On the Origins of Speaking Lord Walsingham,2016-10-22 This is a serious book examining the original sounds and meanings of languages right back to the Stone Age up until now believed to be impossible But it can also be seen as tracing the overwhelming sexual orientation of human thinking for the last six hundred thousand years or more when we were only hominids squatting round the camp fires at the mouths of our caves to keep the sabre toothed tigers out It was here that our original bare bottomed language committees first got to grips with meanings and their audible representation The committees were convened as a result of the taming of fire the high tech of the day It was a cosy environment in a cold and hostile world and the unaccustomed warmth led to an outburst of amorous inclinations and the need to express them in words Ka they thought echoic of the strike of flint on flint and so striking and so the tenderising of raw meat for which they had already been making hand axes for at least half a million years It is from ka ka for tenderising with a hand axe that our cooking comes The flame did it for you Flint knapping left a lot of debetage or waste flakes whence ka ka also came to mean waste including today human waste Metaphor led to odd bedfellows All this evidence is decoded from an exhaustive forty year research into over a hundred languages many of them dead ones where like flies in amber our original Lithic Stone Age language roots are still embedded There is nothing salacious in the tale It simply tells it as it is and was and it is not going to go away This short version is abstracted from a major work of over 600 pages and there is nothing in it which the ordinary man in the street and his sister can not easily follow It ranks quite highly in the order of useless information but it has its indirect usage If you understand how all our languages have actually come about the product of human whimsy you will be that much less likely to believe

some of the sillier alternative views put forward by ideologically inclined placemen Lastly how has Lithic Language been cracked The answer lies in semantic triangulation Believe it or not all our languages today over 6000 bear traces of the original meanings given to the sounds as we first learned to articulate them and it is possible to work backwards using the current meanings in numerous languages to home in on the original source meanings which are common to the current ones Then we can see if they make sense as a first guess by our Stone Age hominid forebears of what they thought of as the natural meanings of the sounds They didn't do thinking very much That is how they all guessed the same or nearly the same So we are probably on the right track language was all spun by human whimsy over a few hundred millennia from only a baker's dozen original articulated sounds The English language alone reached a million words last year **A Unified**
