

Sensor Mounting

1. Mounting location.

- Choose a location on an interior wall near the return air grille, approximately five feet above floor level, where air circulates freely and is of average temperature for the zone.
- Avoid areas such as:
 - behind doors;
 - on outside walls, or any walls with unconditioned areas behind the sensor;
 - in direct sunlight, or any source of radiant heat that could affect the temperature measurements;
 - in line with the discharge air from the unit being controlled.

2. Mounting the sub base.

The mounting hardware is contained in a plastic bag that includes:

- 3 - plastic wall anchors
- 3 - mounting screws
- 1 - terminal strip (TB), set aside for later use.

- Remove the sensor from its sub base.

Hold the Sensor with one hand and firmly grasp the sub base with the other hand. Gently pull the bottom, away and upward. Refer to Figure 1.

After disassembling the sensor, protect the internal surface from contacting objects or substances that could cause damage.

- To determine the appropriate number of wires required, refer to Figure 3.
- Route the wires from the wall through the wire access hole in the sub base. Refer to Figure 2.
- Mount the sub base directly on the wall or on a 2X4 handy box (Handy Box must be installed Horizontally).

To mount the sub base directly on the wall, hold it in place and mark the three holes. Drill three 3/16 inch (4.8 mm) holes. Gently tap the plastic anchors into the holes until they are flush with the wall. Level the sub base and firmly tighten the mounting screws. **OVER TIGHTENING THE SCREWS** could crack the sub base.

To mount the sub base on a 2X4 handy box mounted horizontally, Level the sub base and firmly tighten the mounting screws. **OVER TIGHTENING THE SCREWS** could crack the sub base.

If the handy box is installed vertically, a mounting plate and adapter kit (#BAYMTPL003B) is required. Follow the instructions that are enclosed with the mounting kit.

- Seal the hole in the wall behind the sub base.

Installation

Figure 1

Removing the Sensor from the Sub Base

Figure 2

Mounting the Sub Base

Conductors and Terminal Identification

Operating Power (2 Wires)

24 VAC power supplied from the Unit Control provides the operating power for the ZSM. The power supply should be connected to the terminals 11 & 14 on the ZSM.

Remote Zone Temperature Sensor (2 Wires Optional)

The ZSM supports the use of a remote zone temperature sensor. The remote sensor should be a thermistor type sensor (Baysens017). When connecting the remote sensor, use terminals S1 and S2 on the ZSM. Connect the Shield wire (drain wire) from the shielded cable to terminal 11 on the ZSM.

Note: When using a remote sensor, Option # 11 in the **OPTION MENU** must be set to "1".

Communication (1 Wire)

Data communication between the UCM and the ZSM is accomplished over a serial link connected at terminal 12 on the ZSM.

Trane Manual Baysens019b
