Empire of Texts in Motion Karen Laura Thornber, 2020-10-26 By the turn of the twentieth century Japan's military and economic successes made it the dominant power in East Asia drawing hundreds of thousands of Chinese Korean and Taiwanese students to the metropole and sending thousands of Japanese to other parts of East Asia The constant movement of peoples ideas and texts in the Japanese empire created numerous literary contact nebulae fluid spaces of diminished hierarchies where writers grapple with and transculturate one another's creative output Drawing extensively on vernacular sources in Japanese Chinese and Korean this book analyzes the most active of these contact nebulae semicolonial Chinese occupied Manchurian and colonial Korean and Taiwanese transculturations of Japanese literature It explores how colonial and semicolonial writers discussed adapted translated and recast thousands of Japanese creative works both affirming and challenging Japan's cultural authority Such efforts not only blurred distinctions among resistance acquiescence and collaboration but also shattered cultural and national barriers central to the discourse of empire In this context twentieth century East Asian literatures can no longer be understood in isolation from one another linked only by their encounters with the West but instead must be seen in constant interaction throughout the Japanese empire and beyond **Translating**

Asian Translation Traditions Eva Tsoi Hung Hung, Judy Wakabayashi, 2014-07-16 Translation Studies one of the fastest developing fields in the humanities since the early 1980s has so far been Euro centric both in its theoretical explorations and in its historical grounding One of the major reasons for this is the unavailability of reliable data and systematic analysis of translation activities in non European cultures While a number of scholars in the Western tradition of translation studies have become increasingly aware of this bias and its problems practically indicates that the burden of addressing such deficiencies and imbalances should be on the shoulders of scholars who are conversant with the non Western translation traditions and capable of engaging in much needed basic research This book brings together eleven scholars with expertise in different Asian translation traditions who highlight language and cultural environments as well as perceptions and modes of operation often different from those in the Western tradition Their contributions enhance our understanding of the various elements that influence the transfer of knowledge across cultures and provide invaluable data for the study of translation as a force for cultural development and cultural planning Contributors include Eva Hung Judy Wakabayashi Lawrence Wong Yoshihiro Osawa Teresa Hyun Keith Taylor Rita Kothari Doris Jedamski Raniela Barbaza and Bill Cummings

Agency and Impersonality Mutsumi Yamamoto, 2006-01-01 In this monograph the author probes the fundamental nature of the concept of agency and its importance to human language and cognition Whereas previous studies focused on grammatical manifestations this original work addresses such issues as the strong relationship between agency and responsibility a philosophical interpretation of the concept of agency and a variety of epistemic attitudes towards agency that strongly influence our view of the world Different cultures and languages process and express agency differently To illustrate the co relation between the linguistic expressions of agency and cultural stereotypes that lurk behind individual natural languages the author analyses Japanese and English parallel corpora It is shown that English tends to highlight agency in expressing actions and events whereas Japanese largely obfuscates agency through impersonalising potential agents Through the case studies on these languages this book sheds light on the close connection between language thought and culture and contributes to the resurging interest in linguistic relativity

Translation and Cultural Change Eva Hung, 2005-01-01 History tells us that translation plays a part in the development of all cultures Historical cases also show us repeatedly that translated works which had real social and cultural impact often bear little resemblance to the idealized concept of a good translation Since the perception and reception of translated works as well as the translation norms which are established through contest and or consensus reflect the concerns preferences and aspirations of their host cultures they are never static or homogenous even within a given culture This book is dedicated to exploring some of the factors in the interplay of culture and translation with an emphasis on translation activities outside the Anglo European tradition

