agenda for future tourism research and includes a wealth of bibliographic references      **Shock of the New** Chad Udell, Gary Woodill, 2019-04-02 Find the Leading Edge in a Disrupted World Planning our response to disruption seems impossible Most new and emerging technologies have been in development for decades but as soon as they land on our doorstep they inspire the shock of the new How do you as a learning professional prepare for what you don't know is coming How do you judge what is important and what is just a fad In Shock of the New The Challenge and Promise of Emerging Learning Technologies Chad Udell and Gary Woodill create a new framework for anticipating emerging learning technologies outlining six key perspectives you should consider with any new technology They examine some of the day's most commonly discussed emerging technologies and pose the questions that will point the way to your own strategy These insights aren't limited to specific applications they give you an approach you can apply to any new tech coming your way so you're always braced for the shock of the new Udell and Woodill optimistically point out that emerging technologies will help us make sense of our increasingly complex world many more changes will occur over the next decade so buckle up What was once science fiction has just become real and now is your opportunity to be on the leading edge      Understanding Leadership Robert M McManus, Gamaliel Perruci, 2015-04-10 Lao Tzu Marx the Buddha Ibsen Machiavelli these are just a few of the world's great thinkers who have weighed in on the subject of leadership over the centuries Yet the contemporary student of leadership often overlooks many of these names in favour of more recent theorists hailing from the social sciences Understanding Leadership An Arts and Humanities Perspective takes a different angle employing the works of the great philosophers authors and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership The authors build their conceptual framework using The Five Components of Leadership Model which recognizes the leader the followers the goal the environmental context and the cultural values and norms that make up the leadership process Supporting the text are a wealth of case studies which reflect on works such as Ayn Rand's novella Anthem Eugène Delacroix's painting Liberty Leading the People Charlie Chaplin's film Modern Times Athol Fugard's play Master Harold and the Boys Lao Tzu's poetic work Tao Te Ching and Antonín Dvořák's New World Symphony The authors also introduce studies from various world cultures to particularly illustrate the role cultural values and norms play in leadership This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem solving in a complex world Understanding Leadership An Arts and Humanities Perspective will be a valuable textbook for both undergraduate and postgraduate leadership students while leadership professionals will also appreciate the book's unique liberal arts and cultural approach      *Beware of smart people! Redefining the smart city paradigm towards inclusive urbanism* Stollmann, Jörg, Wolf, Konrad, Brück, Andreas, Frank, Sybille, Million, Angela, Misselwitz, Philipp, Schlaack, Johanna, Schröder, Carolin, 2016-11-30 The Smart City paradigm aims at resource efficient urban development by means of ICT implementation Cities where we work and conduct our research are building Smart City strategies and that research institutions increasingly

fund research into the development of smart infrastructure and Smart Cities are considered a radical paradigm shift and motors of technological innovation economic growth higher quality of life efficiency and risk control in the face of shrinking resources and impending climate change This smartification is contrasted by increasing calls by civil society and urban social movements for more encompassing inclusion in decision making New urban actors are acquiring agency through situated knowledge local expertise social networking and cooperation and collaboration skills Behind these movements a seemingly parallel discourse to the Smart City paradigm is gaining ground the discourse of the commons Commons are defined as the combination of resources people and practices resources which are defined and managed by a group of people of commoners and a practice of commoning that looks after takes care for and fosters this resource without exhausting it Commoning is a practice that seems closer than any other practice to a sustainable way of life Are these two discourses the discourse on the Smart City and the discourse on the urban commons irreconcilable antagonists or do they share a common ground which needs to be uncovered developed and advocated This question is by no means merely theoretical It is also a very practical question which pertains to the management and distribution of the resources we depend on It is a very political question as it demands negotiation and the taking of sides And it is an ethical question in that it relates to how we respect and stand up for each other our fellow human beings and also the non human nature for which we are responsible The essays and transcripts of the symposium Beware of Smart People want to make a first contribution and stimulate future research in the field Das Paradigma der Smart City ist Ausdruck der Ambition Stadtentwicklung durch die Anwendung von IKT effizient und Ressourcen schonend zu gestalten Städte in denen wir arbeiten und bei der wir forschen entwickeln Smart City Strategien und Forschungsförderung spezialisiert sich zunehmend auf die Entwicklung smarter Infrastrukturen und Steuerungsmechanismen Smart Cities werden als radikaler Paradigmenwechsel gelesen und als Motoren technologischer Entwicklung konomisches Wachstum höhere Lebensqualität Effizienz und Risikokontrolle angesichts abnehmender Ressourcen und drohenden Klimawandels Dieser Smartifizierung stehen die zunehmenden Forderungen zivilgesellschaftlicher Gruppen und sozialer Bewegungen für mehr und umfassendere Einbindung in Entscheidungsprozesse entgegen Neue urbane Akteure werden zu Agenten indem sie ihre Erfahrungswissen ihre lokalen Kenntnisse ihre sozialen Netzwerke und Fähigkeiten zur Kooperation und Kollaboration einbringen Hintergrund diese Bewegungen ist ein augenscheinlich paralleler Diskurs zur Smart City welcher sich zunehmend Gehör verschafft der Diskurs bei der Gemeingüter die Commons Commons werden definiert als das Zusammenspiel von Ressourcen Menschen und Praktiken Ressourcen die von einer Gemeinschaft den Commonern definiert und verwaltet werden und eine Praxis des Commoning welche die Ressource schonend bewirtschaftet ohne sie zu verbrauchen In diesem Sinne scheint Commoning eine Praxis die einer nachhaltigen Lebensweise am nächsten kommt Sind diese zwei Diskurse der Diskurs bei der Smart City und jener bei der urbanen Gemeingüter unvereinbare Antagonisten oder teilen sie Gemeinsamkeiten welche offen gelegt weiter entwickelt und

