Transnational Nomads Transnational Nomads:

Transnational Nomads Cindy Horst, 2007-12 There is a tendency to consider all refugees as vulnerable victims an attitude reinforced by the stream of images depicting refugees living in abject conditions This groundbreaking study of Somalis in a Kenyan refugee camp reveals the inadequacy of such assumptions by describing the rich personal and social histories that refugees bring with them to the camps The author focuses on the ways in which Somalis are able to adapt their nomadic heritage in order to cope with camp life a heritage that includes a high degree of mobility and strong social networks that reach beyond the confines of the camp as far as the U S and Europe **Nomad-State Relationships in**

International Relations Jamie Levin, 2020-04-06 This book explores non state actors that are or have been migratory crossing borders as a matter of practice and identity Where non state actors have received considerable attention amongst political scientists in recent years those that predate the state nomads have not States however tend to take nomads quite seriously both as a material and ideational threat Through this volume the authors rectify this by introducing nomads as a distinct topic of study It examines why states treat nomads as a threat and it looks particularly at how nomads push back against state intrusions Ultimately this exciting volume introduces a new topic of study to IR theory and politics presenting a detailed study of nomads as non state actors **We Thought It Would Be Heaven** Blair Sackett, Annette

Lareau, 2023-08-22 Resettled refugees in America face a land of daunting obstacles where small things one person one encounter can make all the difference in getting ahead or falling behind Fleeing war and violence many refugees dream that moving to the United States will be like going to Heaven Instead they enter a deeply unequal American society often at the bottom Through the lived experiences of families resettled from the Democratic Republic of the Congo Blair Sackett and Annette Lareau reveal how a daunting obstacle course of agencies and services can drastically alter refugees experiences building a new life in America In these stories of struggle and hope as one volunteer said you see the American story For some families minor mistakes create catastrophes food stamps cut off educational opportunities missed benefits lost Other families with the help of volunteers and social supports escape these traps and take steps toward reaching their dreams Engaging and eye opening *We Thought It Would Be Heaven* brings readers into the daily lives of Congolese refugees and offers guidance for how activists workers and policymakers can help refugee families thrive [The Global Nomad](#) Greg

Richards, Julie Wilson, 2004-03-16 Backpackers have shifted from the margins of the travel industry into the global spotlight This volume explores the international backpacker phenomenon drawing together different disciplinary perspectives on its meaning impact and significance Links are drawn between theory and practice setting backpacking in its wider social cultural and economic context *Return Migration and Nation Building in Africa* Adele Galipo, 2018-11-08 Return migration has received growing levels of attention in both academic and policy circles in recent years as the African diaspora s role in contributing to the development of their country of origin has become apparent However little is known about the lived

experiences of those who come back and even less about the ways in which their return shapes socio political dynamics on the ground This book aims to unpack the complexities of migrant transnational experiences as situated in global political and economic processes In particular the book takes the case of the return of skilled and educated Somalis from Western Europe and North America in an attempt to recast the idea of diaspora return and transnational ethnography in a more political light and to show how these returnees are both subject to and generative of important political conditions that are transforming Somaliland society Overall the book captures the complexities of the migrant s position showing that return is rarely permanent and that success comes from perpetuating the transnational stance This book will appeal to scholars of migration diaspora development and African studies as well as to those interested in the Somali case specifically the third biggest community of refugees in the world

Transnationalism And CivicEngagement Abdulkadir Osman Farah,2012-10-25

The question of population migration and Diaspora transnationalism in the age of globalization is an area of social sciences deserving much more attention than it has received This book deals with the advent of new ideological currents based on an assumed Clash of Civilizations increasingly popular in social economic and political discourses In this regard applicable oriental literature on migration and Diaspora formation is comparatively older than what has been produced in the west in recent years thus deserving careful consideration For instance when dealing with transnational communities the concept of qabiil kinship allegiance as a central organizational factor dominates western scholarship Instead this book favors taking both western and non western approaches into consideration in order to achieve deeper and richer understanding of the transnational global Diaspora condition In order to surmount the dichotomy of essentialist versus no essentialist frames the epistemological approach instrumentalized in this work follows an emancipatory method critically engaging both approaches Furthermore the book proposes a theoretical framework analytically connecting western and non western social inquiry Hence we should note Emile Durkheim s scheme of modern society transformation from mechanical to organic solidarity was preceded by Ibn Khaldun s binary scheme distinguishing badawa primitive or pre modern i e symbolizing nomadism loyalty and tribalism from hadara civilization or modern i e symbolizing modernity urbanization and individualism Finally this book empirically examines how a host country s mobilizing political and structural opportunities or lack of them influence transnational Diasporas civic engagement that often include the application of combined formal and informal social economic and political capital in addressing multifaceted challenges emanating from host and homeland environments

Mobility and Migration Choices Martin van der Velde,Ton van Naerssen,2016-03-03

The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities This concerns both short distance mobility as well as long distance migration Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes This book tests the approach that three crucial thresholds need to be crossed before mobility occurs the individual s mindset about migrating the choice of

destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there Thus both borders and trajectories can act as thresholds to spatial moves The threshold approach with its focus on processes affecting whether when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive perceive and undertake their transnational journeys This book examines the three constitutive parts discerned in the cross border mobility decision making process people borders and trajectories and their interrelationships Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility

Multi-Sited Ethnography

Global Migration and Development
