Trauma Assessments A Clinicians Guide:

Trauma Assessments Eve B. Carlson, 1997-08-01 This book is intended for clinicians at all levels of experience who seek a guide to the assessment of psychological trauma and its effects After discussion of the theoretical foundation for understanding human responses to traumatic events Dr Carlson addresses both conceptual and practical aspects of selecting and administering measures to assess traumatic experiences and trauma responses Additional chapters provide guidance in interpreting results of assessments and diagnosing trauma related disorders and a brief introduction to major forms of treatment of trauma related disorders Profiles of 36 recommended measures of traumatic experiences and trauma responses are included and are designed to make it easy to find the information needed to obtain the measures Measures profiled include self report and interview measures of trauma self report measures of trauma responses structured interviews for posttraumatic and dissociative disorders and measures for children and adolescents Flowcharts provide a quick reference for choosing measures at each stage of the assessment process *Clinician's Guide To Neuropsychological Assessment* Rodney D. Vanderploeg, 2014-04-04 Neuropsychological assessment is a difficult and complicated process Often experienced clinicians as well as trainees and students gloss over fundamental problems or fail to consider potential sources of error Since formal test data on the surface appear unambiguous and objective they may fall into the habit of overemphasizing tests and their scores and underemphasizing all the factors that affect the validity reliability and interpretability of test data But interpretation is far from straightforward and a pragmatic application of assessment results requires attention to a multitude of issues This long awaited updated and greatly expanded second edition of the Clinician's Guide to Neuropsychological Assessment like the first focuses on the clinical practice of neuropsychology Orienting readers to the entire multitude of issues it guides them step by step through evaluation and helps them avoid common misconceptions mistakes and methodological pitfalls It is divided into three sections fundamental elements of the assessment process special issues settings and populations and new approaches and methodologies The authors all of whom are actively engaged in the clinical practice of neuropsychological assessment as well as in teaching and research do an outstanding job of integrating the academic and the practical The Clinician's Guide to Neuropsychological Assessment Second Edition will be welcomed as a text for graduate courses but also as an invaluable hands on handbook for interns postdoctoral fellows and experienced neuropsychologists alike No other book offers its combination of breadth across batteries and approaches depth and practicality *A Clinician's Guide to Foundational Story Psychotherapy* Hugh K. Marr, 2019-10-22 A Clinician's Guide to Foundational Story Psychotherapy draws together a range of theories and models to examine the use of narrative psychotherapy in clinical practice Illustrated with case examples and biographical vignettes the book outlines the importance of foundational and life stories in treatment and delineates new techniques for co assessing and changing stories A wealth of concrete tools are included such as the Foundational Story Interview and Family of Origin Map as well as diagram templates

and questionnaires for use during clinical sessions Integrating theory and practical applications A Clinician's Guide to Foundational Story Psychotherapy introduces a range of therapeutic options rooted in a narrative context and is a valuable resource for practicing and student psychotherapists Clinician's Guide to the Assessment Checklist Series Michael Tarren-Sweeney, 2013-10-30 The Assessment Checklist series created by Michael Tarren Sweeney provides the world's first standardised caregiver report measures of a range of attachment and trauma related mental health difficulties experienced amongst children growing up in foster adoptive kinship and residential care This clinical manual provides essential guidance for child and adolescent mental health clinicians who use the Assessment Checklist measures including the Assessment Checklist for Children ACC the Assessment Checklist for Adolescents ACA and the Brief Assessment Checklists BAC as part of their specialized assessments of children and adolescents in care Split into three parts the book explores all aspects of using and interpreting the Checklist series Part 1 provides an overview of the Assessment Checklist measures the rationale for their development and instructions on how to use the measures for clinical assessment screening and treatment monitoring Part 2 provides expert guidance to clinicians on interpreting Assessment Checklist score profiles and provides detailed information about several specific types of mental health difficulties measured by them Part 3 describes the development and psychometric properties of the various Assessment Checklist measures including information about their validity and reliability It also introduces several new measures that are under development Ideal for clinical child psychologists child and adolescent psychiatrists child psychotherapists and clinical social workers looking to improve the quality and depth of their clinical assessments with children and adolescents this book provides essential guidance on professional use of the Assessment Checklist measures **A Clinician's Handbook of Child and Adolescent Psychiatry** Christopher Gillberg, Richard Harrington, Hans-Christoph Steinhausen, 2006-02-09 Originally published in 2006 this authoritative clinical handbook provides a detailed overview of the main disorders encountered by child and adolescent psychiatrists in clinical practice ranging from eating sleep and affective disorders to substance abuse gender identity disorder and sexual abuse The approach is evidence based and emphasis is on good clinical practice and quality control of patient care In contrast to other books in the field the authors' intention is not to cover exhaustively all the relevant science but rather to present in condensed form any research findings that are significant for clinical practice For coherence each chapter is constructed in the same way introduction definition and classification epidemiology the clinical picture aetiology treatment and outcome The disorders covered are based on the ICD 10 and DSM IV classifications and appendices include documents for assessment of intervention planning and evaluation Comprehensive Handbook of Personality and Psychopathology, Child Psychopathology Michel Hersen, Jay C.