verfechtet werden sollten Diese Frage ist keineswegs eine rein theoretische Sie ist eine sehr praktische Frage da sie auf das die Verteilung und das Management lebenswichtiger Ressourcen zielt Sie ist eine politische Frage da sie Auseinandersetzung und Parteinahme einfordert Und sie ist eine ethische Frage denn sie fordert gegenseitigen Respekt und Einsatz ein f r unsere Mitmenschen sowie f r die nichtmenschliche Natur f r die wir Verantwortung tragen Die Texte und Aufzeichnungen des Symposiums Beware of Smart People wollen hierzu einen Beitrag leisten und zuk nftige Forschungsvorhaben stimulieren

**Digital Transformation of Business** Everlin Piccinini,2016-08-26 History of corporations is replete with stories of fundamental organizational change in the face of breakthroughs in technology and significant economic changes Yet pervasive digitalization i e a socio technical process whereby digital technology capabilities are embedded into everyday artifacts and life altering everyday experiences and interactions brings about substantial changes in environmental conditions not seen before The fast paced unbounded ongoing and potentially disruptive nature of change in today s digitized world is fueled by the generativity of digital innovation forcing incumbents across industries to transform and adapt This cumulative dissertation presents five studies that provide a comprehensive understanding on the emerging phenomenon of digital transformation of business With the help of primary data collected from more than 40 industry experts as well as secondary data it aimed at explaining through a configurational perspective how in certain contextual conditions a combination of particular mechanisms may lead automotive manufacturing organizations to embark on a sustainable digital transformation of their business Overall the findings derive a holistic view of the investigated phenomenon indicating that it stems from socio technical developments in the macro meso and micro levels of business fostering incumbents to build new mechanisms that activate digital transformation capabilities to rapidly respond to such socio technical developments fundamentally altering their traditional business logics Nevertheless research on the phenomenon of digital transformation is in its infancy in both information systems and organizational science research therefore more in depth empirical accounts are still needed

**New Technology, Big Data and the Law** Marcelo Corrales, Mark Fenwick, Nikolaus Forgó, 2017-09-04 This edited collection brings together a series of interdisciplinary contributions in the field of Information Technology Law The topics addressed in this book cover a wide range of theoretical and practical legal issues that have been

created by cutting edge Internet technologies primarily Big Data the Internet of Things and Cloud computing Consideration is also given to more recent technological breakthroughs that are now used to assist and at times substitute for human work such as automation robots sensors and algorithms The chapters presented in this edition address these issues from the perspective of different legal backgrounds The first part of the book discusses some of the shortcomings that have prompted legislators to carry out reforms with regard to privacy data protection and data security Notably some of the complexities and salient points with regard to the new European General Data Protection Regulation EU GDPR and the new amendments to the Japan s Personal Information Protection Act PIPA have been scrutinized The second part looks at the vital role of Internet intermediaries or brokers for the proper functioning of the globalized electronic market and innovation technologies in general The third part examines an electronic approach to evidence with an evaluation of how these technologies affect civil and criminal investigations The authors also explore issues that have emerged in e commerce such as Bitcoin and its blockchain network effects The book aims to explain systemize and solve some of the lingering legal questions created by the disruptive technological change that characterizes the early twenty first century

*Big Data, Databases and "Ownership" Rights in the Cloud* Marcelo Corrales Compagnucci, 2019-11-02 Two of the most important developments of this new century are the emergence of cloud computing and big data However the uncertainties surrounding the failure of cloud service providers to clearly assert ownership rights over data and databases during cloud computing transactions and big data services have been perceived as imposing legal risks and transaction costs This lack of clear ownership rights is also seen as slowing down the capacity of the Internet market to thrive Click through agreements drafted on a take it or leave it basis govern the current state of the art and they do not allow much room for negotiation The novel contribution of this book proffers a new contractual model advocating the extension of the negotiation capabilities of cloud customers thus enabling an automated and machine readable framework orchestrated by a cloud broker Cloud computing and big data are constantly evolving and transforming into new paradigms where cloud brokers are predicted to play a vital role as innovation intermediaries adding extra value to the entire life cycle This evolution will alleviate the legal uncertainties in society by means of embedding legal requirements in the user interface and related computer systems or its code This book situates the theories of law and economics and behavioral law and economics in the context of cloud computing and takes database rights and ownership rights of data as prime examples to represent the problem of collecting outsourcing and sharing data and databases on a global scale It does this by highlighting the legal constraints concerning ownership rights of data and databases and proposes finding a solution outside the boundaries and limitations of the law By allowing cloud brokers to establish themselves in the market as entities coordinating and actively engaging in the negotiation of service level agreements SLAs individual customers as well as small and medium sized enterprises could efficiently and effortlessly choose a cloud provider that best suits their needs This approach which the author calls plan like architectures endeavors to create a

more trustworthy cloud computing environment and to yield radical new results for the development of the cloud computing and big data markets      *Sustainable Rail Transport* Marin Marinov, 2017-07-11 This edited monograph presents the selected papers from RailNewcastle 2016 being held in Newcastle UK June 2016 The collected papers focus on railway research including topics such as rail operations engineering logistics communication systems and safety The target audience primarily comprises researchers and experts in the field of railway engineering but the paper collection may also be beneficial for graduate students alike      **Digital Transformation, Strategic Resilience, Cyber Security and Risk**
