estructura cuatro textos que condensan elementos de sabiduría militar que por analogía tienen aplicación en actividades civiles. El primer texto es El Arte de la Guerra escrito por Sun Tzu en el que los lectores encuentran recursos apropiados para las actividades políticas, sociales, deportivas, militares, policiales, industriales y de liderazgo de equipos de trabajo para ganar espacio al adversario e inducirlo a reconocer la derrota. Sun Tzu enfatiza la importancia de la inteligencia militar y el examen de las capacidades propias frente a las del contrincante para aceptar las batallas más convenientes cuando el plan se concentra en desarticular y derrotar la estrategia adversaria antes que el rival. Su visión estratégica induce a conocer y afectar con ardides psicológicos la voluntad de lucha del adversario. Veinticinco siglos después El Arte de la Guerra es un texto de consulta para estrategias civiles y militares y un tesoro para conocer y vencer la competencia o las estrategias contrarias. El segundo documento del Volumen I de Genios de la Estrategia Militar es un extracto del libro De la Guerra escrito por Karl Von Clausewitz como consecuencia de su experiencia militar en las guerras napoleónicas. De la Guerra enseña a una concepción científica, metodológica, rigurosa y verificable de los componentes de la estrategia: la táctica, la logística y el trabajo de los Estados Mayores para facilitar los apoyos requeridos por las tropas a la par con maniobras sincronizadas de tropas en el campo de batalla con base en factores tales como el enemigo, la misión propia, el tiempo, atmosférico y los accidentes topográficos. Clausewitz proporciona a la estrategia militar elementos constitutivos de una ciencia desarrollada con parámetros del método científico con el criterio que la guerra es la continuación de la política por otros medios en escenarios donde todo lo vivo o inerte influye en las campañas militares. El tercer documento es el libro Los Cinco Anillos escrito por el samurai Musashi Miyamoto en torno al uso de la espada para triunfar frente a samuráis japoneses. En cinco capítulos con analogías concretas de la tierra, el agua, el fuego, el viento y el vacío Miyamoto dejó un manual de estrategia para conocer con profundidad diversas personalidades de los seres humanos y técnicas para ganar la guerra, las cuales tienen analogía con las dificultades que a diario enfrenta el hombre. El cuarto documento es una recopilación de autor anónimo denominada 36 estrategias chinas que recoge enseñanzas de la guerra que por su contenido y orientación utilizadas de manera inteligente son aplicables a diversos proyectos y formas de encarar los obstáculos. De seguro la lectura de estos clásicos de la literatura estratégica agrupados en el Volumen I será un proceso motivador para completar y leer esta colección que pretende aglutinar en una sola colección la visión estratégica militar y general de la incidencia de las guerras en el futuro del planeta.

Teorías del aprendizaje en el contexto educativo Yolanda Heredia Escorza, Ana Lorena Sánchez Aradillas, 2020-07-02. Se ofrece esta segunda edición del libro cuya finalidad es presentar a los estudiantes una versión breve pero exhaustiva de los hallazgos que a lo largo de las últimas cinco décadas se han descubierto sobre el complejo proceso del aprendizaje. La capacidad de aprender no es únicamente humana; sin embargo, esta publicación se centra únicamente en el aprendizaje humano.