particularly in China and Japan **Ecologies of Translation in East and South East Asia, 1600-1900** Li Guo, Patricia Sieber, Peter Kornicki, 2025-10-01 This ground breaking volume on early modern inter Asian translation examines how translation from plain Chinese was situated at the nexus between on the one hand the traditional standard of biliteracy characteristic of literary practices in the Sinographic sphere and on the other practices of translational multilingualism competence in multiple spoken languages to produce a fully localized target text Translations from plain Chinese are shown to carve out new ecologies of translations that not only enrich our understanding of early modern translation practices across the Sinographic sphere but also demonstrate that the transregional uses of a non alphabetic graphic technology call for different models of translation theory *Translating Others (Volume 2)* Theo Hermans, 2014-07-16 Both in the sheer breadth and in the detail of their coverage the essays in these two volumes challenge hegemonic thinking on the subject of translation Engaging throughout with issues of representation in a postmodern and postcolonial world *Translating Others* investigates the complex processes of projection recognition displacement and othering effected not only by translation practices but also by translation studies as developed in the West At the same time the volumes document the increasing awareness the the world is peopled by others who also translate often in ways radically different from and hitherto largely ignored by the modes of translating conceptualized in Western discourses The languages covered in individual contributions include Arabic Bengali Chinese Hindi Irish Italian Japanese Latin Rajasthani Somali Swahili Tamil Tibetan and Turkish as well as the Europhone literatures of Africa the tongues of medieval Europe and some major languages of Egypt s five thousand year history Neighbouring disciplines invoked include anthropology semiotics museum and folklore studies librarianship and the history of writing systems Contributors to Volume 2 Paul Bandia Red Chan Sukanta Chaudhuri Annmarie Drury Ruth Evans Fabrizio Ferrari Daniel Gallimore Hephzibah Israel John Tszpang Lai Kenneth Liu Szu han Ibrahim Muhawi Martin Orwin Carol O Sullivan Saliha Parker Stephen Quirke and Kate Sturge *Translating China for Western Readers* Ming Dong Gu, 2014-11-06 This book explores the challenges of translating Chinese works particularly premodern ones for a contemporary Western readership Reacting against the cultural turn in translation studies contributors return to the origin of translation studies translation practice By returning to the time honored basics of linguistics and hermeneutics the book inquires into translation practice from the perspective of reading and reading theory Essays in the first section of the work discuss the nature function rationale criteria and historical and conceptual values of translation The second section focuses on the art and craft of translation offering practical techniques and tips Finally the third section conducts critical assessments of translation policy and practice as well as formal and aesthetic issues Throughout contributors explore how a translation from the Chinese can read like a text in the Western reader s own language **Translation in Modern Japan** Indra Levy, 2017-07-05 The role of translation in the formation of modern Japanese identities has become one of the most exciting new fields of inquiry in Japanese studies This book marks the first attempt to establish the contours of this new field

bringing together seminal works of Japanese scholarship and criticism with cutting edge English language scholarship Collectively the contributors to this book address two critical questions 1 how does the conception of modern Japan as a culture of translation affect our understanding of Japanese modernity and its relation to the East West divide and 2 how does the example of a distinctly East Asian tradition of translation affect our understanding of translation itself The chapter engage a wide array of disciplines perspectives and topics from politics to culture the written language to visual culture scientific discourse to children s literature and the Japanese conception of a national literature Translation in Modern Japan will be of huge interest to a diverse readership in both Japanese studies and translation studies as well as students and scholars of the theory and practice of Japanese literary translation traditional and modern Japanese history and culture and Japanese women s studies

A World Atlas of Translation Yves Gambier, Ubaldo Stecconi, 2019-02-15 What do people think of translation in the different historical cultural and linguistic traditions of the world How many uses has translation been put to How distant from one another are the concepts of translation found in the different traditions These are some of the questions *A World Atlas of Translation* addresses Its twenty one reports give us pictures taken from the inside both from traditions that are well represented in the literature and from the many that for now are not But the Atlas is not content with documenting no map is this innocent In fact the wealth of information collected and made accessible by its reporters can be useful to gauge the

dispersion of translation concepts across traditions As you read its reports the Atlas will keep asking How far apart do these concepts look to you Finally and more ambitiously the reports can help us test the hypothesis that a cross cultural notion of translation exists In this respect the Atlas is mostly a proof of concept It hopes to encourage further fact based research in quest of a robust and compelling unifying notion of translation
