shown to date between 2 20 and 2 08 Ma with concentrations ca 2 20 2 18 and 2 10 2 08 Ma significantly older than previously thought Chapters on palynology ichthyology and ornithology are followed by eight chapters on the fossil mammals The chapter on biochronology places Sen ze among other sites at the start of MNQ 18 which is estimated to end ca 1 7 Ma Of some 2200 specimens known from the site over half are cervids with bovids rhinocerotids and equids far behind According to data from palynology and the habitat preferences of the more common mammals the paleoenvironment around the Sen ze maar would have included forest woodland and grassland perhaps in a warmer and moister climate than today Taphonomic studies revealed that bones often rested a long time under water lacked any indication of carnivore attack and often displayed pathologies in their joints It is likely that most of the associated skeletons were preserved undisturbed after large mammals fell into the paleolake and drowned without being able to climb out This book responds to the long held desire of later Cenozoic paleontologists to see a modern study of a site recognized worldwide as a biochronologic reference for the Plio Pleistocene Our study required renewed fieldwork using up to date techniques of topography sedimentology stratigraphy geochronology and taphonomy The systematic paleontology

chapters are based on re study of the entire body of Sen ze fossils collected during more than a century of research The volume will be of interest to paleontologists especially those concerned with the evolution of the European fauna and with the taxa studied as well as with paleoenvironmental reconstruction and biogeography It will also be of value to mammalogists interested in analyses of near modern taxa and to paleoanthropologists archaeologists and taphonomists interested in the methods utilized and the role of Sen ze as a comparative standard for a site of this age without human intervention It will surely be an essential reference for all those who want to know more about Life in Central France Around Two Million Years Ago

Close-Range Photogrammetry and 3D Imaging Thomas Luhmann, Stuart Robson, Stephen Kyle, Jan Boehm, 2019-11-18 This is the third edition of the well known guide to close range photogrammetry It provides a thorough presentation of the methods mathematics systems and applications which comprise the subject of close range photogrammetry which uses accurate imaging techniques to analyse the three dimensional shape of a wide range of manufactured and natural objects
