Radebe, Mogobe B. Ramose, 2023-06-28 African knowledge is yet to fully contribute to spaces of learning because of the disciplinary boundaries founded on Western separatist logic From an African epistemology knowledge is interconnected because of the cosmological understanding that the universe is one entity Bringing African knowledge into the academy requires a concerted effort to bring it of its own accord There have been commendable efforts by scholars in South Africa to bring African knowledge to higher education in ways that do not alter or re shape this knowledge to suit the dominant Euro American script This book aims to showcase such efforts This book makes interconnections of themes across disciplines The content produced in this book will ensure that literature will anchor the noble efforts to build African universities that deliberately centre African ways of knowing This book will be among the few publications that focus on Africanisation and decolonisation of knowledges as praxis We anticipate that this book will be recommended in various disciplines of social sciences in South African universities The Great Gatsby meets Alain Badiou Ursula Vooght, 2023-12-21 The subject of this book is a consideration of the usefulness of the concept of fidelity put forward by the philosopher Alain Badiou in the discussion of film adaptation Fidelity or faithfulness is primarily a consideration that emerges in relation to so called canonical texts in adaptation Fitzgerald's *The Great Gatsby* occupies a position of global recognisability and within the United States cultural mythology that has triggered strong reactions to the four Hollywood adaptations The various adaptations allow for the differing approaches to the adaptation of this novel to be meaningfully explored The film adaptations paratextual elements will be discussed in order to show how these acted as limiting lenses The

strategies of the films for handling elements of Fitzgerald's prose and themes will be compared across the adaptations. This will culminate in an assertion of the worth of a larger application of a Badiouian fidelity within the field.
