Transnational Communities Shaping Global Economic Governance:

Transnational Communities Marie-Laure Djelic, Sigrid Quack, 2012-06-07 Transnational communities are social groups that emerge from mutual interaction across national boundaries oriented around a common project or imagined identity This common project or identity is constructed and sustained through the active engagement and involvement of at least some of its members Such communities can overlap in different ways with formal organizations but in principle they do not need formal organization to be sustained This book explores the role of transnational communities in relation to the governance of business and economic activity It does so by focusing on a wide range of empirical terrains including discussions of the Laleli market in Istanbul the institutionalization of private equity in Japan the transnational movement for open content licenses and the mobilization around environmental certification These studies show that transnational communities can align the cognitive and normative orientations of their members over time and thereby influence emergent transnational governance arrangements

Protest, Movements, and Dissent in the Social Sciences Giovanni Travaglino, 2017-10-02 Drawing on a wide range of social science disciplines and approaches each chapter in this book offers a comprehensive analysis of social protest political dissent and collective action The distinguished scholars contributing to the book discuss some of the key theoretical and methodological issues in social protest research and analyse recent instances of collective dissent around the globe ranging from the 15M movement in Spain to the 2011 Salford riots in the UK to Pro Palestinian activism in Jerusalem The result of these contributions is a sophisticated and multifaceted collection that enriches our understanding of why when and how groups of people decide to act collectively in order to pursue political change The book is a timely testament to the vitality of the field This book was originally published as a special issue of Contemporary Social Science [The Oxford Handbook of Professional Service Firms](#) Laura Empson, Daniel Muzio, Joseph Broschak, Bob Hinings, 2015-08-13 Over the past three decades the Professional Service Firm PSF sector has emerged as one of the most rapidly growing profitable and significant in the global economy In 2013 the accountancy management consulting legal and architectural sectors alone generated revenues of US 1 6 trillion and employed 14 million people PSFs play an important role in developing human capital creating innovative business services reshaping government institutions establishing and interpreting the rules of financial markets and setting legal accounting and other professional standards The study of PSFs can offer insights into the contemporary challenges facing organizations within the knowledge economy and deepen understanding of more conventional organizations Despite their significance however PSFs have until recently remained very much in the shadows of

organizational and management research The Oxford Handbook of Professional Service Firms marks the coming of age of PSF scholarship with a comprehensive and integrative exploration of current research and thinking on PSFs featuring contributions from internationally renowned scholars in the fields of organizational and management studies It is divided into three distinct sections the professions the firms and the professionals that work within them and covers subjects from governance and leadership to regulation entrepreneurship and diversity Bringing together a broad range of empirical and theoretical perspectives the Handbook offers many potentially important insights into the contemporary challenges of organizations in the knowledge economy and suggests new lines of inquiry that may shed further light on the activities and performance of PSFs and the professionals who work within them *Engineering Rules* JoAnne Yates, Craig N.

Murphy, 2021-03-30 The first global history of voluntary consensus standard setting Finalist Hagley Prize in Business History The Hagley Museum and Library The Business History Conference Private voluntary standards shape almost everything we use from screw threads to shipping containers to e readers They have been critical to every major change in the world economy for more than a century including the rise of global manufacturing and the ubiquity of the internet In *Engineering Rules* JoAnne Yates and Craig N Murphy trace the standard setting system's evolution through time revealing a process with an astonishingly pervasive if rarely noticed impact on all of our lives This type of standard setting was established in the 1880s when engineers aimed to prove their status as professionals by creating useful standards that would be widely adopted by manufacturers while satisfying corporate customers Yates and Murphy explain how these engineers' processes provided a timely way to set desirable standards that would have taken much longer to emerge from the market and that governments were rarely willing to set By the 1920s the standardizers began to think of themselves as critical to global prosperity and world peace After World War II standardizers transcended Cold War divisions to create standards that made the global economy possible Finally Yates and Murphy reveal how since 1990 a new generation of standardizers has focused on supporting the internet and web while applying the same standard setting process to regulate the potential social and environmental harms of the increasingly global economy Drawing on archival materials from three continents Yates and Murphy describe the positive ideals that sparked the standardization movement the ways its leaders tried to realize those ideals and the challenges the movement faces today *Engineering Rules* is a riveting global history of the people processes and organizations that created and maintain this nearly invisible infrastructure of today's economy which is just as important as the state or the global market **The Politics of Blood** Anne-Maree Farrell, 2012-05-24 How best to manage risk

involving multi-valued human biological materials is the overarching theme of this book which draws on the sourcing and supply of blood as a case study Blood has ethical social scientific and commercial value This multi-valuing process presents challenges in terms of managing risk therefore making it ultimately a matter for political responsibility This is highlighted through an examination of the circumstances that led to HIV blood contamination episodes in the US England and France as

well as their consequences The roles of scientific expertise and innovation in managing risks to the blood system are also analysed as is the increased use of precautionary and legal strategies in the post HIV blood contamination era Finally consideration is given to a range of policy and legal strategies that should underpin effective risk governance involving multi valued human biological materials

Knowledge and Policy Change Henrik Lindberg,2013-02-20 Knowledge and learning play important roles in policy change in advanced societies and political processes cannot be properly understood if you neglect their significance To understand how learning takes place and what role knowledge plays in the policy process we need to have theoretical and methodological tools to analyse these features The conceptual framework for this volume Knowledge and Policy Change focuses on issues such as belief systems paradigmatic and pragmatic policy change and the role of advocacy coalitions within policy subsystems No less important is the role various forms of knowledge can and do play in the policy formation process The book is structured around three main themes Theories of the policy process and the role of knowledge Reform and restructuring of welfare states Policy transfer diffusion and implementation processes The chapters often have an approach that emphasizes the role of ideas and knowledge in the policy process and give new perspectives on how policy outcomes are affected Many of the chapters deal with policy changes and reform in either the mature welfare states or policy diffusion and transfer in transition economies in East and Central Europe The contributing authors are academic scholars in economics economic history political science and sociology from a variety of countries in Europe and the US
